

# AWS-Solutions-Architect-Professional Reliable Test Cost & AWS-Solutions-Architect-Professional Latest Test Fee

**Amazon (AWS) Certification Details**

**AWS Certified Solutions Architect Professional (SAP-C01)**

<b>Prior Certification</b> Not Required	<b>Exam Validity</b> 3 Years	<b>Exam Fee</b> \$300 USD
<b>Exam Duration</b> 180 minutes	<b>No. of Questions</b> 75	<b>Passing Marks</b> 75-80%
<b>Recommended Experience</b> 2+ years of experience designing & deploying cloud architecture on AWS	<b>Exam Format</b> Multiple Choice & Multiple Select	
<b>Languages</b> English, French, German, Italian, Japanese, Korean, Portuguese, Simplified Chinese, and Spanish		

P.S. Free 2026 Amazon AWS-Solutions-Architect-Professional dumps are available on Google Drive shared by Pass4cram: <https://drive.google.com/open?id=1gkXCf2ghYh4H2Se2DmFSwjrRwRAZz2JIC>

We should admit that gaining the AWS-Solutions-Architect-Professional test certification will bring your some benefits. You may get a good opportunity in the job interview due to your Amazon AWS-Solutions-Architect-Professional exam certification. You may have a promotion in your present job and get a considerable salary. So, no matter how difficult it is, many IT candidates still choose to take the AWS-Solutions-Architect-Professional exam test. Pass4cram Amazon latest practice exam test may contribute to your AWS-Solutions-Architect-Professional Exam Preparation. We have three different versions for you to choose, the PDF, PC Test Engine, Online Test Engine. You can choose the proper version according to your actual condition. Amazon AWS-Solutions-Architect-Professional exam torrents are valid and useful which can ensure you 100% pass in the actual test.

Amazon AWS-Solutions-Architect-Professional certification exam is designed for professionals who want to demonstrate their expertise in designing and deploying scalable, highly available, and fault-tolerant systems on the AWS platform. AWS Certified Solutions Architect - Professional certification is intended for experienced solutions architects who have already obtained the AWS Certified Solutions Architect-Associate certification and want to take their skills to the next level. The AWS-Solutions-Architect-Professional Certification validates the candidate's ability to design and manage complex AWS solutions in real-world scenarios.

## Cost-Effective and Updated Amazon AWS-Solutions-Architect-Professional Dumps Practice Material

The Amazon AWS-Solutions-Architect-Professional practice exam software also has a feature to track all of the scores you earned this whole time. If your scores don't seem to be satisfying, we encourage you to repeat the learning process and then take another session of Amazon AWS-Solutions-Architect-Professional practice exam questions simulation. As explained before, the AWS-Solutions-Architect-Professional practice Q&A comes in two different formats. The installable one is installable on any Windows computer without requiring an internet connection. Amazon AWS-Solutions-Architect-Professional Practice exam software allows you to take the tests multiple times without any recurring questions. At the end of every AWS-Solutions-Architect-Professional Practice Test, you will see your score on the screen. Whenever there is a change in the Amazon AWS-Solutions-Architect-Professional exam syllabus our subject matter experts updates the Amazon exam questions according to it. The sooner you start preparing, the higher your chance to excel on your AWS Certified Solutions Architect - Professional AWS-Solutions-Architect-Professional exam. Don't gamble your future. Get a grab on the Amazon AWS-Solutions-Architect-Professional braindumps questions for the AWS Certified Solutions Architect - Professional exam to boost your career!.

## Amazon AWS Certified Solutions Architect - Professional Sample Questions (Q129-Q134):

### NEW QUESTION # 129

A company wants to send data from its on-premises systems to Amazon S3 buckets. The company created the S3 buckets in three

different accounts. The company must send the data privately without the data traveling across the internet. The company has no existing dedicated connectivity to AWS. Which combination of steps should a solutions architect take to meet these requirements? (Select TWO.)

- A. Establish a networking account in the AWS Cloud. Create a private VPC in the networking account. Peer VPCs from the accounts that host the S3 buckets with the VPC in the network account.
- B. Establish a networking account in the AWS Cloud. Create a private VPC in the networking account. Set up an AWS Direct Connect connection with a public VIF between the on-premises environment and the private VPC.
- C. Create an Amazon S3 gateway endpoint in the networking account.
- **D. Establish a networking account in the AWS Cloud. Create a private VPC in the networking account. Set up an AWS Direct Connect connection with a private VIF between the on-premises environment and the private VPC.**
- **E. Create an Amazon S3 interface endpoint in the networking account.**

**Answer: D,E**

### NEW QUESTION # 130

A company has a legacy monolithic application that is critical to the company's business. The company hosts the application on an Amazon EC2 instance that runs Amazon Linux 2. The company's application team receives a directive from the legal department to back up the data from the instance's encrypted Amazon Elastic Block Store (Amazon EBS) volume to an Amazon S3 bucket. The application team does not have the administrative SSH key pair for the instance. The application must continue to serve the users. Which solution will meet these requirements?

