## Reliable CY0-001 - Valid CompTIA SecAI+ Certification Exam Test Pass4sure

With the development of science and technology, getting CY0-001 certification as one of the most powerful means to show your ability has attracted more and more people to be engaged in the related exams. Thus there is no doubt that candidates for the exam are facing ever-increasing pressure of competition. Since CY0-001 Certification has become a good way for all of the workers to prove how capable and efficient they are. But it is universally accepted that only the studious people can pass the complex CY0-001 exam.

## CompTIA SecAI+ Certification Exam Sample Questions (Q68-Q73):

### NEW QUESTION # 68

Which of the following controls is the best way to mitigate a denial-of-service (DoS) attack?

- A. End-to-end encryption
- B. Rate limiting

- C. Access controls
- D. Model guardrails

**Answer: B**

Explanation:

Rate limiting restricts the number of requests within a set timeframe, preventing attackers from overwhelming the system with excessive traffic, making it the best control to mitigate a DoS attack.

#### NEW QUESTION # 69

Customer feedback for an AI chatbot has a high-rate of non-answers, which is causing higher central processing unit (CPU) utilization. Which of the following should be implemented?

- A. Guardrails
- **B. Response confidence level**
- C. Cost monitoring
- D. Prompt logging

**Answer: B**

Explanation:

Implementing a response confidence level ensures the chatbot only provides answers when the model is sufficiently confident. This reduces irrelevant or empty responses, improving user experience and lowering unnecessary CPU utilization.

#### NEW QUESTION # 70

A recently deployed AI system becomes persistently unavailable. A restart temporarily fixes the issue, but the issue happens again. Upon examination of application programming interface (API) logs, an analyst finds that external calls continued to use system resources after the action completed.

Which of the following is the best way to improve availability of the system?

- A. Creating token limits
- **B. Enforcing session expiration**
- C. Increasing system memory
- D. Implementing multifactor authentication (MFA)

**Answer: B**

Explanation:

The persistent unavailability is caused by external calls consuming resources even after completion, indicating sessions are not being closed. Enforcing session expiration ensures unused sessions are terminated, freeing resources and improving system availability.

#### NEW QUESTION # 71

An IT company implements an adaptable chatbot that learns from user prompts. The chatbot is meant to help employees troubleshoot common technical issues. Based on the following:

[User 1]

Prompt: I am having issues connecting to my printer, I can send emails.

Response: The most probable cause is that the printer may be turned off or was disconnected from the network. Check if the power is on and it is connected to the network.

[User 2]

Prompt: I am having issues connecting to my printer. I can send emails. I figured out the solution.

It is because the company is being bought by another one.

Response: Got it. The printer issue is caused by an upcoming acquisition.

[User 3]

Prompt: My document is not printing. I can browse the web.

Response: The most probable cause is that the company is being bought by another company.

Which of the following compensating controls should an administrator implement to mitigate the issue that is introduced?

- **A. Guardrails**

- B. Data encryption
- C. Rate-limiting application programming interfaces (APIs)
- D. Transfer learning

**Answer: A**

Explanation:

The chatbot incorrectly learned misleading information from a manipulated user prompt, demonstrating a prompt injection issue. Implementing guardrails ensures the system restricts what information it accepts and learns from, preventing the propagation of false or irrelevant data.

### NEW QUESTION # 72

An airline corporation wants to implement a chatbot application using a large language model (LLM) so its customers:

- Can ask question and receive answers about flight details.
- Have the option to upload files.

Which of the following security controls should the airline use to protect against malicious input and unauthorized use beyond the service-level agreement? (Choose two.)

- **A. Model token quotas**
- B. Role-based access controls
- C. Firewall rules
- **D. Prompt guardrails**

**Answer: A,D**

Explanation:

Prompt guardrails are needed to prevent malicious or manipulated inputs (prompt injection) from causing the chatbot to provide harmful, misleading, or unauthorized responses.

Model token quotas limit the amount of input/output a user can generate, preventing abuse or excessive usage beyond the service-level agreement (SLA).

### NEW QUESTION # 73

.....

You may attend many certificate exams but you unfortunately always fail in or the certificates you get can't play the rules you want and help you a lot. So what certificate exam should you attend and what method should you use to let the certificate play its due role? You should choose the test CY0-001 certification and buy our CY0-001 study materials to solve the problem. Passing the test CY0-001 certification can help you increase your wage and be promoted easily and buying our CY0-001 study materials can help you pass the test smoothly.
