

OGBA-101考題資源 -新版OGBA-101題庫

Top 5 Facts to Rely on Open Group OGBA-101 Practice Tests

1. You get the actual Open Group OGBA-101 exam experience.

2. Time management becomes easy during the actual exam.

3. Valuable insights offer more improvement scope.

4. Rigorous Practice Makes you perfect about Open Group OGBA-101 syllabus domains.

5. Self-assessment provides self-satisfaction regarding the OGBA-101 exam preparation.

從Google Drive中免費下載最新的VCESoft OGBA-101 PDF版考試題庫：https://drive.google.com/open?id=1djHnyG_nLWhsmAKihHOIG_gnO2wv5Z8

你想过怎么样才能更轻松地通过The Open Group的OGBA-101认证考试吗？你发现诀窍了吗？如果你不知道怎么办的话，我来告诉你。其實通過考試的方法有很多種。努力學習考試要求的所有的相關知識就是其中的一種方法。你現在正在這樣做嗎？但是這是浪費時間並且很可能得不到預期的效果的方法。而且，每天都忙於工作的你恐怕沒有那麼多時間來準備考試吧？那麼試一下VCESoft的OGBA-101考古題吧。這個資料絕對可以讓你得到你想不到的成果。

The Open Group OGBA-101 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Key Terminologies: The focal point of this TOGAF Business Architecture Foundation exam topic is about key terminologies of the Business Architecture.
主題 2	<ul style="list-style-type: none">Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.

主題 3	<ul style="list-style-type: none"> TOGAF ADM: This topic of the OGBA-101 exam gives TOGAF business architects an introduction to the TOGAF ADM, its objectives, and usage.
主題 4	<ul style="list-style-type: none"> TOGAF Business Scenario method: The focal point of this OGBA-101 exam topic is the application of the TOGAF Business Scenario method.

新版OGBA-101題庫 - 最新OGBA-101考古題

對於為了進入大中型IT公司的畢業生來說，不想花費太多的錢去補習，只能借助於最新的 VCESoft OGBA-101 考題準備考試，因為這類考題在網路中的價錢不是很高。我們會持續不斷從世界各地使用者在他們的地區參加 The Open Group 考試而獲得回饋，輕鬆的了解最新考試資訊，及時的更新 OGBA-101 題庫，這使我們的其他用戶可以共用這些考試資訊，參加考試更有信心！這是通過 OGBA-101 考試最有效的方法之一。

最新的 TOGAF Business Architecture Foundation OGBA-101 免費考試真題 (Q119-Q124):

問題 #119

Consider the following:

You need to analyze a new value stream within the scope of a project.

Which of the following would you use?

- A. An organization chart showing the business units that work with the enterprise and their value.
- B. Heat mapping by value stream stages.**
- C. Converting the value stream stages to entities and then building a logical data model
- D. Combining information mapping with a business process model.

答案: B

解題說明:

In TOGAF and other enterprise architecture practices, analyzing a value stream often involves understanding the various stages of the value stream and assessing how each stage contributes to business value. Heat mapping is a commonly used technique to visualize and analyze these stages, making it the most appropriate choice in this context.

* Understanding Value Streams in TOGAF: A value stream represents a high-level view of how value is delivered to customers or stakeholders. It encompasses all the activities necessary to achieve a specific outcome, often broken down into stages. In TOGAF's Business Architecture, value stream mapping is a key activity for analyzing and understanding these value stages, enabling architects to identify areas for improvement.

* Heat Mapping as an Analysis Technique: Heat mapping by value stream stages is a visualization technique that highlights the effectiveness or performance of each stage in the value stream. By applying a heat map, architects can easily see which stages are performing well (often marked in "cool" colors) and which stages may need improvement (often marked in "hot" colors). This is particularly useful for identifying bottlenecks, redundancies, or inefficiencies within the value stream, which is essential for project analysis.

* Why Other Options are Incorrect:

* Option A (Converting value stream stages to entities and building a logical data model):

Building a logical data model involves defining data entities and their relationships, which is more relevant for data architecture. It does not directly contribute to analyzing a value stream's stages or performance within a project scope.

* Option C (An organization chart showing business units and their value): An organization chart shows hierarchical relationships and roles within the enterprise, which does not specifically address value stream stages. While it may help understand which units are responsible for different parts of the value stream, it doesn't provide insight into the performance or effectiveness of each stage.

* Option D (Combining information mapping with a business process model): Information mapping with a business process model is more suited for detailed process analysis. It involves mapping information flows within processes but doesn't directly address analyzing value stream stages. Value streams are typically at a higher level than detailed business processes, focusing more on outcomes than specific activities.

