

NCP-BC最新題庫，NCP-BC考古題介紹

Nutanix NCP-BC 認證考試在IT行業裏有著舉足輕重的地位，相信這是很多專業的IT人士都認同的。通過Nutanix NCP-BC 認證考試是有一定的難度的，需要過硬的IT知識和經驗，因為畢竟Nutanix NCP-BC 認證考試是權威的檢驗IT專業知識的考試。如果你拿到了Nutanix NCP-BC 認證證書，你的IT職業能力是會被很多公司認可的。VCESoft在IT培訓行業中也是一個駐足輕重的網站，很多已經通過Nutanix NCP-BC 認證考試的IT人員都是使用了VCESoft的幫助才通過考試的。這就說明VCESoft提供的針對性培訓資料是很有效的。如果你使用了我們提供的培訓資料，您可以100%通過考試。

Nutanix NCP-BC 考試大綱：

主題	簡介
主題 1	• Test Business Continuity & Disaster Recovery (BCDR) Solutions: Covers validating DR readiness by executing planned and unplanned failovers, testing connectivity and throughput between sites, and verifying recovery plan accuracy.
主題 2	• Interpret and Configure Business Continuity & Disaster Recovery (BCDR) Requirements: Covers planning and configuring DR solutions by evaluating RPO needs, resource limits, security settings, recovery plans, and network • storage requirements across various Nutanix environments.
主題 3	• Perform Business Continuity & Disaster Recovery (BCDR) Tasks: Covers hands-on execution of DR operations including self-service restores, snapshot recovery, failover tasks, post-failover cleanup, and migrating from legacy protection domains to modern protection policies.
主題 4	• Troubleshoot Business Continuity & Disaster Recovery (BCDR) Failures: Covers diagnosing and resolving DR failures related to network issues, replication errors, third-party backup problems, and misconfigured DR setups.

專業的NCP-BC最新題庫和資格考試中的領先提供商和最新更新的NCP-BC考古題介紹

最新的Nutanix NCP-BC考試是最受歡迎的認證之一，很多考生都沒有信心來獲得此認證，VCESoft保證我們最新的NCP-BC考古題是最適合您需求和學習的題庫資料。無論您是工作比較忙的上班族，還是急需認證考試的求職者，我們的Nutanix NCP-BC考古題都適合您們使用，保證100%通過考試。我們還提供一年免費更新服務，一年之內，您可以獲得您所購買的NCP-BC更新后的新版本，這是不錯的選擇！

最新的 NCP-BC NCP-BC 免費考試真題 (Q98-Q103):

問題 #98

An administrator notices that VM replication from ClusterA to ClusterB fails consistently at the same point during the replication job. The following observations are noted by the administrator:

The Prism dashboard shows the replication job failing during snapshot creation.

ClusterB storage pool and container usage is under 80%, well below capacity.

Network latency/Pings between ClusterA and ClusterB averages 3ms, with occasional spikes to 25ms.

VM event logs indicate frequent I/O timeout errors during the replication window.

Both clusters are running compatible AOS versions.

What is the most likely cause for the failing replications?

- A. Network instability impacting snapshot replication.
- **B. Misconfigured/Overlapping replication schedules.**
- C. Required Nutanix TCP replication ports are blocked.
- D. Insufficient cluster storage on Cluster

答案： B

問題 #99

An administrator is validating a newly created Recovery Plan and receives the following warning:

IP addresses xxx.xxx.xxx.xxx cannot be preserved/mapped for VM REPORTVM01.

IP addresses cannot be preserved/mapped for entities

IP might be already in use or will be used by some other VM for recovery. IP cannot be mapped.

Only one IP address can be preserved for a vNIC in an IP address management enabled network.

What can the administrator do to resolve this warning without changing the existing IP address assigned to the VM?

- A. Disable IPAM on the recovery site subnet to allow Nutanix DR to preserve static IP addresses during failover.
- B. Add an additional vNIC to the VM and assign the IP address to the new vNIC to bypass the IPAM conflict.
- C. Remove and re-add the VM to the Recovery Plan to trigger a fresh IP address mapping validation.
- **D. Configure Custom VM IP Mapping in the Recovery Plan to define explicit IP address mapping for the VM.**

答案： D

問題 #100

An administrator is migrating from a Protection Domain-based deployment to a Prism Central (PC)-based deployment. What occurs if a snapshot is deleted before the protection policy is applied to the migrated entities?

- A. PC pauses the migration until the snapshot is manually restored from a backup.
- **B. The recovery points associated with that snapshot won't be available for the deployment.**
- C. The migration will automatically fail and will revert all entities to the original Protection Domain.
- D. PC automatically recreates the deleted snapshot using the new configuration.

答案： B

問題 #101

An organization is implementing a Disaster Recovery solution to protect critical workloads by failing them over to a NC2-on-Azure cluster.

The NC2 environment utilizes Flow Virtual Networking (FVN) for overlay networking. The administrator needs to ensure that when VMs failover to Azure, their IP addresses are predictable and consistent with the application requirements.

Which configuration strategy should the administrator use in the Recovery Plan to achieve predictable IP assignment for the recovered VMs?

- A. Configure In-Guest scripts for NGT to maintain the static IP assignments.
- **B. Configure custom IP mapping to assign specific IP addresses to the VMs.**
- C. Rely on the IPAM networks of the NC2 cluster to maintain the IP assignments.
- D. Rely on the default behavior where the last octet of the source IP is preserved.

答案: B

問題 #102

An administrator is concerned about the operational overhead of manually creating and managing categories across both the primary and recovery sites to ensure Recovery Plans function correctly during failover and failback.

What Nutanix Disaster Recovery behavior minimizes this concern?

- **A. Categories are automatically synchronized to the recovery site AZ when they are specified in a Recovery Plan.**
- B. Categories must be manually replicated using the Prism Central API between sites to ensure consistency.
- C. Categories only need to be configured at the recovery site since that is where failover operations are executed.
- D. Recovery Plans replicate categories only during an active failover event to minimize replication traffic.

答案: A

問題 #103

.....

你對自己現在的工作滿意嗎？對自己正在做的事情滿意嗎？想不想提升自己的水準呢？多掌握一些對工作有用的技能吧。那麼，在IT領域工作的你，當然是應該選擇參加IT認定考試獲得認證資格了。因為這樣可以更好地提升你自己。而且，最重要的是，你也可以向別人證明你掌握了更多的工作技能。那麼，快來參加Nutanix的NCP-BC考試吧。這個考試可以幫助你實現你自己的願望。對通過這個考試沒有信心也沒關係。因為你可以來VCESoft找到你想要的幫手和準備考試的工具。VCESoft的考試資料一定能幫助你獲得NCP-BC考試的認證資格。
