Reliable NCP-US Exam Voucher | Reliable NCP-US Exam Bootcamp

As we all know, the influence of NCP-US exam guides even have been extended to all professions and trades in recent years. Passing the NCP-US exam is not only for obtaining a paper certification, but also for a proof of your ability. Most people regard Nutanix certification as a threshold in this industry, therefore, for your convenience, we are fully equipped with a professional team with specialized experts to study and design the most applicable NCP-US exam prepare. We have organized a team to research and study question patterns pointing towards various learners. Our company keeps pace with contemporary talent development and makes every learners fit in the needs of the society. Based on advanced technological capabilities, our NCP-US Study Materials are beneficial for the masses of customers. Our experts have plenty of experience in meeting the requirement of our customers and try to deliver satisfied NCP-US exam guides to them. Our NCP-US exam prepare is definitely better choice to help you go through the test.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q42-Q47):

NEW QUESTION # 42

An administrator successfully installed Objects and was able to create a bucket.

When using the reference URL to access this Objects store, the administrator is unable to write data in the bucket when using an Active Directory account.

Which action should the administrator take to resolve this issue?

- A. Replace SSL Certificates at Objects store level.
- B. Reset Active Directory use's password
- C. Verify sharing policies at buckets level.
- D. Verify Access Keys for the user.

Answer: C

Explanation:

According to Nutanix Objects User Guide¹, "Objects supports Active Directory (AD) authentication for users and groups that are part of an AD domain." However, "To access a bucket using AD credentials, you must have permissions on that bucket." Therefore, the administrator should verify that the sharing policies for the bucket allow access for the AD account.

NEW QUESTION # 43

What are two ways to manage Objects? (Choose two.)

- A. PC
- B. SSH
- C. CLI
- D. API

Answer: A,D

NEW QUESTION # 44

Refer the exhibit.

An administrator is experiencing the following Objects failure error message:

IAM Service is not healthy.

The Object Store Domain entries appear grayed out in the user Interface, as shown in the exhibit.

Which commands should the administrator execute to identify the failure source?

- A. `mspctl_cluster_object`
`mspctl_status -u <UUID- UUID - UUID - UUID >`
- B. `mspctl_cluster_list`
`mspctl_status -u <UUID- UUID - UUID - UUID >`
- C. `mspccli_cluster_list`
`mspccli_status -u <UUID- UUID - UUID - UUID >`
- D. `mspccli_cluster_object`
`mspccli_status -u <UUID- UUID - UUID - UUID >`

Answer: C

Explanation:

The `mspccli_cluster_list` command lists all the existing service domains for the cluster, which can help identify if there is an issue with the Object Store Domain entries. The `mspccli_status` command can be used to get detailed status information on the specified service domain specified by the `<UUID- UUID - UUID - UUID >` parameter.

NEW QUESTION # 45

A company is implementing Files and has these requirements:

Six departments

Each department needs to access its own shared namespace

18,000 users

Given the nature of the workload, the administrator has decided to scale up by adding the maximum amount of vCPU and RAM.

What should the administrator implement to satisfy the stated requirements?

- A. The Administrator should create a standard share.
- B. Six standard shares with 3,000 concurrent sessions.
- C. The administrator should create a distributed share.
- D. Six distributed shares with 3,000 concurrent sessions.

Answer: D

Explanation:

According to Nutanix Files :- Exports and Shares Basics¹, "A distributed share is an SMB share or NFS export that can be hosted by multiple FSVs. A distributed share can handle more concurrent sessions than a standard share." Therefore, the administrator should create six distributed shares for each department to access its own shared namespace and handle 3,000 concurrent sessions.

- [illegible]
