

OGBA-101최신업데이트버전인증시험자료 - OGBA-101 적중율높은시험덤프공부

참고: PassTIP에서 Google Drive로 공유하는 무료 2026 The Open Group OGBA-101 시험 문제집이 있습니다:
<https://drive.google.com/open?id=13VuyHABUO5ItLsiO8wpGE7qjXBITYG3k>

IT자격증을 많이 취득하여 IT업계에서 자신만의 단단한 자리를 보장하는 것이 여러분들의 로망이 아닐까 싶습니다. PassTIP의 완벽한 The Open Group인증 OGBA-101덤프는 IT전문가들이 자신만의 노하우와 경험으로 실제 The Open Group인증 OGBA-101시험문제에 대비하여 연구제작한 완벽한 작품으로서 100%시험통과율을 보장합니다.

The Open Group인증 OGBA-101시험을 어떻게 공부하면 패스할 수 있을지 고민중이시면 근심걱정 버리고 PassTIP의 The Open Group인증 OGBA-101덤프로 가보세요. 문항수가 적고 적중율이 높은 세련된 The Open Group인증 OGBA-101시험준비 공부자료는 PassTIP제품이 최고입니다.

>> OGBA-101최신 업데이트버전 인증시험자료 <<

100% 합격보장 가능한 OGBA-101최신 업데이트버전 인증시험자료 인증 덤프

국제공인자격증을 취득하여 IT업계에서 자신만의 자리를 잡고 싶으신가요? 자격증이 수없이 많은데 The Open Group OGBA-101 시험패스부터 시작해보실까요? 100%합격가능한 The Open Group OGBA-101덤프는 The Open Group OGBA-101시험문제의 기출문제와 예상문제로 되어있는 퍼펙트한 모음문제집으로서 시험패스율이 100%에 가깝습니다.

최신 TOGAF Business Architecture Foundation OGBA-101 무료샘플문제 (Q95-Q100):

질문 # 95

Which of the following is a derived relationship in an organization map?

- A. Value flow
- B. Scope of enterprise
- C. Capability
- D. Location

정답: A

설명:

According to the TOGAF Series Guide: Organization Mapping, one of the derived relationships in an organization map is value flow. A value flow is a relationship that shows how value is exchanged between business units or other entities in an organization map. A value flow can be expressed as a verb phrase that indicates what type of value is transferred or shared between entities. For example, in an organization map for an online retailer, a possible value flow could be "Delivers products" between the Warehouse business unit and the Customer entity.

질문 # 96

Which of the following best describes the relationship between business models and business architecture?

- A. Business Architecture provides a conceptual summary view, whereas business models support in-depth analysis.
- **B. Business Architecture breaks a business model down into the core functional elements that describe how the business works.**
- C. Business models are useful for impact analysis, however Business Architecture is needed for scenario analysis.
- D. Business model development is a prerequisite for a Business Architecture development.

정답: B

설명:

A business model describes how an organization creates, delivers, and captures value for its stakeholders³. A business architecture breaks a business model down into the core functional elements that describe how the business works, such as the value proposition, the customer segments, the channels, the revenue streams, the cost structure, the key resources, the key activities, and the key partnerships³.

질문 # 97

Consider the following statement:

When considering agile development, Architecture to Support Project will identify what products the Enterprise needs, the boundary of the products, and the constraints that the product owner has.

