

Fortinet - NSE7_CDS_AR-7.6 - Fortinet NSE 7 - Public Cloud Security 7.6 Architect–High-quality Reliable Dumps Questions

Fortinet NSE 7 - Enterprise Firewall 6.2

- Exam series: NSE7_EFW-6.2
- Number of questions: 30
- Exam time: 60 minutes
- Language: English and Japanese
- Product version: FortiOS 6.2

Status: Registration ends May 15, 2021

Fortinet NSE 7 - Secure Access 6.2

- Exam series: NSE7_SAC-6.2
- Number of questions: 30
- Exam time: 60 minutes
- Language: English and Japanese
- Product version: FortiOS 6.2

Status: Available until July 31, 2021

Fortinet NSE 7 - Public Cloud Security 6.0

- Exam series: NSE7_PBC-6.0
- Number of questions: 30
- Exam time: 60 minutes
- Language: English
- Product version: FortiOS 6.0, FortiWeb 6.0

Status: Available until July 31, 2021

- Exam details: [exam description](#)

Fortinet NSE 7 - Advanced Threat Protection 3.0

- Exam series: NSE7_ATP-3.0
- Number of questions: 30
- Exam time: 60 minutes
- Language: English and Japanese
- Product version: FortiSandbox 3.0

Status: Available until August 31, 2021

What's more, part of that PrepAwayETE NSE7_CDS_AR-7.6 dumps now are free: https://drive.google.com/open?id=1Z64Hy8W59c_i9PxiycZVIRL0QYvOIFsa

Our company's staff conducted a rigorous analysis of the user's characteristics, so our staff created these three versions of our NSE7_CDS_AR-7.6 study guide for you to choose: the PDF, Software and APP online. The PDF version can be printable. And the Software version of our NSE7_CDS_AR-7.6 Practice Engine can simulate the real exam and apply in Windows system. App online version can apply to all kinds of the electronic devices. Our NSE7_CDS_AR-7.6 exam questions are always thinking about customers and hopes that you can be satisfied in all aspects.

For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the NSE7_CDS_AR-7.6 certification exam is the proven way to achieve these tasks quickly. Overall, we can say that with the Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) exam you can gain a competitive edge in your job search and advance your career in the tech industry. However, to pass the NSE7_CDS_AR-7.6 Exam you have to prepare well. For the quick NSE7_CDS_AR-7.6 exam preparation the NSE7_CDS_AR-7.6 Questions is the right choice.

Exam Questions For Fortinet NSE7_CDS_AR-7.6 [Revised] - The Best Method To Pass The Exam

Our NSE7_CDS_AR-7.6 questions pdf is up to date, and we provide user-friendly NSE7_CDS_AR-7.6 practice test software for the NSE7_CDS_AR-7.6 exam. Moreover, we are also providing money back guarantee on all of NSE7_CDS_AR-7.6 test products. If the NSE7_CDS_AR-7.6 braindumps products fail to deliver as promised, then you can get your money back. The NSE7_CDS_AR-7.6 Sample Questions include all the files you need to prepare for the NSE7_CDS_AR-7.6 exam. With the help of the NSE7_CDS_AR-7.6 practice exam questions and test software, you will be able to feel the real NSE7_CDS_AR-7.6 exam scenario, and it will allow you to assess your skills.

Fortinet NSE 7 - Public Cloud Security 7.6 Architect Sample Questions (Q13-Q18):

NEW QUESTION # 13

Refer to the exhibit.

what-if tool

Resource and property changes are indicated with these symbols:

- Delete
- + Create
- ~ Modify

The deployment will update the following scope:

Scope: /subscriptions/./resourceGroups/ExampleGroup

```
~ Microsoft.Network/virtualNetworks/vnet-002 [2018-10-01]
  - tags.Owner: "Production"
  ~ properties.subnets: [
    + 0:
      name: Brave-Dumps.com          "subnet001"
      properties.addressPrefix: "10.0.0.0/25"
  ]
```

Resource changes: 1 to modify.

