Our company has successfully created ourselves famous brands in the past years, and all of the CDCS-001 valid study guide materials from our company have been authenticated by the international authoritative institutes and cater for the demands of all customers at the same time. We are attested that the quality of the CDCS-001 Test Prep from our company have won great faith and favor of customers. We persist in keeping creating the best helpful and most suitable CDCS-001 study practice question for all customers.

Individuals who hold the GAQM CDCS-001 certification are in high demand and can expect to earn a competitive salary. Certified Data Centre Specialist (CDCS) certification is recognized globally and demonstrates an individual's commitment to continuous learning and professional development in the data center industry. The CDCS certification is an excellent choice for IT professionals who want to enhance their skills, increase their earning potential, and advance their careers in the field of data center management.

The CDCS certification is highly valued by employers and is recognized globally, making it an excellent addition to any data centre professional's resume. Certified Data Centre Specialist (CDCS) certification demonstrates the candidate's dedication and expertise in data centre design and management, and provides them with a competitive edge in the job market. Additionally, the certification is a gateway to higher-level certifications, such as the Certified Data Centre Expert (CDCE) and the Certified Data Centre Professional (CDCP), allowing professionals to further specialize and advance their careers in the data centre industry.

## GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q54-Q59):

### NEW QUESTION # 54

Which one of the following is an overall consideration for physical security?

- A. Identify the problem
- **B. Define the problem**
- C. Apply the technology
- D. Apply the solution

**Answer: B**

Explanation:

Explanation

Defining the problem is an important overall consideration for physical security. This process involves identifying and analyzing the threats and vulnerabilities that could potentially affect the security of the system, as well as determining what steps need to be taken to mitigate these risks. This process should be done before any other steps are taken to ensure physical security, as it helps to ensure that the security measures are tailored to the specific needs of the system.

### NEW QUESTION # 55

The distance that a signal's energy can travel in the time it takes for one cycle to occur is called the signal's:

- **A. wavelength**
- B. frequency
- C. amplitude
- D. period

**Answer: A**

Explanation:

Wavelength is a measure of the distance that a signal's energy can travel in the time it takes for one cycle of the signal to occur. It is calculated by dividing the speed of light by the frequency of the signal. Wavelength is generally expressed in meters (m).

### NEW QUESTION # 56

Which type of power can be a source available to the data center that takes over the function of supplying when utility power is unavailable?

- A. Active
- B. Alternate
- **C. Standby**
- D. Passive

**Answer: C**

Explanation:

Explanation

Standby power, also known as backup power, is a type of power that can be a source available to the data center that takes over the function of supplying when utility power is unavailable. Standby power systems are designed to provide power to critical loads in the event of a power outage, and can include generators, uninterruptible power supplies (UPS), and batteries. Standby power systems can be used to provide power to the data center for a short period of time, such as a few hours or days, until utility power is restored.

Passive, Active and Alternate are not specific type of power sources used in data center. They are terms used in different context and have different meaning.

### NEW QUESTION # 57

Which one of the following measures the real power drawn by the load equipment?

- A. Volts
- B. Amperes
- C. Watts
- D. Amps

**Answer: C**

Explanation:

Explanation

Watts measures the real power drawn by the load equipment and is determined by multiplying the volts and amps of the load

### NEW QUESTION # 58

Every air distribution system has a \_\_\_\_\_ system and a \_\_\_\_\_ system

- A. Supply, Reverse
- B. Supply, Return
- C. Supply, Release
- D. Maintenance, Regulation

**Answer: B**

Explanation:

Explanation

Every air distribution system has a supply system, which delivers conditioned air to the space, and a return system, which collects the air from the space and returns it to the air handling unit. The return system is responsible for providing the necessary negative pressure in the space to ensure proper air circulation.

### NEW QUESTION # 59

.....
