Salesforce Certified Tableau Data Analyst Sample Questions (Q126-Q131):

NEW QUESTION # 126

From Tableau Desktop you sign in to a Tableau Server site.

What appears in the list of available data sources when you search for a published data source?

- A. All the data sources published to the Tableau Server within the folders to which you have access
- B. All the data sources published to the site
- **C. All the data sources published to the site within the folders to which you have access**
- D. All the data sources published to the Tableau Server

Answer: C

Explanation:

When you sign in to a Tableau Server site from Tableau Desktop and search for a published data source, you will see all the data sources published to the site within the folders to which you have access. You will not see data sources published to other sites or folders that you do not have permission to view. You can also filter your search by project, owner, or tag. References:

[/connect_basic.htm](https://help.tableau.com/current/pro/desktop/en-us/connect_tableauserver.htm) https://help.tableau.com/current/pro/desktop/en-us/connect_tableauserver.htm When signed in to Tableau Server from Tableau Desktop, you'll only be able to see the data sources that have been published to the site and are within the folders that you have been granted access to. Tableau's permission and project structure mean that you won't see all data sources from the entire server unless you have permissions to do so.

NEW QUESTION # 127

You have a database that includes field named sales, City and Region.

You have the following chart that shows the number of sales made in different cities.

You want to dynamically show the corresponding region when users hover their mouse over any of the bars. What should you do?

- A. Right-click a bar in the chart select Mark Label and then select Always show.
- B. Edit the aliases for City.
- **C. Drag Region to Tooltip on the Marks card**
- D. Right-click a in the chat, select Annotate and then select Mark.

Answer: C

Explanation:

To show the corresponding region when users hover their mouse over any of the bars, you need to drag Region to Tooltip on the Marks card. This will add Region as a field in the tooltip text that appears when users hover over a mark. You can also customize

the tooltip text by editing it in the Tooltip dialog box.
