Identity-and-Access-Management-Architect Exam is ideal for individuals who are responsible for ensuring the security and privacy of sensitive information in their organization.

Salesforce Certified Identity and Access Management Architect Sample

Questions (Q84-Q89):

NEW QUESTION # 84

Universal Containers (UC) operates in Asia, Europe and North America regions. There is one Salesforce org for each region. UC is implementing Customer 360 in Salesforce and has procured External Identity and Customer Community licenses in all orgs. Customers of UC use Community to track orders and create inquiries. Customers also tend to move across regions frequently. What should an identity architect recommend to optimize license usage and reduce maintenance overhead?

- A. Enable Contactless User in all orgs and downgrade users from Experience Cloud license to External Identity license once users have moved out of that region.
- B. Merge three orgs into one instance of Salesforce. This will no longer require maintaining three separate copies of the same customer.
- C. Contacts are required since Community access needs to be enabled. Maintenance is a necessary overhead that must be handled via data integration.
- D. Delete contact/ account records and deactivate user if user moves from a specific region; Sync will no longer be required.

Answer: C

NEW QUESTION # 85

Northern Trail Outfitters (NTO) has a number of employees who do NOT need access Salesforce objects. Trie employees should sign in to a custom Benefits web app using their Salesforce credentials.

Which license should the identity architect recommend to fulfill this requirement?

- A. Identity Verification Credits Add-on License
- B. Identity Only License
- C. Identity Connect License
- D. External Identity License

Answer: B

Explanation:

Explanation

To allow employees to sign in to a custom Benefits web app using their Salesforce credentials, the identity architect should recommend the Identity Only License. The Identity Only License is a license type that enables users to access external applications that are integrated with Salesforce using single sign-on (SSO) or delegated authentication, but not access Salesforce objects or data. The other license types are not relevant for this scenario. References: Identity Only License, User Licenses

NEW QUESTION # 86

A web service is developed that allows secure access to customer order status on the Salesforce Platform. The service connects to Salesforce through a connected app with the web server flow. The following are the required actions for the authorization flow:

1. User Authenticates and Authorizes Access
2. Request an Access Token
3. Salesforce Grants an Access Token
4. Request an Authorization Code
5. Salesforce Grants Authorization Code

What is the correct sequence for the authorization flow?

- A. 1, 4, 5, 2, 3
- B. 4,5,2, 3, 1
- C. 4, 1, 5, 2, 3
- D. 2, 1, 3, 4, 5

Answer: C

Explanation:

Explanation

The web server flow is an OAuth 2.0 authorization code grant type, which follows this sequence of steps:

The client app requests an authorization code from Salesforce by redirecting the user to the authorization endpoint.

The user authenticates and authorizes access to the client app.

Salesforce grants an authorization code and redirects the user back to the client app.
The client app requests an access token from Salesforce by sending the authorization code to the token endpoint.
Salesforce grants an access token and a refresh token to the client app.

NEW QUESTION # 87

Universal Containers(UC) has decided to build a new, highly sensitive application on Force.com platform. The security team at UC has decided that they want users to provide a fingerprint in addition to username/Password to authenticate to this application. How can an architect support fingerprints as a form of identification for Salesforce Authentication?

- A. Use an appexchange product that does fingerprint scanning with native Salesforce identity confirmation.
- B. Use Salesforce Two-factor Authentication with callouts to a third-party fingerprint scanning application.
- C. Use custom login flows with callouts to a third-party fingerprint scanning application.
- D. Use Delegated Authentication with callouts to a third-party fingerprint scanning application.

Answer: C

NEW QUESTION # 88

Universal Containers (UC) has implemented SSO according to the diagram below. Uses SAML while Salesforce Org 1 uses OAuth 2.0. Users usually start their day by first attempting to log into Salesforce Org 2 and then later in the day, they will log into either the Financial System or CPQ system depending upon their job position. Which two systems are acting as Identity Providers?

- A. PingFederate
- B. Salesforce Org 1
- C. Financial System
- D. Salesforce Org 2

Answer: A,B