* Conclusion: Heat mapping by value stream stages (Option B) is the most effective tool for analyzing a new value stream within the project scope, as it provides a visual assessment of each stage's performance and identifies areas for improvement.

問題 #120

Question: Which ADM Phases match the following purpose descriptions?

- A. 1 Phase C - 2 Phase E - 1 Phase H - 4 Phase C
- B. 1 Phase D - 2 Phase B - 3 Phase G - 4 Phase A
- C. 1 Phase C - 2 Phase F - 3 Phase G- 4 Phase D
- D. 1 Phase C - 2 Phase F - 3 Phase H - 4 Phase B

答案: C

解題說明:

The ADM Phases that match the purpose descriptions provided are: Phase C for the development of Information Systems Architectures to support the agreed Architecture Vision, Phase F for addressing the move from the Baseline to the Target Architectures by finalizing a detailed Implementation and Migration Plan, Phase G for providing architectural oversight of the implementation, and Phase D for describing the development of the Technology Architecture to support the agreed Architecture Vision.

問題 #121

Consider the following output from Phase A:

What is this an example of?

- A. Value Stream Map
- B. Organization Map
- C. Capability Map
- D. Process Map

答案: C

解題說明:

The diagram provided illustrates a Capability Map. Here's why:

- * Focus on "what" the organization does: The diagram depicts various functions and activities that the organization performs, such as "Program/Human Resource Matching," "Employee Supply and Demand Mgmt," "Benefits Management," etc. These represent the capabilities of the organization, or what it is able to do.
- * Hierarchical structure: The capabilities are organized hierarchically, with broader functions like "HR Mgmt." encompassing more specific capabilities like "Position Advertising" and "Skills Assessment." This shows how different capabilities relate to each other and contribute to higher-level functions.
- * No specific process flow: Unlike a process map or value stream map, this diagram doesn't show a sequence of steps or flow of activities. It focuses on the capabilities themselves, not how they are executed

問題 #122

Which of the following best describes a benefit of business models?

- A. They can be used to resolve conflicts amongst different stakeholders.
- B. They highlight what the business does without the need to explain why.
- C. They can be used to calculate detailed cost estimates.
- D. They provide a different viewpoint to cross-check assumptions.

答案: D

解題說明:

Business models are essential tools within TOGAF for providing different perspectives on the business operations, strategies, and value propositions. Here's a detailed explanation:

Purpose of Business Models:

Business models are designed to represent various aspects of the business, such as value creation, delivery, and capture mechanisms. They provide a structured way to analyze and understand the business.

Different Viewpoint:

Cross-Check Assumptions: Business models offer a different viewpoint that helps in validating and cross-checking assumptions made about the business. By presenting a visual and structured representation of the business, these models enable stakeholders to identify gaps, inconsistencies, and areas that need further analysis.

Holistic Understanding: They help in gaining a holistic understanding of how different components of the business interact, which is crucial for ensuring that the enterprise architecture aligns with the business strategy and goals.

TOGAF Reference:

Phase A: Architecture Vision: During this phase, business models are used to articulate the vision and scope of the architecture effort. They help in ensuring that all assumptions are validated and that the architecture aligns with business objectives.

Phase B: Business Architecture: Business models are also utilized in this phase to analyze business capabilities, processes, and value streams. They provide a different viewpoint that aids in identifying areas for improvement and ensuring alignment with the strategic intent.

In summary, business models provide a different viewpoint that helps cross-check assumptions, ensuring that the enterprise architecture is aligned with the business strategy and objectives.

問題 #123

Consider the diagram of an architecture development cycle.

Which description matches the phase of the ADM labeled as item 2?

- A. Conducts Implementation planning for the architecture defined in previous phases
- B. Operates the process of managing architecture requirements
- C. Provides architectural oversight for the implementation
- D. Establishes procedures for managing change to the new architecture

答案: C

解題說明:

The Architecture Development Method (ADM) is the core process of TOGAF which outlines a method for developing and managing the lifecycle of enterprise architecture. Considering the phases of the ADM, the item labeled as '2' in the provided architecture development cycle diagram likely corresponds to the

'Architecture Change Management' phase, which is responsible for providing ongoing architectural oversight and guidance to ensure that the implementation remains aligned with the architecture defined in the previous phases. This includes managing changes to the architecture in a controlled manner as the implementation progresses and ensuring that the architecture continues to meet the business needs.
