The wide coverage of important knowledge points in our 1Y0-205 latest braindumps would be greatly helpful for you to pass the exam.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q33-Q38):

NEW QUESTION # 33
A Citrix Administrator is looking to provide apps and desktops to users. Project requirements dictate that management and maintenance should be minimized for the administrator, while still maintain control of the Virtual Delivery Agent (VDA machines). (Choose three.)

- A. Microsoft Azure
- B. Amazon Web Services
- C. Google Cloud Platform
- D. Microsoft HyperV
- E. XenServer
- F. Nutanix Acropolis

Answer: A,B,C

Explanation:
Using public cloud platforms such as AWS, GCP, or Azure with Citrix Cloud services minimizes infrastructure management and maintenance for the administrator, while still providing control over the VDA machines. The cloud provider handles most of the underlying infrastructure, reducing administrative overhead.

NEW QUESTION # 34
Scenario: A Citrix Administrator needs to configure StoreFront to allow external users access to internal resources. The external users will authenticate on StoreFront. Which StoreFront authentication method can the administrator configure?

- A. HTTP Basic
- B. Smart card
- C. Pass-through from NetScaler Gateway
- D. Username and password

Answer: C

Explanation:
For external access, authentication is typically performed at Citrix NetScaler (now Citrix ADC).
StoreFront must then be configured with the "Pass-through from NetScaler Gateway" authentication method, allowing StoreFront to accept and trust the authentication performed externally.

NEW QUESTION # 35
Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.
- B. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- C. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- D. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.

Answer: A

Explanation:
By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix

Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

NEW QUESTION # 36

Scenario: A Citrix Administrator is investigating an issue in which a user's session does NOT successfully end after closing the last published application. The administrator used Task Manager to inspect the hanging session but could NOT find any relevant information. Which tool could the administrator use to get further details on orphaned processes in the session?

- A. Regmon
- B. Procmon
- C. Handle
- D. Process Explorer

Answer: D

Explanation:
Process Explorer provides detailed insight into running processes, their parent-child relationships, and resource usage. It is the best tool to identify orphaned processes that prevent a Citrix session from ending after the last application is closed.

NEW QUESTION # 37

A Citrix Administrator is concerned about the way that web pages and video render on the backend Virtual Delivery Agent (VDA) workloads. The administrator wants to find a way to for the web pages to render on the client device instead of on the VDA. What feature should the administrator use to accomplish this?

- A. Citrix Optimizer
- B. Enlightened Data Transport
- C. Browser Content Redirection
- D. Microsoft Teams Optimization

Answer: C

Explanation:
Browser Content Redirection offloads the rendering of web pages and multimedia from the VDA to the client device. This reduces CPU and memory load on the VDA while improving performance and user experience on the endpoint.

NEW QUESTION # 38

......

Our 1Y0-205 study materials can help you pass test faster. You can take advantage of the certification. Many people improve their ability to perform more efficiently in their daily work with the help of our 1Y0-205 exam questions and you can be as good as they are. The moment you choose to go with our 1Y0-205 Study Materials, your dream will be more clearly presented to you. Next, through my introduction, I hope you can have a deeper understanding of our 1Y0-205 learning quiz. We really hope that our 1Y0-205 study materials will give you the help to pass the exam.
