

1Z0-1072-25 Exam Blueprint | Latest 1Z0-1072-25 Version

What's more, part of that ActualtestPDF 1Z0-1072-25 dumps now are free: <https://drive.google.com/open?id=150eVbR2YngDC-81hApAJ9jb-RNhReqs>

Closed cars will not improve, and when we are reviewing our qualifying 1Z0-1072-25 examinations, we should also pay attention to the overall layout of various qualifying examinations. For the convenience of users, our 1Z0-1072-25 learn materials will be timely updated information associated with the qualification of the home page. Our 1Z0-1072-25 Certification material get to the exam questions can help users in the first place. Users can learn the latest and latest test information through our 1Z0-1072-25 test preparation materials. What are you waiting for?

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 2	<ul style="list-style-type: none"> • Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 3	<ul style="list-style-type: none"> • Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.
Topic 4	<ul style="list-style-type: none"> • Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.

Latest 1Z0-1072-25 Version | 1Z0-1072-25 Positive Feedback

Moreover, you do not need an active internet connection to utilize ActualtestPDF desktop Oracle 1Z0-1072-25 practice exam software. It works without the internet after software installation on Windows computers. The ActualtestPDF web-based Oracle 1Z0-1072-25 Practice Test requires an active internet and it is compatible with all operating systems.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q22-Q27):

NEW QUESTION # 22

How many capacity reservations would you create to meet the requirement for high availability and distribution across Availability Domains?

- A. Three
- B. One
- C. Two
- D. Four

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), to ensure high availability and distribution across Availability Domains (ADs), the recommended approach is as follows:

Capacity Reservations for High Availability: To achieve high availability, especially across all three Availability Domains in a region, you should create three capacity reservations. Each reservation corresponds to one AD, ensuring that your instances or resources are evenly distributed and resilient to AD-level failures.

Why Three: This setup provides redundancy and load distribution across the ADs, meeting the high availability requirements.

Relevant OCI Documentation:

Capacity Reservations

This document outlines how to create and manage capacity reservations to meet high availability and fault tolerance requirements.

NEW QUESTION # 23

Which statement is NOT correct regarding the Oracle Cloud Infrastructure (OCI) File System snapshots?

- A. Snapshots are accessible under the root directory of the file system at `.snapshot/name`.
- B. Even if nothing has changed within the file system since the last snapshot was taken, a new snapshot consumes more storage.
- C. Snapshots are a consistent, point-in-time view of your file systems.
- D. Before you can clone a file system, at least one snapshot must exist for the file system.

Answer: B

Explanation:

In OCI File Storage, snapshots are point-in-time, read-only copies of a file system that do not immediately consume additional storage beyond the space needed to track changes.

Incorrect Statement: The statement that a new snapshot consumes more storage even if nothing has changed is incorrect. Snapshots are space-efficient; they only consume additional storage as changes are made to the file system after the snapshot is taken. If no changes are made between snapshots, the storage consumption remains minimal.

Correct Statements:

B. Before cloning a file system, at least one snapshot must exist, as the clone operation relies on this snapshot to create a copy.

C. Snapshots are accessible under the `.snapshot` directory, allowing users to view and restore files from specific snapshots.

D. Snapshots provide a consistent, point-in-time view of the file system, ensuring data integrity.

NEW QUESTION # 24

Which Traffic Management Steering Policy facilitates the distribution of DNS traffic based on the geographical location of end users?

- A. Proximity Steering
- B. IP Prefix Steering
- C. ASN Steering
- **D. Geolocation Steering**

Answer: D

Explanation:

Geolocation Steering in OCI's Traffic Management Steering Policy allows you to distribute DNS traffic based on the geographical location of the end users. This method helps direct users to the nearest regional endpoint, optimizing latency and improving user experience.

Use Cases: Geolocation Steering is commonly used to deliver region-specific content, comply with data residency laws, or optimize service performance by directing traffic to the closest available servers.

Oracle Cloud Infrastructure Documentation: Traffic Management Steering Policies

NEW QUESTION # 25

What would be the total meteredBytes shown by the File Storage service after the hourly update cycle is complete when you overwrite 0.5 GB of a 1 GB file?

- A. 1 GB
- B. 2.5 GB
- C. 0.5 GB
- **D. 1.5 GB**

Answer: D

Explanation:

In Oracle Cloud Infrastructure (OCI) File Storage, when you overwrite a portion of a file, the service does not immediately reclaim the space occupied by the previous version of the file. The total meteredBytes reflects both the original data and the new data written.

Scenario Explanation: You start with a 1 GB file. When you overwrite 0.5 GB of this file, the file system retains both the 0.5 GB of the original file and the new 0.5 GB you wrote.

Calculation: The original 1 GB file contributes 1 GB to meteredBytes. When 0.5 GB is overwritten, the total usage becomes 1.5 GB (1 GB original + 0.5 GB new).

Thus, after the hourly update cycle, the total meteredBytes shown by the File Storage service will be 1.5 GB.

NEW QUESTION # 26

Which is NOT a valid action within the Oracle Cloud Infrastructure (OCI) Block Volume service?

- A. Cloning an existing volume to a new, larger volume.
- **B. Attaching a block volume to an instance in a different availability domain.**
- C. Expanding an existing volume in place with offline resizing.
- D. Restoring from a volume backup to a larger volume.

Answer: B

Explanation:

In Oracle Cloud Infrastructure (OCI), block volumes are designed to be highly flexible and can be used in various ways:

- A. Restoring from a volume backup to a larger volume: This is supported and allows for resizing during the restoration process.
- B. Cloning an existing volume to a new, larger volume: You can clone a block volume and specify a larger size for the new volume.
- C. Expanding an existing volume in place with offline resizing: OCI allows you to increase the size of an existing block volume without needing to take it offline.

Option D is NOT valid because block volumes can only be attached to compute instances within the same availability domain.

Cross-availability domain attachment of block volumes is not supported directly.

NEW QUESTION # 27

.....

PDF version of 1Z0-1072-25 exam questions - being legible to read and remember, support customers' printing request, and allow you to have a print and practice in papers. Software version of 1Z0-1072-25 guide dump - supporting simulation test system, with times of setup has no restriction. Remember this version support Windows system users only. App online version of 1Z0-1072-25 Guide dump -Being suitable to all kinds of equipment or digital devices, supportive to offline exercises on the condition that you practice it without mobile data. Boggled down in review process right now, our 1Z0-1072-25 training materials with three versions can help you gain massive knowledge.
