Intereactive Juniper JN0-481 Testing Engine | JN0-481 Valid Exam Materials

2026 Latest Test4Sure JN0-481 PDF Dumps and JN0-481 Exam Engine Free Share: https://drive.google.com/open?id=1-KrUMGPlvJUMbffTcVvtqf_6KGC1o3qp

The JN0-481 torrent prep contains the real questions and simulation questions of various qualifying examinations. It is very worthy of study efficiently. Time is constant development, and proposition experts will set questions of real JN0-481 exam continuously according to the progress of the society change tendency of proposition, and consciously highlight the hot issues and policy changes. In order to be able to better grasp the proposition thesis direction, the JN0-481 study question focus on the latest content to help you pass the JN0-481 exam.

Let me introduce our JN0-481 study guide to you in some aspects. First of all, there are three versions of JN0-481 guide quiz. You can choose the most suitable version based on your own schedule. PC version, PDF version and APP version, these three versions of JN0-481 Exam Materials have their own characteristics you can definitely find the right one for you. Secondly, you can find that our price of the JN0-481 learning braindumps is quite favorable. And some times, we will give discounts for them.

Juniper JN0-481 Valid Exam Materials | Official JN0-481 Study Guide

Therefore, keep checking the updates frequently to avoid any stress regarding the Data Center, Specialist (JNCIS-DC) JN0-481 certification exam. All your endeavors can turn to dust if you prepare as per the old content. The facilitating measures by Test4Sure do not halt here. You will get Juniper JN0-481 updates until 365 days after purchasing the JN0-481 practice exam material.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q25-Q30):

NEW QUESTION # 25
A member of your organization made changes to a predefined interface map using Juniper Apstra. Which two statements are correct in this scenario? (Choose two.)

- A. Changes to interface maps in the global catalog do not affect interface maps that have already been imported into blueprint

- B. Changes made to predefined interface maps will not have an impact on the Apstra software.
- C. Changes to interface maps in the global catalog will raise anomalies that may need to be addressed at the next commit.
- D. Any changes made to predefined interface maps are discarded when Apstra is upgraded.

Answer: A,D

Explanation:
An interface map is a configuration template that maps interfaces between logical devices and physical hardware devices (represented with device profiles) while adhering to vendor specifications. An interface map can be either predefined or custom. A predefined interface map is one that ships with Apstra software and supports most qualified Juniper devices. A custom interface map is one that is created by the user to meet specific requirements. An interface map can be stored in either the global catalog or the blueprint catalog. The global catalog contains all the interface maps that are available for use in any blueprint. The blueprint catalog contains the interface maps that are imported from the global catalog and used in a specific blueprint.

NEW QUESTION # 26
Referring to the exhibit, how many broadcast domains will an Ethernet frame pass through when traversing the IP fabric from Server A to Server B?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
Referring to the exhibit, the image shows a simplified diagram of an IP fabric network connecting two servers, labeled as Server A and Server B. The IP fabric is a network architecture that uses a Clos topology to provide high bandwidth, low latency, and scalability for data center networks.
The IP fabric consists of spine and leaf devices that use BGP as the routing protocol and VXLAN as the overlay technology.
A broadcast domain is a logical portion of a network where any device can directly transmit broadcast frames to other devices at the data link layer (OSI Layer 2). A broadcast frame is a frame that has a destination MAC address of all ones (FF:FF:FF:FF:FF:FF), which means that it is intended for all devices in the same broadcast domain. A broadcast domain is usually bounded by a router, which does not forward broadcast frames to other networks.
In the exhibit, there are two broadcast domains that an Ethernet frame will pass through when traversing the IP fabric from Server A to Server B. The first broadcast domain is the one that contains Server A and the leaf device that it is connected to. The second broadcast domain is the one that contains Server B and the leaf device that it is connected to. The IP fabric itself is not a broadcast domain, because it uses IP routing and VXLAN encapsulation to transport the Ethernet frames over the Layer 3 network.

