H19-341_V1.0 Reliable Study Guide - Free H19-341_V1.0 Braindumps

There are some prominent features that are making the HCSA-Field-Intelligent Collaboration V1.0 (H19-341_V1.0) exam dumps the first choice of H19-341_V1.0 certification exam candidates. The prominent features are real and verified HCSA-Field-Intelligent

Collaboration V1.0 (H19-341_V1.0) exam questions, availability of Huawei exam dumps in three different formats, affordable price, 1 year free updated Huawei H19-341_V1.0 Exam Questions download facility, and 100 percent Huawei H19-341_V1.0 exam passing money back guarantee.

Huawei HCSA-Field-Intelligent Collaboration V1.0 Sample Questions (Q25-Q30):

NEW QUESTION # 25

Huawei SMC can manage the conference system and resources in a centralized manner.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

The Huawei Service Management Center (SMC) is the centralized management hub for the entire video conferencing solution. It is responsible for the unified management of all Network Elements (NEs), including MCUs, SwitchCenters (SC), and Recording & Streaming Engines (RSE). Its core functions include user and endpoint management, conference scheduling, resource allocation (resource pooling), and visualized O & M (Operations and Maintenance). By centralizing these tasks, the SMC ensures that large-scale enterprise networks can be controlled from a single interface.

NEW QUESTION # 26

Huawei CloudLink Box 310/610 ultra-HD videoconferencing endpoints' embedded operating system is HarmonyOS.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

This is a common point of confusion. While Huawei's IdeaHub series (IdeaHub S2, Board 2, etc.) runs on HarmonyOS, the CloudLink Box 310/610 series ultra-HD terminals use a dedicated, proprietary secure embedded operating system (often based on a hardened Linux kernel). This OS is specifically optimized for real-time media processing and high-security communication. While the "look and feel" of the UI (User Interface) has been updated to align with Huawei's modern design language, the underlying OS architecture for these specific hardware codecs is not HarmonyOS.

NEW QUESTION # 27

Which of the following statements about the Wi-Fi Direct projection feature of Huawei IdeaHub S2 is incorrect?

- A. It supports Wi-Fi 5 and Wi-Fi 6
- B. No need to connect to the same Wi-Fi network
- C. Support reverse control
- D. Based on Bluetooth

Answer: D

Explanation:

Wi-Fi Direct Projection (also known as P2P Projection) on the IdeaHub S2 uses Wi-Fi Peer-to-Peer technology to establish a direct high-speed data link between the source device (laptop/phone) and the IdeaHub.

* Why A is incorrect: While Bluetooth may be used for "discovery" (to find the IdeaHub when the user brings a device close to it), the actual projection technology is not based on Bluetooth. Bluetooth does not have the bandwidth required for 4K video transmission.

* Option B is correct: It supports "Touch Back," allowing users to control their PC from the IdeaHub screen.

* Option C is correct: The S2 features a Wi-Fi 6 chip but is backward compatible with Wi-Fi 5.

* Option D is correct: This is the primary advantage of Wi-Fi Direct; the two devices do not need to be on the same corporate LAN or Wi-Fi network.

NEW QUESTION # 28

In addition to OPS, what kinds of external ports can be provided Huawei IdeaHub S2? (Select All that can apply)

- A. Video input interface: 1x HDMI
- B. Audio input port: 1 x 3.5 mm LINE IN
- C. Video output interface: 1x HDMI
- D. Audio output port: 1 x 3.5 mm LINE OUT

Answer: A,B,C,D

Explanation:

The IdeaHub S2 provides a comprehensive set of physical I/O ports on its rear and side panels to support diverse integration needs:

* Audio (A & D): It features a 3.5mm Line In for external microphones or mixers and a 3.5mm Line Out for connecting to external room speakers.

* Video (B & C): It includes at least one HDMI Input for wired projection from a PC and an HDMI Output used for "Double Screen" setups (extending the display to a second monitor/projector) or for recording via an external device.

NEW QUESTION # 29

Which of the following specifications are supported by Huawei CloudLink Bar 310? (Select all that apply)

- A. H.265 HD codec
- B. Microphone array with 8 m sound pickup
- C. Dual-band Wi-Fi (2.4 GHz and 5 GHz)
- D. 12x PTZ optical zoom

Answer: A,B,C

Explanation:

The Huawei CloudLink Bar 310 is an integrated "all-in-one" video conferencing terminal designed for small to medium-sized rooms.

* Codec (A): It supports high-efficiency H.265 (HEVC) coding, which allows for 1080p HD video at significantly lower bandwidths compared to H.264.

* Network (B): It features built-in dual-band Wi-Fi, allowing it to connect to either 2.4 GHz or 5 GHz networks for flexible deployment without wired Ethernet.

* Audio (D): It is equipped with a built-in MEMS microphone array that provides a 8-meter voice pickup radius.

* Camera (C) is incorrect: The Bar 310 uses a fixed-lens wide-angle camera with digital zoom (typically 5x). High-ratio optical zoom like 12x PTZ is found on the Box series (like the Box 310/610) when paired with external cameras like the Camera 200.

NEW QUESTION # 30

.....

The high pass rate of our H19-341_V1.0 exam guide is not only a reflection of the quality of our learning materials, but also shows the professionalism and authority of our expert team on H19-341_V1.0 practice engine. Therefore, we have the absolute confidence to provide you with a guarantee: as long as you use our H19-341_V1.0 Learning Materials to review, you can certainly pass the exam, and if you do not pass the H19-341_V1.0 exam, we will provide you with a full refund.
