You just need little time to download and install it after you purchase, then you just need spend about 20~30 hours to learn it. We are glad that you are going to spare your precious time to have a look to our JN0-105 Exam Guide.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which two statements describe the result when you enter? at the command-line prompt? (Choose two.)

- A. It displays summary information about the commands and options.
- B. It lists the available commands and options.
- C. It lists tips for the help menu.
- D. It displays help about a text string contained in a statement.

Answer: A,B

Explanation:

When you enter ? at the command-line prompt in Junos OS, the system provides assistance in two significant ways. Firstly, it lists the available commands and options that can be used at the current point in the command hierarchy, aiding users in understanding what commands they can execute next. Secondly, it displays summary information about those commands and options, providing brief

descriptions or additional context that can help users understand the function of each command or option. This feature is particularly useful for learning the command structure or for quick reference when specific command syntax is forgotten.

NEW QUESTION # 58

Which process in the Junos OS is responsible for maintaining routing protocols and tables?

- A. dcd
- **B. rpd**
- C. chassisd
- D. mgd

Answer: B

Explanation:

The Routing Protocol Daemon (rpd) in Junos OS is responsible for maintaining routing protocols and tables.

It handles all routing information, including the calculation of routes and the population of the routing table, making it crucial for dynamic routing operations.

NEW QUESTION # 59

You received a new Junos device and are configuring the system-related settings. You must configure this device for the current date and time on the US West coast. You have set the time zone to America/Los_Angeles, however the time and date did not change. In this scenario, which two additional actions would satisfy this requirement? (Choose two.)

- A. Configure a DNS server.
- B. Reboot the device.
- **C. Configure an NTP server.**
- **D. Set the date and time setting manually.**

Answer: C,D

Explanation:

When configuring the system-related settings for the current date and time on a Junos device, especially for a specific time zone like America/Los_Angeles, and the time does not automatically adjust, two effective actions can be taken. Firstly, setting the date and time manually allows for immediate correction of the system clock. This can be done via the CLI with the appropriate set date and time command. Secondly, configuring the device to use an NTP server can provide ongoing synchronization with an accurate time source, ensuring that the device maintains the correct time and date automatically in the future, even in the case of restarts or minor drifts in the internal clock.

NEW QUESTION # 60

Which Junos OS component is responsible for maintaining the forwarding table?

- A. management daemon
- B. chassis control daemon
- C. Routing Engine
- **D. Packet Forwarding Engine**

Answer: D

Explanation:

The Packet Forwarding Engine (PFE) in Junos OS is responsible for maintaining the forwarding table. The PFE processes incoming packets, performs route lookups in the forwarding table, and forwards packets based on this information, offloading these tasks from the Routing Engine to ensure efficient packet forwarding.

NEW QUESTION # 61

Exhibit

[edit]

```
user@router1 set interfaces ge-0/1/2 unit 0 family inet address 172.16.101.1/24 [edit] user@router# commit check configuration
check succeeds
[edit]
user@router#
You need to configure interface ge-0/1/2 with an IP address of 172.16.100.1/24. You have accidentally entered
172.16.101.1/24 as shown in the exhibit.
Which command should you issue to solve the problem?
```

- A. [edit] user@router# rollback rescue
- B. (edit) user@router# rollback 1
- C. [edit] user@router# rollback 2
- D. [edit] user@router# rollback 0

Answer: B

Explanation:

If you've committed a configuration and then need to revert to the previous configuration, the `rollback` command is used. Since the incorrect IP address has not been committed, as indicated by the `commit check` command being successful, issuing `rollback 1` will undo the changes made in the current session, which includes the accidental entry of the IP address.

NEW QUESTION # 62

.....

The third and last format is the Junos, Associate (JNCIA-Junos) (JN0-105) desktop practice test software that can be used on Windows laptops and PCs. Students with laptops or computers can access the software and prepare for it efficiently.