- A. Create an image of the instance. Launch a new EC2 instance from the image. Attach a role to the new instance with permission to write to Amazon S3. Run a command to copy data into Amazon S3.
- **B. Attach a role to the instance with permission to write to Amazon S3. Use the AWS Systems Manager Session Manager option to gain access to the instance and run commands to copy data into Amazon S3.**
- C. Create an image of the instance with the reboot option turned on. Launch a new EC2 instance from the image. Attach a role to the new instance with permission to write to Amazon S3. Run a command to copy data into Amazon S3.
- D. Take a snapshot of the EBS volume by using Amazon Data Lifecycle Manager (Amazon DLM). Copy the data to Amazon S3.

**Answer: B**

### NEW QUESTION # 131

A company is migrating its on-premises systems to AWS. The user environment consists of the following systems:

\* Windows and Linux virtual machines running on VMware.

\* Physical servers running Red Hat Enterprise Linux.

The company wants to be able to perform the following steps before migrating to AWS:

\* Identify dependencies between on-premises systems.

\* Group systems together into applications to build migration plans.

\* Review performance data using Amazon Athena to ensure that Amazon EC2 instances are right-sized.

How can these requirements be met?

- A. Populate the AWS Application Discovery Service import template with information from an on-premises configuration management database (CMDB). Upload the completed import template to Amazon S3, then import the data into Application Discovery Service.
- B. Install the AWS Application Discovery Service Discovery Agent on each of the on-premises systems. Allow the Discovery Agent to collect data for a period of time.
- C. Install the AWS Application Discovery Service Discovery Agent on the physical on-premise servers. Install the AWS Application Discovery Service Discovery Connector in VMware vCenter. Allow the Discovery Agent to collect data for a period of time.

- **D. Install the AWS Application Discovery Service Discovery Connector on each of the on-premises systems and in VMware vCenter. Allow the Discovery Connector to collect data for one week.**

**Answer: D**

#### NEW QUESTION # 132

A solutions architect is designing a solution that consists of a fleet of Amazon EC2 Reserved Instances (RIs) in an Auto Scaling group that will grow over time as usage increases. The solution needs to maintain 80% RI coverage to maintain cost control with an alert to the DevOps team using an email distribution list when coverage drops below 30%. The solution must also include the ability to generate a report to easily track and manage coverage. The company has a policy that allows only one workload for each AWS account. Which set of steps should the solutions architect take to create the report and alert the DevOps team?

- A. Create an Amazon Simple Notification Service (Amazon SNS) topic and subscribe the DevOps email distribution list. Enable cost allocation tags and ensure instances populate a customer-managed cost allocation tag at startup. Use the AWS Billing and Cost Management console to create a budget for RI coverage, filter using the customer-managed cost allocation tag and set the threshold to 80% and link to the SNS topic created in the alert configuration.
- B. Enable cost allocation tags and ensure instances populate a customer-managed cost allocation tag at startup. Use the Cost Explorer console to configure the report for RI coverage, filter using the customer-managed cost allocation tag and set the threshold to 80% and enter the email distribution list in the alert configuration.
- C. Use the AWS Billing and Cost Management console to create a reservation budget for RI utilization, set the utilization to 80% and enter the email distribution list in the alert configuration.
- **D. Create an Amazon Simple Notification Service (Amazon SNS) topic and subscribe the DevOps email distribution list. Use the Cost Explorer console to configure the report for RI utilization, set the utilization target to 30% and link to the SNS topic created in the alert configuration.**

**Answer: D**

#### NEW QUESTION # 133

A mobile application serves scientific articles from individual files in an Amazon S3 bucket. Articles older than 30 days are rarely read. Articles older than 60 days no longer need to be available through the application, but the application owner would like to keep them for historical purposes. Which cost-effective solution BEST meets these requirements?

- A. Create a Lambda function to move files older than 30 days to Amazon EBS and move files older than 60 days to Amazon Glacier.
- **B. Create lifecycle rules to move files older than 30 days to Amazon S3 Standard Infrequent Access and move files older than 60 days to Amazon Glacier.**
- C. Create a Lambda function to move files older than 30 days to Amazon Glacier and move files older than 60 days to Amazon EBS.
- D. Create lifecycle rules to move files older than 30 days to Amazon Glacier and move files older than 60 days to Amazon S3 Standard Infrequent Access.

**Answer: B**

#### NEW QUESTION # 134

.....

Comfortable life will demoralize and paralyze you one day. So you must involve yourself in meaningful experience to motivate yourself. For example, our AWS-Solutions-Architect-Professional study materials perhaps can become your new attempt. In fact, learning our AWS-Solutions-Architect-Professional learning quiz is a good way to inspire your spirits. Not only that you can pass the exam and gain the according AWS-Solutions-Architect-Professional certification but also you can learn a lot of knowledge and skills on the subject.
