You may be complaining that your work abilities can't be recognized or you have not been promoted for a long time. But if you try to pass the CloudSec-Pro exam you will have a high possibility to find a good job with a high income. That is why I suggest that you should purchase our CloudSec-Pro questions torrent. Once you purchase and learn our CloudSec-Pro Exam Materials, you will find it is just a piece of cake to pass the exam and get a better job. You can read the introduction of our CloudSec-Pro exam questions carefully before your purchase. We provide the best service to you and hope you will be satisfied.

Decades of painstaking efforts have put us in the leading position of CloudSec-Pro training materials compiling market, and the excellent quality of our CloudSec-Pro guide torrent and high class operation system in our company have won the common recognition from many international customers for us. With the high class operation system, we can assure you that you can start to prepare for the CloudSec-Pro Exam with our study materials only 5 to 10 minutes after payment since our advanced operation system will send the CloudSec-Pro exam torrent to your email address automatically as soon as possible after payment.

CloudSec-Pro Exam Exercise - CloudSec-Pro Exam Cram Review

The Palo Alto Networks CloudSec-Pro certification exam always gives a tough time to their candidates. So you have to plan well and prepare yourself as per the recommended Palo Alto Networks CloudSec-Pro exam study material. For the quick and complete CloudSec-Pro exam preparation the Itcertkey Palo Alto Networks CloudSec-Pro Practice Test questions are the ideal selection.

With the Itcertkey Palo Alto Networks CloudSec-Pro PDF Questions and practice test software, you will get everything that you need to learn, prepare and pass the difficult CloudSec-Pro exam with good scores.

Palo Alto Networks CloudSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security Operations Center (SOC) Fundamentals: This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI• ML and threat intelligence support incident response, categorization, and prioritization.
Topic 2	<ul style="list-style-type: none">• Cloud Runtime Security: This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.
Topic 3	<ul style="list-style-type: none">• Cortex Fundamentals: This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.
Topic 4	<ul style="list-style-type: none">• Application Security: This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI• CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.
Topic 5	<ul style="list-style-type: none">• Cloud Posture Security: This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.

Palo Alto Networks Cloud Security Professional Sample Questions (Q79-Q84):

NEW QUESTION # 79

What improves product operationalization by adding visibility into feature utilization and missed opportunities?

- A. Alert Center
- B. Adoption Advisor
- C. Alarm Center
- D. Alarm Advisor

Answer: B

Explanation:

The Adoption Advisor is a feature within Prisma Cloud that aims to improve product operationalization. It provides visibility into how features are utilized, identifies unused capabilities, and suggests ways to leverage the full potential of the platform. Therefore, Option A: Adoption Advisor is the correct answer.

NEW QUESTION # 80

The development team wants to block Cross Site Scripting attacks from pods in its environment. How should the team construct the CNAF policy to protect against this attack?

- A. create a Container CNAF policy, targeted at a specific resource, and they should set "Explicitly allowed inbound IP sources" to the IP address of the pod.
- B. create a Container CNAF policy, targeted at a specific resource, check the box for XSS attack protection, and set the action to alert.

- C. create a Host CNAF policy, targeted at a specific resource, check the box for XSS attack protection, and set the action to "prevent".
- D. create a Container CNAF policy, targeted at a specific resource, check the box for XSS protection, and set the action to prevent.

Answer: D

Explanation:

To protect pods in an environment from Cross-Site Scripting (XSS) attacks, the development team should create a Container Cloud Native Application Firewall (CNAF) policy. This policy should be targeted at the specific resource (e.g., a particular pod or set of pods), with the option for XSS protection checked, and the action set to "prevent." This configuration ensures that any XSS attacks directed at the targeted containers are effectively blocked.

NEW QUESTION # 81

Based on the following information, which RQL query will satisfy the requirement to identify VM hosts deployed to organization public cloud environments exposed to network traffic from the internet and affected by Text4Shell RCE (CVE-2022-42889) vulnerability?

* Network flow logs from all virtual private cloud (VPC) subnets are ingested to the Prisma Cloud Enterprise Edition tenant.

* All virtual machines (VMs) have Prisma Cloud Defender deployed.

- A)
- B)
- C)
- D)

- A. Option D
- B. Option B
- C. Option A
- D. Option C

Answer: C

Explanation:

The RQL query in Option A is designed to identify VM hosts that are exposed to internet traffic and are affected by the Text4Shell RCE vulnerability (CVE-2022-42889). This query looks for network flow records with byte transfers indicating activity and filters for resources with host vulnerability findings sourced from 'Prisma Cloud'. It also checks for exposure to suspicious or internet IPs, satisfying the criteria for the given scenario.

NEW QUESTION # 82

Which three actions are available for the container image scanning compliance rule? (Choose three.)

- A. Snooze
- B. Alert
- C. Block
- D. Allow
- E. Ignore

Answer: B,C,E

Explanation:

The Prisma Cloud documentation specifies the actions that can be taken for container image scanning compliance rules as:

* C. Block: This action prevents the use of a container image if it fails to meet the defined compliance criteria.

* D. Ignore: This action allows the image to bypass the compliance check, effectively overlooking the identified issues.

* E. Alert: This action triggers an alert to notify the relevant stakeholders about the compliance status of the container image.

These actions are integral to Prisma Cloud's governance capabilities, allowing organizations to enforce their security and compliance policies effectively. By setting up these rules, teams can ensure that only images that comply with their standards are deployed, while also having the flexibility to ignore certain images or receive alerts for further investigation.

NEW QUESTION # 83

Given the following RQL:

event from cloud.audit_logs where operation IN ('CreateCryptoKey', 'DestroyCryptoKeyVersion', 'v1.compute.disks.createSnapshot')

Which audit event snippet is identified?

- A.

```
"request": { "resource": "604173093072", "@type": "type.googleapis.com/google.iam.v1.SetIamPolicyRequest", "policy": { "bindings": [
```

- B.

```
{ "Statement": [ { "Action": "*", "Effect": "Allow", "Resource": "*" } ], "Version": "2012-10-17"
```

- C.

```
"payload": { "requestMetadata": { "callerSuppliedUserAgent": "terraform/0.14.0 (+https://www.terraform.io) Terraform-Plugin-SDK/2.1.0 terraform-provider-google/3.50.0,gzip(gfe)", "callerIp": "34.265.226.252" }, "request": { "@type": "type.googleapis.com/compute.disks.createSnapshot" },
```

Answer: C

Explanation:
