

Valid Data-Cloud-Consultant Exam Answers - Data-Cloud-Consultant Latest Examprep

P.S. Free 2026 Salesforce Data-Cloud-Consultant dumps are available on Google Drive shared by LatestCram: https://drive.google.com/open?id=1pcc0ssTDyInQybH4_tD88nte8oxL4JPm

Some of our customers are white-collar workers with no time to waste, and need a Salesforce certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills. So we try to meet different requirements by setting different versions of our Data-Cloud-Consultant question dumps. The first one is online Data-Cloud-Consultant engine version. As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on. You can practice online anytime and check your test history and performance review, which will do help to your study. The second is Data-Cloud-Consultant Desktop Test Engine. As an installable Data-Cloud-Consultant software application, it simulated the real Data-Cloud-Consultant exam environment, and builds 200-125 exam confidence. The third one is Practice PDF version. PDF Version is easy to read and print. So you can study anywhere, anytime.

Salesforce Data-Cloud-Consultant Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Data Cloud Setup and Administration: This topic includes applying Data Cloud permissions, permission sets, org-wide settings. It describes and configures data stream types, and data bundles. Moreover, it discusses use cases for data spaces, creating data spaces, managing and administering Data Cloud using reports, dashboards, flows, packaging, data kits, diagnosing and exploring data using Data Explorer, Profile Explorer, and APIs.
Topic 2	<ul style="list-style-type: none"> • Segmentation and Insights: This topic defines basic concepts of segmentation and use cases, identifies scenarios for analyzing segment membership, configuring, refining, and maintaining segments within Data Cloud, and differentiating between calculated and streaming insights.
Topic 3	<ul style="list-style-type: none"> • Act on Data: This topic defines activations and their basic use cases, using attributes and related attributes, identifying and analyzing timing dependencies affecting the Data Cloud lifecycle. Additionally it focuses on troubleshooting common problems with activations, and using data actions, including their requirements and intended use cases.
Topic 4	<ul style="list-style-type: none"> • Identity Resolution: It describes matching and how its rule sets are applied. Furthermore, it discusses reconciling data and its rule sets, the results of identity resolution, and use cases.
Topic 5	<ul style="list-style-type: none"> • Data Cloud Overview: This topic covers Data Cloud's function, key terminology, business value, typical use cases, the Data Cloud lifecycle, dependencies, and principles of data ethics. These sub-topics provide an overview of Data Cloud's capabilities and applications.

Data-Cloud-Consultant Latest Exam Prep & Exam Vce Data-Cloud-Consultant Free

The desktop-based practice exam software is the first format that Data-Cloud-Consultant provides to its customers. It allows candidates to track their progress from start to finish and provides an easily accessible progress report. This Salesforce Data-Cloud-Consultant Practice Questions is customizable and mimics the real exam's format. It is user-friendly on Windows-based computers, and the product support staff is available to assist with any issues that may arise.

Salesforce Certified Data 360 Consultant (Data-Con-101) Sample Questions (Q13-Q18):

NEW QUESTION # 13

What is the result of a segmentation criteria filtering on City | Is Equal To | 'San Jose'?

- A. Cities only containing 'San Jose' or 'San Jose'
- B. Cities containing 'San Jose', 'San Jose', 'san jose', or 'san jose'
- C. Cities only containing 'San Jose' or 'san jose'
- **D. Cities only containing 'San Jose' or 'san jose'**

Answer: D

Explanation:

The result of a segmentation criteria filtering on City | Is Equal To | 'San Jose' is cities only containing 'San Jose' or 'san jose'. This is because the segmentation criteria is case-sensitive and accent-sensitive, meaning that it will only match the exact value that is entered in the filter¹. Therefore, cities containing 'San Jose', 'san jose', or 'San Jose' will not be included in the result, as they do not match the filter value exactly. To include cities with different variations of the name 'San Jose', you would need to use the OR operator and add multiple filter values, such as 'San Jose' OR 'San Jose' OR 'san jose' OR 'san jose'². NEW QUESTION # 14

Which data model subject area should be used for any Organization, Individual, or Member in the Customer 360 data model?

- A. Engagement
- **B. Party**
- C. Membership
- D. Global Account

Answer: B

Explanation:

The data model subject area that should be used for any Organization, Individual, or Member in the Customer 360 data model is the Party subject area. The Party subject area defines the entities that are involved in any business transaction or relationship, such as customers, prospects, partners, suppliers, etc. The Party subject area contains the following data model objects (DMOs):

Organization: A DMO that represents a legal entity or a business unit, such as a company, a department, a branch, etc.

Individual: A DMO that represents a person, such as a customer, a contact, a user, etc.

Member: A DMO that represents the relationship between an individual and an organization, such as an employee, a customer, a partner, etc.

The other options are not data model subject areas that should be used for any Organization, Individual, or Member in the Customer 360 data model. The Engagement subject area defines the actions that people take, such as clicks, views, purchases, etc. The Membership subject area defines the associations that people have with groups, such as loyalty programs, clubs, communities, etc. The Global Account subject area defines the hierarchical relationships between organizations, such as parent-child, subsidiary, etc.

