## **NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q187-Q192):**

### **NEW QUESTION # 187**

A common complication of cirrhosis of the liver is prolonged bleeding. The nurse should be prepared to administer?

- A. Vitamin A
- B. Vitamin E
- **C. Vitamin K**
- D. Vitamin C

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

(A) Vitamin C does not directly affect clotting. (B) Vitamin K is a fat-soluble vitamin that depends on liver function for absorption. Vitamin K is essential for clotting. (C) Vitamin E does not directly affect clotting. (D) Vitamin A does not directly affect clotting.

### **NEW QUESTION # 188**

A 14-year-old boy has a head injury with laceration of his scalp over his ear. The nurse should call the physician to report:

- A. Headache that is unresponsive to acetaminophen (Tylenol)
- **B. Temperature rise to 102°F rectally**
- C. Blood pressure increase from 100/80 to 115/85 after lunch
- D. Pulse rate ranges between 68 bpm and 76 bpm

**Answer: B**

Explanation:

Section: Questions Set F

Explanation:

(A) This change in blood pressure may not be significant and does not indicate a widening pulse pressure, a late sign of increased ICP. It is important to continue to monitor for change in blood pressure. (B) Acetaminophen may be ineffective in relieving headache after head injury. Stronger analgesics are contraindicated because they mask neurological signs and may depress the CNS. (C) Pulse rates between 68 bpm and 76 bpm are within normal limits for a 14-year-old child. It is important to monitor for a consistent drop in pulse rate, which is a late sign of increasing ICP. (D) An elevated temperature is abnormal and requires further assessment and medical intervention. The temperature may be unrelated to the head injury, but CNS infection is serious and difficult to control.

### **NEW QUESTION # 189**

A 29-year-old client delivered her fifth child by the Lamaze method and developed a postpartal hemorrhage in the recovery room. What are the initial symptoms of shock that she may experience?

- A. Marked elevation in blood pressure, respirations, and pulse
- B. Decreased systolic pressure, cold skin, and anuria
- C. No urinary output, tachycardia, and restlessness
- **D. Rapid pulse; narrowed pulse pressure; cool, moist skin**

**Answer: D**

Explanation:

Section: Questions Set D

Explanation:

(A) Early shock does not exhibit the symptom of marked elevation in blood pressure. A narrowing of the pulse pressure is indicative of early shock. (B) Anuria is a clinical finding in late shock. (C) All of these clinical findings are congruent with early shock. (D) Absence of urinary output is a clinical finding in the late phase of shock.

#### NEW QUESTION # 190

During an examination, the nurse notes that an infant has diaper rash on the convex surfaces of his buttocks, inner thighs, and scrotum. Which of the following nursing interventions will be most effective in resolving the condition?

- A. Using talcum powder on the inflamed areas to promote drying
- B. Coating the inflamed areas with zinc oxide
- C. Removing the diaper entirely for extended periods of time
- D. Cleaning the inflamed area thoroughly with disposable wet "wipes" at each diaper change

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

(A) Zinc oxide is not usually applied to inflamed areas because it contributes to sweat retention. (B) Talcum powder is of questionable benefit and poses a hazard of accidental inhalation. (C) Removing the diaper and exposing the area to air and light facilitate drying and healing. (D) Infants may be sensitive to one or more agents in the wet "wipes." It is better to simply clean with a wet cloth.

#### NEW QUESTION # 191

A 15-year-old female adolescent is frequently breaking the rules of the unit. She has left the unit and was found smoking in the bathroom and spending a large amount of time in the male ward. Which statement by the nurse would best explain to the teenager why she must follow the rules of the unit?

- A. "It is not easy, but the rules must be followed so that everyone can get a fair chance."
- B. "You are not being fair to the other clients by getting them involved in your deviant behavior."
- C. "If you do not follow the rules, you will be transferred to the closed, locked unit."
- D. "Break the rules, all you want, but don't get caught again!"

**Answer: A**

Explanation:

Explanation

(A) This statement acknowledges that it is difficult but is not threatening or punitive. (B) This statement is threatening and describes specific punishment for further deviant behavior. (C) This response elicits shame by blaming her for involving others. (D) This response gives her permission to break the rules but indicates that getting caught is wrong.
