Exam Dumps Fortinet NSE8_812 Zip - NSE8_812 Latest Test Guide

We believe that the best brands are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, our company as the famous brand, even though we have been very successful we have never satisfied with the status quo, and always be willing to constantly update the contents of our NSE8_812 Exam Torrent in order to keeps latest information about NSE8_812 exam.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q44-Q49):

NEW QUESTION # 44

Refer to the exhibit showing the history logs from a FortiMail device.

Which FortiMail email security feature can an administrator enable to treat these emails as spam?

- A. Impersonation analysis in an antispam profile
- B. DKIM validation in a session profile
- C. Soft fail SPF validation in an antispam profile
- D. Sender domain validation in a session profile

Answer: A

Explanation:

Impersonation analysis is a feature that detects emails that attempt to impersonate a trusted sender, such as a company executive or a well-known brand, by using spoofed or look-alike email addresses. This feature can help prevent phishing and business email

compromise (BEC) attacks. Impersonation analysis can be enabled in an antispam profile and applied to a firewall policy. Reference: <https://docs.fortinet.com/document/fortimail/6.4.0/administration-guide/103663/impersonation-analysis>

NEW QUESTION # 45

SD-WAN is configured on a FortiGate. You notice that when one of the internet links has high latency the time to resolve names using DNS from FortiGate is very high.

You must ensure that the FortiGate DNS resolution times are as low as possible with the least amount of work.

What should you configure?

- A. Configure two DNS servers and use DNS servers recommended by the two internet providers.
- B. Configure local out traffic to use the outgoing interface based on SD-WAN rules with a manual defined IP associated to a loopback interface and configure an SD-WAN rule from the loopback to the DNS server.
- **C. Configure local out traffic to use the outgoing interface based on SD-WAN rules with the interface IP and configure an SD-WAN rule to the DNS server.**
- D. Configure an SD-WAN rule to the DNS server and use the FortiGate interface IPs in the source address.

Answer: C

Explanation:

SD-WAN is a feature that allows users to optimize network performance and reliability by using multiple WAN links and applying rules based on various criteria, such as latency, jitter, packet loss, etc. One way to ensure that the FortiGate DNS resolution times are as low as possible with the least amount of work is to configure local out traffic to use the outgoing interface based on SD-WAN rules with the interface IP and configure an SD-WAN rule to the DNS server. This means that the FortiGate will use the best WAN link available to send DNS queries to the DNS server according to the SD-WAN rule, and use its own interface IP as the source address. This avoids NAT issues and ensures optimal DNS performance. References:

<https://docs.fortinet.com/document/fortigate/7.0.0/sd-wan/19662/sd-wan>

NEW QUESTION # 46

A customer with a FortiDDoS 200F protecting their fibre optic internet connection from incoming traffic sees that all the traffic was dropped by the device even though they were not under a DoS attack. The traffic flow was restored after it was rebooted using the GUI. Which two options will prevent this situation in the future? (Choose two)

- **A. Replace with a FortiDDoS 1500F**
- **B. Create an HA setup with a second FortiDDoS 200F**
- C. Change the Adaptive Mode.
- D. Move the internet connection from the SFP interfaces to the LC interfaces

Answer: A,B

Explanation:

B is correct because creating an HA setup with a second FortiDDoS 200F will provide redundancy in case one of the devices fails. This will prevent all traffic from being dropped in the event of a failure.

D is correct because the FortiDDoS 1500F has a larger throughput capacity than the FortiDDoS 200F. This means that it will be less likely to drop traffic even under heavy load.

The other options are incorrect. Option A is incorrect because changing the Adaptive Mode will not prevent the device from dropping traffic. Option C is incorrect because moving the internet connection from the SFP interfaces to the LC interfaces will not change the throughput capacity of the device.

NEW QUESTION # 47

Refer to the exhibit, which shows diagnostic output.

□ A customer reports that ICMP traffic flow from 192.168.1.11 to 93.190.134.171 is not corresponding to the SD-WAN setup.

What is the problem in this scenario?

- A. Traffic is matched by policy route.
- B. Port1 is used because it has more available bandwidth.
- C. Route for the destination IP is missing in the routing table.
- D. SD-WAN Rule is matching only DNS traffic.

Answer: A

NEW QUESTION # 48

Refer to the exhibits, which show a network topology and VPN configuration.

A network administrator has been tasked with modifying the existing dial-up IPsec VPN infrastructure to detect the path quality to the remote endpoints.

After applying the configuration shown in the configuration exhibit, the VPN clients can still connect and access the protected 172.16.205.0/24 network, but no SLA information shows up for the client tunnels when issuing the diagnose sys link-monitor tunnel all command on the FortiGate CLI.

What is wrong with the configuration?

- A. IPsec Phase1 Interface has to be configured in IPsec main mode.
- B. SLA link monitoring does not work with the net-device setting.
- C. It is necessary to use the IKEv2 protocol in this situation.
- D. The admin needs to disable the mode-cfg setting.

Answer: B

NEW QUESTION # 49

.....

To pass Fortinet NSE8_812 certification exam seems to be a very difficult task. Having registered NSE8_812 test, are you worrying about how to prepare for the exam? If so, please see the following content, I now tell you a shortcut through the NSE8_812 Exam. The certification training dumps that can let you pass the test first time have appeared and it is Itcertking Fortinet NSE8_812 exam dumps. If you would like to sail through the test, come on and try it.
