SAP인증 C-TS4FI-2023시험을 어떻게 공부하면 패스할수 있을지 고민중이시면 근심걱정 버리시고Itcertkr 의 SAP 인증 C-TS4FI-2023덤프로 가보세요. 문항수가 적고 적응율이 높은 세련된SAP인증 C-TS4FI-2023시험준비 공부자료는Itcertkr제품이 최고입니다.

최신 SAP Certified Associate C-TS4FI-2023 무료샘플문제 (Q67-Q72):

질문 # 67

What are characteristics of depreciation area 01? Note: There are 2 correct answers to this question.

- A. It must be defined as a cost accounting valuation area type.
- B. It must always post in real time.
- C. It cannot take over values from other areas.
- D. It must be linked to leading ledger OL.

정답: B,D

설명:

* Link to Leading Ledger OL:

* Depreciation area 01 is linked to the leading ledger OL. This linkage ensures that the primary depreciation calculations align with the organization's primary accounting standards, ensuring consistency across financial reporting. This connection is established in the SAP system configuration, ensuring that all relevant asset transactions are automatically integrated into the leading ledger.

* Real-Time Posting:

* Depreciation area 01 must post in real-time, meaning that any transactions affecting asset values, such as acquisitions, retirements, or depreciation runs, are immediately reflected in the general ledger. This real-time integration is crucial for maintaining accurate and up-to-date financial records, providing a true picture of the organization's financial position at any given moment.

질문 # 68

On which levels can you define the technical clearing account for Integrated Asset Acquisition in Customizing?

Note: There are 2 correct answers to this question.

- A. Depreciation area
- B. Chart of Accounts
- C. Account determination
- D. Asset Class

정답: B,C

질문 # 69

Your company structures its Profit & Loss (P&L) statement according to cost-of-sales accounting.

Which organizational unit do you need to define?

- A. Functional area
- B. Segment
- C. Profit center
- D. Business area

정답: A

질문 # 70

You post an incoming payment from a customer with a residual item for a payment difference. What are the consequences?

Note: There are 2 correct answers to this question.

- A. The residual item is written off to a cost account.
- B. The residual item becomes a new receivable.
- C. The original document and the payment are cleared.
- D. Both the original open item and the residual item remain on the account as open items.

정답: B,C

질문 # 71

At which level do you define functional areas?

- A. Company code
- **B. Controlling area**
- C. Client
- D. Financial statement version

정답: B

설명:

Comprehensive Detailed Explanation with all SAP S/4HANA Cloud References Functional areas in SAP S/4HANA are organizational units used to classify expenses and revenues for external reporting purposes, particularly in Profit and Loss (P&L) reporting. They allow organizations to categorize costs and revenues by function (e.g., production, administration, sales) rather than by organizational structure. Functional areas are primarily used in conjunction with the Profit and Loss statement and are a key component of financial reporting under standards like IFRS.

Explanation of Each Option:

A. Controlling area

- * Correct : Functional areas are defined at the controlling area level in SAP S/4HANA. This is because functional areas are closely tied to Cost of Sales Accounting (CO-PA) and management accounting processes, which are managed within the controlling area.
- * Functional areas are assigned to cost centers, internal orders, and other cost objects within the controlling area. When postings are made to these cost objects, the functional area is automatically updated in the Universal Journal (ACDOCA).
- * Reference : According to SAP documentation, functional areas are configured in the controlling area and are used to classify expenses and revenues for external reporting.

B. Client

- * Incorrect : Functional areas are not defined at the client level. The client is the highest organizational unit in SAP systems and represents an independent business entity. While functional areas can be used across multiple company codes within a client, they are not defined at this high level.
- * Reference : Client-level configurations typically involve system-wide settings, such as user roles or number ranges, but not specific financial reporting structures like functional areas.

C. Financial statement version

- * Incorrect : Financial statement versions (FSVs) are used to define how financial statements are structured and displayed. While functional areas can influence the data shown in financial statements, they are not defined within the FSV itself.
- * Reference : FSVs are part of the General Ledger (FI-GL) configuration and determine the layout of balance sheets and P&L statements, but they do not control the creation or assignment of functional areas.

D. Company code

- * Incorrect : Functional areas are not defined at the company code level. While company codes represent individual legal entities and manage financial accounting data, functional areas are part of the controlling area and are used for cross-company code reporting.
- * Reference : Company code-specific configurations include chart of accounts, fiscal year variants, and posting periods, but functional areas are managed separately within the controlling area.

Key References to SAP S/4HANA Documentation:

- * SAP S/4HANA Finance for Group Reporting : Explains how functional areas are used for external reporting and their relationship with the controlling area.
- * SAP Help Portal - Functional Areas : Provides detailed guidance on configuring and using functional areas in SAP S/4HANA.
- * Cost of Sales Accounting (CO-PA) : Describes how functional areas are integrated into profitability analysis and financial reporting.
- * Universal Journal (ACDOCA) : Highlights that functional areas are stored in the ACDOCA table and are updated during postings to cost objects.

질문 # 72

.....

요즘같이 시간인즉 금이라는 시대에, 우리 Itcertkr선택으로SAP C-TS4FI-2023인증시험응시는 아주 좋은 일입니다. 우리는 100%시험패스를 보장하고 또 일년무료 업데이트서비스를 제공합니다. 그리고 시험에서 떨어지셨다고 하시면 우리는 덤프비용전액 환불을 약속 드립니다.
