

NS0-901 Latest Guide Files | Exam NS0-901 Quick Prep

P.S. Free & New NS0-901 dumps are available on Google Drive shared by FreePdfDump: https://drive.google.com/open?id=1_TMQfUduXSXDT7yhxiTM04UY79tFWYk

Undoubtedly, passing the Network Appliance NS0-901 Certification Exam is one big achievement. Regardless of how tough the NetApp Certified AI Expert Exam (NS0-901) exam is, it serves an important purpose of improving your skills and knowledge of a specific field. Once you become certified by Network Appliance, a whole new career scope will open up to you.

It is an incredible opportunity among all candidates fighting for the desirable exam outcome to have our NS0-901 practice materials. With the help of our hardworking experts, our NS0-901 exam braindumps have been on the front-front of this industry and help exam candidates around the world win in valuable time. With years of experience dealing with exam, they have thorough grasp of knowledge which appears clearly in our NS0-901 Actual Exam. To choose us is to choose success!

Exam NS0-901 Quick Prep, Certificate NS0-901 Exam

FreePdfDump releases a new high pass-rate NS0-901 valid exam preparation recently. If you are still puzzled by your test you can set your heart at rest to purchase our valid exam materials which will assist you to clear exam easily. We can guarantee purchasing Network Appliance NS0-901 Valid Exam Preparation will be the best passing methods and it always help you pass exam at first attempt. Now it is really an opportunity. Stop waiting and hesitate again!

Network Appliance NetApp Certified AI Expert Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76

The architect needs to design an efficient data flow to move curated training sets from the central StorageGRID data lake to the high-performance NetApp ASA system used by the AI cluster. The process must be manageable from a single interface and should be automatable. Which two NetApp technologies should be used to implement this data pipeline stage? (Choose 2.)

- A. A custom Python script using the NetApp DataOps Toolkit to trigger the data movement.
- B. NetApp BlueXP copy and sync service to create and manage the data synchronization relationship between the S3 source and the NFS/CIFS destination.
- C. A manual copy process using an S3 client on a bastion host.
- D. NetApp FabricPool to automatically tier the data from StorageGRID to the ASA.
- E. NetApp SnapMirror to replicate data from the StorageGRID object store to the ASA's file system.

Answer: A,B

NEW QUESTION # 77

Which of the following platforms can be used to manage containerized AI workloads on Kubernetes? (Choose two)

- A. KubeFlow
- B. Google VertexAI
- C. RunAI
- D. TensorFlow Extended

Answer: A,C

NEW QUESTION # 78

A new team of external auditors requires read-only access to the raw financial product documentation stored in the StorageGRID data lake. The data is in a bucket named 'prod-docs'.

The security team must ensure the auditors can list and read objects but cannot write, delete, or modify any data. Which is the most appropriate method to grant this specific access?

- A. Create a new group and user within StorageGRID, and attach an S3 group policy that explicitly allows only 's3:GetObject' and 's3:ListBucket' actions on the 'prod-docs' bucket.
- B. Provide the auditors with the root access keys for the StorageGRID system.
- C. Create a new StorageGRID tenant account for the auditors with full S3 access.
- D. Configure an NFS export policy on the 'prod-docs' bucket and provide the auditors with the mount path.

Answer: A

NEW QUESTION # 79

A research institute is designing an infrastructure to support its entire AI drug discovery pipeline.

The pipeline has two distinct workload requirements:

1. Training: A team of data scientists needs to train several large transformer models simultaneously using a 500 TB dataset of genomic sequences. This process requires maximum data throughput to keep the GPUs saturated.
2. Inference: Once trained, the models are deployed to an internal web portal where researchers submit individual protein sequences for analysis. These queries must return results with the lowest possible latency.

Which infrastructure design best satisfies both requirements? (Choose 2.)

- A. Use a single, large Cloud Volumes ONTAP instance in a public cloud to handle both workloads to simplify management.
- B. Use NetApp StorageGRID as the primary storage for both the training and low-latency inference workloads.
- C. Configure QoS minimums on the training volumes to ensure they do not impact inference performance.
- D. Deploy a large NetApp ASA cluster with GPUDirect Storage enabled for the training environment.
- E. Implement NetApp FlexCache on smaller nodes at the network edge to serve the inference requests.

Answer: D,E

NEW QUESTION # 80

The "Advisor Assistant" application, running as a pod in Kubernetes, suddenly cannot access its data on the AFF A-Series. The application logs show "connection timed out" errors. The network team provides a firewall log snippet for the traffic between the application pod and the storage system's NFS data LIF.

```
TIME | SRC_IP | DST_IP | PROTO | DST_PORT | ACTION
```

```
-|--||-|-|
```

```
2025-07-11T16:01:10Z | 10.20.5.101 (Pod) | 10.20.10.55 (LIF) | TCP | 111 | BLOCKED
```

```
2025-07-11T16:01:12Z | 10.20.5.101 (Pod) | 10.20.10.55 (LIF) | TCP | 2049 | BLOCKED
```

What is the most likely cause of the connectivity failure?

- A. The application pod has incorrect mount options configured.
- B. The AFF A-Series does not support the NFS protocol.
- C. The ONTAP system's data LIF is offline.
- D. A network firewall between the pod's subnet and the storage subnet is blocking the required NFS ports.

Answer: D

NEW QUESTION # 81

.....

A lot of students have used our product and prepared successfully for the test. Every user has rated study material positively and passed the NS0-901 Exam. FreePdfDump gives a guarantee to the customers that if they fail to pass the NetApp Certified AI Expert Exam (NS0-901) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions. A team of experts is working day and night in order to make the product successful day by day and provide the customers with the best experience.
