

NSE5_FNC_AD-7.6 Study Questions - Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Guide Torrent & NSE5_FNC_AD-7.6 Exam Torrent

BTW, DOWNLOAD part of DumpsMaterials NSE5_FNC_AD-7.6 dumps from Cloud Storage: <https://drive.google.com/open?id=1fKAv-qrlPcjwn75WUurr3epMGWesLjEa>

So we can say that the NSE5_FNC_AD-7.6 practice questions are the top-notch Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) dumps that will provide you with everything that you must need for instant Fortinet NSE5_FNC_AD-7.6 exam preparation. Take the right decision regarding your quick Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) exam questions preparation and download the real, valid, and updated NSE5_FNC_AD-7.6 exam dumps and start this journey.

If you are not satisfied with the function of PDF version which just only provide you the questions and answers, the APP version of NSE5_FNC_AD-7.6 exam cram materials can offer you more. APP version can not only simulate the real test scene but also point out your mistakes and notice you to practice many times. This version of Fortinet NSE5_FNC_AD-7.6 Exam Cram materials is rather powerful. If you are willing, you can mark your performance every day and adjust your studying and preparation relatively. NSE5_FNC_AD-7.6 exam cram materials will try our best to satisfy your demand.

Reliable NSE5_FNC_AD-7.6 Test Pass4sure & Latest NSE5_FNC_AD-7.6 Dumps Free

The PDF version of our NSE5_FNC_AD-7.6 study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our NSE5_FNC_AD-7.6 question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our NSE5_FNC_AD-7.6 exam torrent. Maybe you think it does not prove the practicality of the PDF version, do not worry, we are going to tell us another special function about the PDF version of our NSE5_FNC_AD-7.6 Study Tool. If you download our study materials successfully, you can print our study materials on pages by the PDF version of our NSE5_FNC_AD-7.6 exam torrent. We believe these special functions of the PDF version will be very useful for you to prepare for your exam. We

hope that you will like the PDF version of our NSE5_FNC_AD-7.6 question torrent.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q68-Q73):

NEW QUESTION # 68

An administrator manages a corporate environment where all users log into the corporate domain each time they connect to the network. The administrator wants to leverage login scripts to use a FortiNAC-F agent to enhance endpoint visibility. Which agent can be deployed as part of a login script?

- A. Passive
- **B. Dissolvable**
- C. Persistent
- D. Mobile

Answer: B

Explanation:

The dissolvable agent is designed to be executed at user login and does not require permanent installation on the endpoint. This makes it suitable for deployment through domain login scripts, where it can run temporarily to collect endpoint posture and visibility information and then remove itself after execution.

NEW QUESTION # 69

How can an administrator configure FortiNAC-F to normalize incoming syslog event levels across vendors?

- **A. Configure severity mappings.**
- B. Configure event to alarm mappings.
- C. Configure the vendor OUI settings.
- D. Configure the security rule settings.

Answer: A

Explanation:

FortiNAC-F serves as a central manager for security events originating from a diverse ecosystem of third-party security appliances, such as FortiGate, Check Point, and Cisco. Each vendor utilizes its own internal scale for severity levels within syslog messages (e.g., Check Point uses a 1-7 scale, while others may use 0-255). To provide a consistent response regardless of the source, FortiNAC-F uses Severity Mappings to normalize these incoming values.

According to the FortiNAC-F Administration Guide, severity mappings allow the administrator to translate vendor-specific threat levels into standardized FortiNAC Security Levels (such as High, Medium, or Low Violation). When a syslog message arrives, the parser extracts the vendor's severity code, and the system immediately references the Security Event Severity Level Mappings table to determine how that event should be categorized internally. This normalization is vital because it allows a single Security Alarm to be configured to respond to any "High Violation" event, whether it was reported as a "Critical" by one vendor or a "Level 5" by another.

Without these mappings, the administrator would have to create separate, redundant security rules for every vendor to account for their different naming conventions and numerical scales.

"Each vendor defines its own severity levels for syslog messages. The following table shows the equivalent FortiNAC security level.. To normalize these events, configure the Severity Level Mappings found in the device integration guides. This allows FortiNAC to generate a consistent security event that can then trigger an alarm regardless of the reporting vendor's specific terminology."

NEW QUESTION # 70

During an evaluation of state-based enforcement, an administrator discovers that ports that should not be under enforcement have been added to enforcement groups.

In which view would the administrator be able to identify who added the ports to the groups?

- A. The Event Management view
- **B. The Admin Auditing view**
- C. The Port Changes view

- D. The Security Events view

Answer: B

Explanation:

In FortiNAC-F, accountability and forensic tracking of configuration changes are managed through the Admin Auditing functionality. When an administrator performs an action that modifies the system state--such as creating a policy, changing a device's status, or adding a switch port to an Enforcement Group--the system generates an audit record. This record is essential for troubleshooting scenarios where unauthorized or accidental configuration changes have occurred, leading to unintended network behavior.

The Admin Auditing view (found under Logs > Admin Auditing) provides a comprehensive log of the "Who, What, and When" for every administrative session. Each entry includes the username of the administrator, the source IP address from which they accessed the FortiNAC-F console, a precise timestamp, and a detailed description of the modification. In the scenario described, where port have been incorrectly added to enforcement groups, the Admin Auditing view allows a supervisor to filter by the specific "Port" or "Group" object to identify exactly which administrator executed the command.

NEW QUESTION # 71

Which two statements are true about integrating a third-party device using SNMP traps from that device as input to generate an event? (Choose two.)

- A. The IP address OID and MAC address OID must be configured in the trap MIB file.
- B. set allowaccess snmp must be configured using the CLI on the FortiNAC-F receiving interface.
- C. The sending device must be modeled in the inventory topology.
- D. The sending device must support SNMPv3.

Answer: A,C

Explanation:

The sending device must be modeled so FortiNAC-F can associate the incoming trap source with a known managed element and process it correctly. The trap definition must include the OIDs that carry the endpoint identifiers (IP and MAC) so FortiNAC-F can extract that data from the trap payload and generate the intended event.

NEW QUESTION # 72

As part of a FortiNAC-F integration with FortiGate for management of VPN users, what must be configured on FortiGate to keep FortiNAC-F up to date with VPN session information?

- A. RADIUS accounting
- B. Security Fabric integration
- C. Syslog messages
- D. SNMP traps

Answer: A

Explanation:

RADIUS accounting must be enabled on FortiGate so it sends session start and stop records to FortiNAC-F. These accounting messages provide real-time VPN session status updates, allowing FortiNAC-F to track user connections and enforce appropriate network access policies.

NEW QUESTION # 73

.....

This age changes quickly, so we can't be passively, we should be actively to follow the age. When you choose to participate in NSE5_FNC_AD-7.6 exam, you are proved to be an active person who wants better development opportunities for yourself. Our DumpsMaterials is willing to help those active people like you to achieve their goals. The most comprehensive and Latest NSE5_FNC_AD-7.6 Exam Materials provided by us can meet all your need to prepare for NSE5_FNC_AD-7.6 exam
