Cisco CCST 100-160 free valid dumps & Cisco 100-160 actual pdf exam

The RealValidExam wants to win the trust of Cisco Certified Support Technician (CCST) Cybersecurity (100-160) certification exam candidates. To achieve this objective RealValidExam is presenting Valid, Real, and Updated Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam questions in three different formats. These formats have high demand in the market and offer the easiest and quick way for Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam preparation.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q116-Q121):

NEW QUESTION # 116

Which of the following is a feature of cloud computing?

- **A. Data encryption**
- B. Hardware provisioning
- C. On-premises hosting
- D. Physical server maintenance

Answer: A

Explanation:

Option 1: Incorrect. On-premises hosting refers to hosting applications and data on local servers within an organization's physical infrastructure. It is not a feature of cloud computing.

Option 2: Incorrect. Hardware provisioning is the process of setting up and configuring the physical infrastructure required to run

applications and store data. While this is an important aspect of cloud computing, it is not a specific feature of cloud computing.

Option 3: Correct. Data encryption is a feature of cloud computing that ensures the security and confidentiality of data stored and transmitted within the cloud. It protects sensitive information from unauthorized access.

Option 4: Incorrect. Physical server maintenance involves activities such as hardware repairs, upgrades, and maintenance tasks associated with physical servers. While these tasks are necessary for managing an on-premises infrastructure, they are not specific features of cloud computing.

NEW QUESTION # 117

What is a common vulnerability in cloud-based systems?

- **A. Inadequate access controls**
- B. Lack of network segmentation
- C. Outdated antivirus software
- D. Weak passwords

Answer: A

Explanation:

Option 1: Correct. Inadequate access controls can leave cloud-based systems vulnerable to unauthorized access and data breaches.

Option 2: Incorrect. Outdated antivirus software is a concern for individual devices but not specific to cloud-based systems.

Option 3: Incorrect. Weak passwords can be a vulnerability but not a common one in cloud-based systems, which usually have password policies in place.

Option 4: Incorrect. Lack of network segmentation can be a vulnerability, but it is not as common as inadequate access controls.

NEW QUESTION # 118

Which technology is responsible for managing cryptographic keys, digital certificates, and providing other security-related services?

- A. Firewall
- **B. Public Key Infrastructure (PKI)**
- C. Intrusion Detection System (IDS)
- D. Virtual Private Network (VPN)

Answer: B

Explanation:

Public Key Infrastructure (PKI) is a framework of hardware, software, policies, and procedures used to manage the generation, storage, distribution, and revocation of digital certificates and encryption keys. PKI provides important security services such as authentication, encryption, and integrity checking. It enables secure communication, verifies the trustworthiness of digital identities, and ensures the confidentiality and integrity of data exchanged between parties.

NEW QUESTION # 119

What is the main purpose of a disaster recovery plan as compared to a business continuity plan?

- A. Allowing staff to continue to serve customers throughout a disaster.
- **B. Restoring data access and an IT infrastructure as quickly as possible.**
- C. Limiting operational downtime.
- D. Keeping the business open in some capacity during a disaster.

Answer: B

Explanation:

The CCST Cybersecurity Study Guide distinguishes between Disaster Recovery Plans (DRP) and Business Continuity Plans (BCP): A BCP focuses on keeping the business running during a disruption.

A DRP focuses on restoring IT services and data after a disaster has occurred.

"A disaster recovery plan outlines procedures for restoring data and critical IT infrastructure to operational status following a disruptive incident. The goal is to resume normal IT operations as quickly as possible." (CCST Cybersecurity, Essential Security Principles, Business Continuity and Disaster Recovery section, Cisco Networking Academy) A is a general effect of both BCP and DRP.

B and D describe business continuity, not disaster recovery.

C is correct: DRP's main purpose is restoring IT systems and data quickly after disruption

NEW QUESTION # 120

Which technology allows on-demand access to shared pools of configurable computing resources over a network?

- **A. Cloud**
- B. Virtualization
- C. Proxy
- D. DMZ

Answer: A

Explanation:

Cloud computing refers to the delivery of on-demand computing resources, including servers, storage, databases, networking, software, and analytics, over the internet. It provides organizations with the ability to access and use shared pools of configurable computing resources quickly and easily, without the need for extensive upfront infrastructure investments. Cloud computing offers scalability, cost-efficiency, and flexibility, making it an essential component of modern IT environments.

NEW QUESTION # 121

.....

Our 100-160 training materials provide three different versions to the client and they include the PDF version, PC version, APP online version. Each version's using method and functions are different but the questions and answers of our 100-160 Study Materials is the same. The client can decide which version of our 100-160 exam questions to choose according their hobbies and their practical conditions.

100-160 Pdf Dumps: <https://www.realvalidexam.com/100-160-real-exam-dumps.html>

We believe that your efforts plus our 100-160 practice material can generate good results, Cisco Latest 100-160 Exam Dumps If employees can get some relating certification, this would be quite helpful, Why we can give you a promise that we will fully refund the money you purchased our software if you fail 100-160 exam with our dump, 100-160 valid exam test is widely recognized certifications.