An administrator used the what-if tool to preview the changes to an Azure Bicep file. What will happen if the administrator applies these changes in Azure? (Choose one answer)

- A. The vnet-002 VNet will be renamed Production.
- B. The VNet address space will be updated.
- C. The resulting VNet will have a single subnet.
- D. A new subnet will be added to vnet-002.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From FortiOS 7.6, FortiWeb 7.4 Exact Extract study guide:

Based on the FortiOS 7.6 Azure Administration Guide and standard Azure Resource Manager (ARM) deployment practices, the what-if operation allows administrators to preview how a deployment will affect the current state of resources.

* Interpreting the What-If Output (Option A): The exhibit shows the results of a change preview for a Virtual Network (vnet-002).

* The symbol ~ (Modify) next to the VNet indicates that an existing resource is being updated rather than created or deleted.

* The symbol - (Delete) next to tags.Owner: "Production" indicates that this specific tag will be removed from the VNet.

* Crucially, the symbol + (Create) appearing inside the properties.subnets array next to index 0:

indicates the addition of a new element. This confirms that a new subnet named subnet001 with the address prefix 10.0.0.0/25 will be added to the existing Virtual Network vnet-002.

* Why other options are incorrect:

* Option B: The text shows that the tag "Production" is being deleted (-), not that the VNet is being renamed to "Production."

* Option C: The what-if tool only displays the changes. While one subnet is being added (+), the tool does not show the deletion of other existing subnets. Therefore, we cannot conclude the resulting VNet will have only a single subnet; it will have its existing subnets plus the new one.

* Option D: There is no mention of addressSpace or addressPrefixes for the VNet itself being modified (~) or added (+) in the exhibit; only a subnet-level address prefix is shown.

NEW QUESTION # 14

What are two main features in Amazon Web Services (AWS) network access control lists (NACLs)? (Choose two.)

- A. The default NACL is configured to allow all traffic.

- B. You cannot use NACLs and Security Groups at the same time.
- C. NACLs are stateless, and inbound and outbound rules are used for traffic filtering.
- D. NACLs are tied to an instance.

Answer: A,C

Explanation:

The default NACL in AWS allows all inbound and outbound traffic until modified.

NACLs are stateless, meaning both inbound and outbound rules must be defined to allow return traffic.

NACLs apply at the subnet level, not tied to individual instances, and they can be used together with Security Groups.

NEW QUESTION # 15

Refer to the exhibit.

You deployed an HA active-active load balance sandwich with two FortiGate VMs in Microsoft Azure.

After the deployment, you prefer to use FGSP to synchronize sessions, and allow asymmetric return traffic. In the environment, FortiGate port 1 and port 2 are facing external and internal load balancers respectively.

What IP address must you use in the peerip configuration?

- A. The opposite FortiGate port 1 IP address.
- B. The internal load balancer port 1 IP address.
- C. The opposite FortiGate port 2 IP address.
- D. The public load balancer port 2 IP address.

Answer: A

NEW QUESTION # 16

Refer to the exhibit. In which type of FortiCNP insights can an administrator examine the findings triggered by this policy?

- A. Data
- B. Risk
- C. User activity
- D. Threat

Answer: D

Explanation:

The policy shown is an AV Scan Policy that scans for malware during discovery and raises alerts when malicious targets are accessed. Findings from such policies are categorized under Threat insights in FortiCNP, since they deal with detection of malware and malicious activity.

NEW QUESTION # 17

An administrator is trying to implement FortiCNP with Microsoft Azure Security integration. However, FortiCNP is not able to extract any cloud integration data from Azure; therefore, real-time cloud security monitoring is not possible. What is causing this issue?

- A. The Azure account doesn't have the global administrator role.
- B. The FortiCNP account in Azure has the Storage Blob Data Reader role.
- C. The organization is using a free Azure AD license.
- D. The administrator enabled the wrong defender plan for servers.

Answer: A

NEW QUESTION # 18

.....

The person who has been able to succeed is because that he believed he can do it. PrepAwayETE is able to help each IT person, because it has the capability. PrepAwayETE Fortinet NSE7_CDS_AR-7.6 exam training materials can help you to pass the exam. Any restrictions start from your own heart, if you want to pass the Fortinet NSE7_CDS_AR-7.6 examination, you will choose the PrepAwayETE.

Valid Exam NSE7_CDS_AR-7.6 Practice: https://www.prepawayete.com/Fortinet/NSE7_CDS_AR-7.6-practice-exam-dumps.html