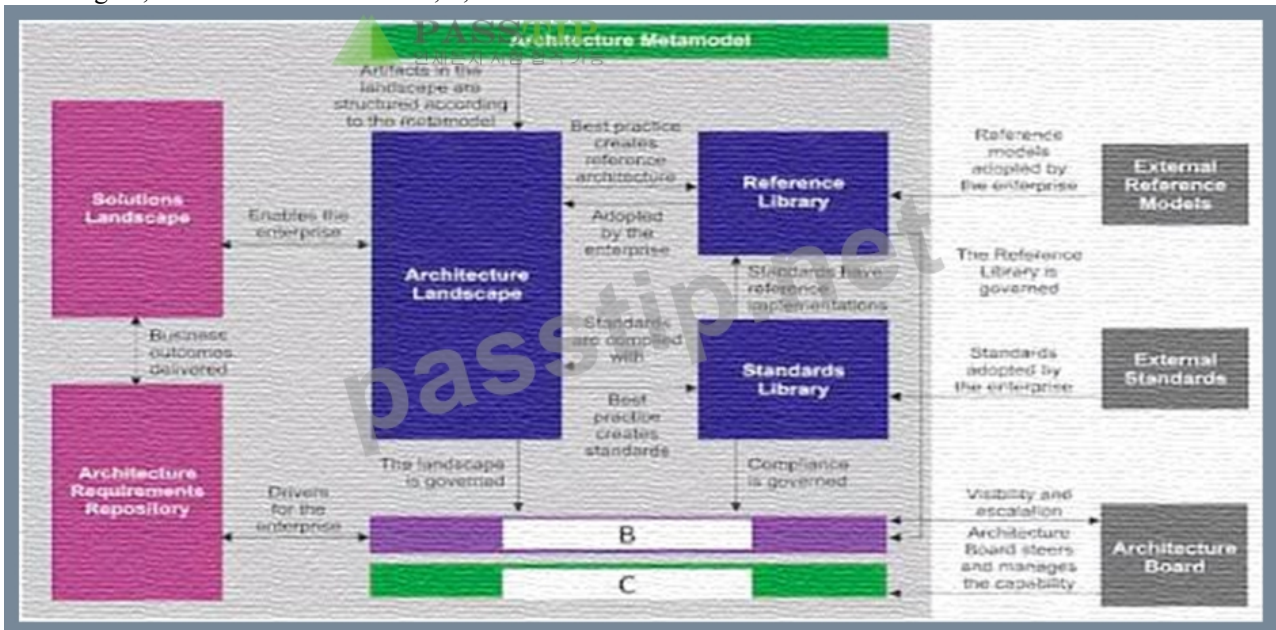

What else does it help to define for the Enterprise?

- A. operations
- B. workflow management
- C. lifecycle economics
- **D. the backlog**

정답: D

질문 # 98

In the diagram, what are the items labelled A, B, and C?

- **A. A-Architecture Repository, B-Governing Board, C-Enterprise Capability**
- B. A-Enterprise Repository, B-Governance Repository. C-Board Repository
- C. A-Architecture Repository, B-Governance Repository. C-Architecture Capability
- D. Enterprise Repository, B-Board repository, C-Enterprise Capability

정답: A

설명:

In the provided diagram, item A refers to the Architecture Repository, which is a part of the TOGAF framework where all the architecture assets are stored. This includes the architectural models, patterns, architecture descriptions, and other artifacts relevant to the architecture. Item B is labeled as the Governing Board, which is likely referring to the Architecture Board or a similar governance structure responsible for oversight and decision-making regarding the enterprise architecture. Item C refers to Enterprise Capability, which encompasses the processes, tools, skills, and other capabilities that enable the architecture function within the enterprise.

질문 # 99

Consider the following:

You need to analyze a new value stream within the scope of a project.

Which of the following would you use?

- A. Heat mapping by value stream stages.
- B. An organization chart showing the business units that work with the enterprise and their value.
- C. Converting the value stream stages to entities and then building a logical data model
- D. Combining information mapping with a business process model.

정답: A

설명:

In TOGAF and other enterprise architecture practices, analyzing a value stream often involves understanding the various stages of the value stream and assessing how each stage contributes to business value. Heat mapping is a commonly used technique to visualize and analyze these stages, making it the most appropriate choice in this context.

* Understanding Value Streams in TOGAF A value stream represents a high-level view of how value is delivered to customers or stakeholders. It encompasses all the activities necessary to achieve a specific outcome, often broken down into stages. In TOGAF's Business Architecture, value stream mapping is a key activity for analyzing and understanding these value stages, enabling architects to identify areas for improvement.

* Heat Mapping as an Analysis Technique Heat mapping by value stream stages is a visualization technique that highlights the effectiveness or performance of each stage in the value stream. By applying a heat map, architects can easily see which stages are performing well (often marked in "cool" colors) and which stages may need improvement (often marked in "hot" colors). This is particularly useful for identifying bottlenecks, redundancies, or inefficiencies within the value stream, which is essential for project analysis.

* Why Other Options are Incorrect:

* Option A (Converting value stream stages to entities and building a logical data model): Building a logical data model involves defining data entities and their relationships, which is more relevant for data architecture. It does not directly contribute to analyzing a value stream's stages or performance within a project scope.

* Option C (An organization chart showing business units and their value): An organization chart shows hierarchical relationships and roles within the enterprise, which does not specifically address value stream stages. While it may help understand which units are responsible for different parts of the value stream, it doesn't provide insight into the performance or effectiveness of each stage.

* Option D (Combining information mapping with a business process model): Information mapping with a business process model is more suited for detailed process analysis. It involves mapping information flows within processes but doesn't directly address analyzing value stream stages.

Value streams are typically at a higher level than detailed business processes, focusing more on outcomes than specific activities.

* Conclusion: Heat mapping by value stream stages (Option B) is the most effective tool for analyzing a new value stream within the project scope, as it provides a visual assessment of each stage's performance and identifies areas for improvement.
