SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud

Public Edition Sample Questions (Q33-Q38):

NEW QUESTION # 33
What defines the organizational entities that are required in SAP Central Business Configuration?
Note:
There are 2 correct answers to this question

- A. The selected deployment target
- B. Added partner content
- C. System consistency checks
- D. The selected scope

Answer: A,D

Explanation:
The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.
These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S
/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S
/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 34
After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. SAP Cloud ALM Requirements app
- B. Integration Solution Advisory Methodology
- C. SAP Business Accelerator Hub
- D. Integration and API List

Answer: B

NEW QUESTION # 35
What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Download learning content from SAP Learning Hub
- B. Access the SAP ONE Support Launchpad
- C. Interact with SAP easily
- D. Get full transparency into your SAP product portfolio

Answer: C,D

Explanation:
The SAP for Me mobile app allows you to easily interact with SAP anywhere and anytime. You can review and reply to SAP support cases, start a chat with an expert, monitor your SAP cloud service status, receive notifications about important events, and more. The app also provides you with full transparency into your SAP product portfolio, including your licenses, systems, users, orders, contracts, and invoices. You can view the details of each product and service, as well as access relevant resources and tools. References = SAP for Me - Apps on Google Play, SAP for Me - Your digital companion along your whole SAP customer

NEW QUESTION # 36

Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Confirm primary logistics settings
- B. Create two projects
- C. Confirm primary finance settings
- D. Confirm primary HCM settings
- E. Define the scope

Answer: B,C,E

NEW QUESTION # 37

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Sustainability Control Tower
- B. SAP Responsible Design and Production
- C. SAP Sustainability Footprint Management
- D. SAP Green Token

Answer: A

Explanation:
SAP Sustainability Control Tower is a cloud-based solution that enables customers to record, report, and act on their ESG data. It provides a comprehensive and consistent view of the ESG performance across the enterprise and the value chain. It also supports automated, auditable, and compliant reporting based on global standards and frameworks. SAP Sustainability Control Tower helps customers to embed sustainability into their core business processes and make balanced decisions that support their sustainability goals. References = SAP S/4HANA Cloud, Public Edition - All Learning Journeys > Implementing SAP S /4HANA Cloud Public Edition > Unit 3: Sustainability and ESG Reporting > Topic 3.1: Introduction to SAP Sustainability Control Tower. SAP Cloud for Sustainable Enterprises: Taking Action Together. SAP Sustainability Control Tower: Data Foundation for ESG.