NEW QUESTION # 15

Cumulus Financial uses Data Cloud to segment banking customers and activate them for direct mail via a Cloud File Storage activation. The company also wants to analyze individuals who have been in the segment within the last 2 years. Which Data Cloud component allows for this?

- A. Nested segments
- **B. Segment membership data model object**
- C. Calculated insights
- D. Segment exclusion

Answer: B

Explanation:

Explanation

Data Cloud allows customers to analyze the segment membership history of individuals using the Segment Membership data model object. This object stores information about when an individual joined or left a segment, and can be used to create reports and dashboards to track segment performance over time. Cumulus Financial can use this object to filter individuals who have been in the segment within the last 2 years and compare them with other metrics.

The other options are not Data Cloud components that allow for this analysis. Segment exclusion is a feature that allows customers to remove individuals from a segment based on another segment. Nested segments are segments that are created from other segments using logical operators. Calculated insights are derived attributes that are created from existing data using formulas.

NEW QUESTION # 16

A healthcare client wants to make use of identity resolution, but does not want to risk unifying profiles that may share certain personally identifying information (PII).

Which matching rule criteria should a consultant recommend for the most accurate matching results?

- A. Email Address and Phone
- B. Exact Last Name and Email
- **C. Party Identification on Patient ID**
- D. Fuzzy First Name, Exact Last Name, and Email

Answer: C

Explanation:

Identity resolution is the process of linking data from different sources into a unified profile of a customer or an individual. Identity resolution uses matching rules to compare the attributes of different records and determine if they belong to the same person. Matching rules can be based on exact or fuzzy matching of various attributes, such as name, email, phone, address, or custom identifiers. A healthcare client who wants to use identity resolution, but does not want to risk unifying profiles that may share certain personally identifying information (PII), such as name or email, should use a matching rule criteria that is based on a unique and reliable identifier that is specific to the healthcare domain. One such identifier is the patient ID, which is a unique number assigned to each patient by a healthcare provider or system. By using the party identification on patient ID as a matching rule criteria, the healthcare client can ensure that only records that have the same patient ID are matched and unified, and avoid false positives or false negatives that may occur due to common or similar names or emails. The party identification on patient ID is also a secure and compliant way of handling sensitive healthcare data, as it does not expose or share any PII that may be subject to data protection regulations or standards. NEW QUESTION # 17

A customer creates a large segment of customers that placed orders in the last 30 days, and adds related attributes from the... to the activation. Upon checking the activation in Marketing Cloud, they notice It contains orders that are older than 30 days.

What should a consultant do to resolve this issue?

- A. Apply a data space filter to exclude orders older than 30 days.
- B. use data graphs that contain only 30 days of data.
- **C. Apply a filter to Purchase Order Date to exclude orders older than 30 days.**
- D. Use SQL in Marketing Cloud Engagement to remove orders older than 30 days.

Answer: C

Explanation:

The issue arises because the activated segment in Marketing Cloud contains orders older than 30 days, despite the segment being defined to include only recent orders. The best solution is to apply a filter to the Purchase Order Date to exclude older orders.

Here's why:

Understanding the Issue

The segment includes related attributes from the purchase order data.

Despite filtering for orders placed in the last 30 days, older orders are appearing in the activation.

Why Apply a Filter to Purchase Order Date?

Root Cause :

The related attributes (e.g., purchase order details) may not be filtered by the same criteria as the segment.

Without a specific filter on the Purchase Order Date , older orders may inadvertently be included.

Solution Approach :

Applying a filter directly to the Purchase Order Date ensures that only orders within the desired timeframe are included in the activation.

Other Options Are Less Suitable :

A . Use data graphs that contain only 30 days of data : Data graphs are not typically used to filter data for activations.

B . Apply a data space filter to exclude orders older than 30 days : Data space filters apply globally and may unintentionally affect other use cases.

D . Use SQL in Marketing Cloud Engagement to remove orders older than 30 days : This is a reactive approach and does not address the root cause in Data Cloud.

Steps to Resolve the Issue

Step 1: Review the Segment Definition

Confirm that the segment filters for orders placed in the last 30 days.

Step 2: Add a Filter to Purchase Order Date

Modify the activation configuration to include a filter on the Purchase Order Date , ensuring only orders within the last 30 days are included.

Step 3: Test the Activation

Publish the segment again and verify that the activation in Marketing Cloud contains only the desired orders.

Conclusion

By applying a filter to the Purchase Order Date , the consultant ensures that only orders placed in the last 30 days are included in the activation, resolving the issue effectively.

NEW QUESTION # 18

.....

Our Data-Cloud-Consultant real test was designed by many experts in different area, they have taken the different situation of customers into consideration and designed practical Data-Cloud-Consultant study materials for helping customers save time.

Whether you are a student or an office worker, we believe you will not spend all your time on preparing for Data-Cloud-Consultant Exam, you are engaged in studying your specialized knowledge, doing housework, looking after children and so on. With our simplified information, you are able to study efficiently. And do you want to feel the true exam in advance? Just buy our Data-Cloud-Consultant exam questions!