NEW QUESTION # 27
Referring to the exhibit, what is the minimum information you must add to create a new routing zone?

- A. VRF Name only
- B. VRF Name and Routing policies
- C. VRF Name, VLAN ID, VNI, Routing Policies
- D. VRF Name, VLAN ID. And VNI

Answer: D

Explanation:
To create a new routing zone, you must specify the VRF Name, VLAN ID, and VNI for the routing zone. These are the mandatory fields in the user interface shown in the exhibit. The VRF Name is the name of the L3 domain that isolates the IP traffic of the routing zone from other routing zones.
The VLAN ID is the identifier for the VLAN tagged Layer 3 links on external connections. The VNI is the VxLAN Network Identifier associated with the routing zone. The Routing Policies are optional fields that allow you to configure import and export route targets for the routing zone.
These are only applicable for EVPN routing zones, which use MP-EBGP as the overlay control protocol.

NEW QUESTION # 28

You want to apply a configlet to a specific device using Juniper Apstra. Which two parameters would be used to accomplish this task? (Choose two.)

- A. hostname
- B. tags
- C. form factor
- D. port group

Answer: A,B

Explanation:

To apply a configlet to a specific device using Juniper Apstra, you need to specify the device's hostname and tags. The hostname is the unique identifier of the device in the Apstra system, and the tags are the labels that you can assign to the device to group it with other devices that share the same characteristics. You can use the hostname and tags to filter the devices that you want to apply the configlet to in the blueprint catalog.

NEW QUESTION # 29

Which statement about Juniper Apstra role-based access control is correct?

- A. The viewer role is predefined and can be deleted.
- B. The administrator role is the only predefined role.
- C. The user role can create roles.
- D. The administrator role can see all permissions.

Answer: D

Explanation:

Juniper Apstra role-based access control (RBAC) is a feature that allows you to specify access permissions for different users based on their roles. RBAC servers are remote network servers that authenticate and authorize network access based on roles assigned to individual users within an enterprise. Juniper Apstra has four predefined user roles: administrator, device_ztp, user, and viewer. The administrator role is the most powerful role, and it can see all permissions and perform all actions in the Apstra software application. The administrator role can also create, clone, edit, and delete user roles, except for the four predefined user roles, which cannot be modified. Therefore, the statement that the administrator role can see all permissions is correct.

NEW QUESTION # 30

......

Dear everyone, you can download the JN0-481 free demo for a little try. If you are satisfied with the JN0-481 exam torrent, you can make the order and get the latest JN0-481 study material right now. Our JN0-481 training material comes with 100% money back guarantee to ensure the reliable and convenient shopping experience. The accurate, reliable and updated Juniper JN0-481 study torrent are compiled, checked and verified by our senior experts, which can ensure you 100% pass.

JN0-481 Valid Exam Materials: https://www.test4sure.com/JN0-481-pass4sure-vce.html

All of these are the newest JN0-481 training materials: Data Center, Specialist (JNCIS-DC), which are supportive to your printing request and being operative on any digital device, As an employee, you are able to require more payment with the JN0-481 Valid Exam Materials certification, Juniper Intereactive JN0-481 Testing Engine As you can see, we really take our customers into account, Here, JN0-481 latest exam dumps can meet the requirement of you.

How to get an appointment with the people who have JN0-481 the power to actually hire you, They may not have to match a real skeleton exactly, All of these are the newest JN0-481 Training Materials: Data Center, Specialist (JNCIS-DC), which are supportive to your printing request and being operative on any digital device.

100% Pass 2026 Juniper Professional Intereactive JN0-481 Testing Engine

As an employee, you are able to require more payment with the JNCIS-DC certification, As you can see, we really take our

customers into account, Here, JN0-481 latest exam dumps can meet the requirement of you.

Our Juniper JN0-481 test braindumps offer many advantages, the first and foremost of which is its comprehensive content.
