Actual Mule-Dev-301 Test Material Makes You More Efficient - ActualCollection

Our Salesforce Certified MuleSoft Developer II exam question has been widely praised by all of our customers in many countries and our company has become the leader in this field. Our product boost varied functions and they include the self-learning and the self-assessment functions, the timing function and the function to stimulate the exam to make you learn efficiently and easily. There are many advantages of our Mule-Dev-301 Study Tool. To understand the details of our product you have to read the introduction of our product as follow firstly.

Salesforce Certified MuleSoft Developer II Sample Questions (Q42-Q47):

NEW QUESTION # 42

Refer to the exhibit.

What required changes can be made to give a partial successful response in case the United Airlines API returns with a timeout?

- A. Add Flow Reference components inside a Try scope
Set the payload to a default value " inside the error handler using the On Error Propagate scope
- **B. Add a Scatter-Gather component inside a Try scope.
Set the payload to a default value 'Error' inside the error handler using the On Error Continue scope.**
- C. Add Flow Reference components inside a Try scope.
Set the payload to a default value" insider the error handler using the ON Error Continue scope
- D. Add a Scatter-gather component inside a Try scope.
Set the payload to a default value 'Error' inside the error handler using the On Error Propagate scope.

Answer: B

Explanation:

To give a partial successful response in case the United Airlines API returns with a timeout, the developer should add a Scatter-Gather component inside a Try scope, and set the payload to a default value 'Error' inside the error handler using the On Error Continue scope. A Scatter-Gather component allows sending multiple requests concurrently and aggregating the responses into an array. A Try scope allows handling errors that occur within it using an error handler. An On Error Continue scope allows continuing the flow execution after handling an error. Therefore, by using these components, the developer can send requests to both APIs in parallel, handle any timeout errors from United Airlines API, and return a partial response with a default value for that API.

Reference: <https://docs.mulesoft.com/mule-runtime/4.3/scatter-gather-concept> <https://docs.mulesoft.com/mule-runtime/4.3/try-scope-concept> <https://docs.mulesoft.com/mule-runtime/4.3/on-error-continue-concept>

NEW QUESTION # 43

What is the MuleSoft recommended method to encrypt sensitive property data?

- A. The encryption key should be identical for all environments and the sensitive data should be different for each environment
- B. The encryption key should be identical for all environments
- **C. The encryption key and sensitive data should be different for each environment**
- D. The encryption key should be different for each environment and the sensitive data should be the same for all environments

Answer: C

Explanation:

The MuleSoft recommended method to encrypt sensitive property data is to use the Secure Properties Tool that comes with Anypoint Studio. This tool allows encrypting properties files with a secret key and then decrypting them at runtime using the same

key. The encryption key and sensitive data should be different for each environment to ensure security and avoid accidental exposure of sensitive data. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/secure-configuration-properties>

NEW QUESTION # 44

The Center for Enablement team published a common application as a reusable module to the central Nexus repository. How can the common application be included in all API implementations?

- A. Add a Maven dependency in the POM file with jar as <classifier>
- B. Download the common application from Nexus and copy it to the src/main/resources folder in the API
- C. Add a Maven dependency in the POM file with multiple-plugin as <classifier>
- D. Copy the common application's source XML file and put it in a new flow file in the src/main/mule folder

Answer: A

Explanation:

To include a common application as a reusable module in all API implementations, the developer should add a Maven dependency in the POM file with jar as <classifier>. This way, the developer can reuse Mule code from another application by packaging it as a JAR file and adding it as a dependency in the POM file of the API implementation. The classifier element specifies that it is a JAR file. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/mmp-concept#add-a-maven-dependency-to-the-pom-file>

NEW QUESTION # 45

The HTTP Request operation raises an HTTP CONNECTIVITY error. Which HTTP status code and body are returned to the web client?

- A. HTTP Status Code:200.
Body 'Error in processing your request'
- B. HTTP Status Code:500.
Body 'The HTTP CONNECTIVITY Error description'
- C. HTTP Status Code:500.
Body 'Error in processing your request'
- D. HTTP Status Code:500.
Body 'Error in processing your request'

Answer: D

Explanation:

When the HTTP Request operation raises an HTTP CONNECTIVITY error, it triggers an on-error-continue handler that sets a payload with 'Error in processing your request!'. Since no status code is explicitly set in this handler, it defaults to 500 (INTERNAL SERVER ERROR). Therefore, the web client receives an HTTP response with status code 500 and body 'Error in processing your request!'. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/error-handling#on-error-continue>

NEW QUESTION # 46

In a Mule project, Flow-1 contains a flow-ref to Flow-2 depends on data from Flow-1 to execute successfully. Which action ensures the test suites and test cases written for Flow-1 and Flow-2 will execute successfully?

- A. Use 'After Test Case' to produce the data needed from Flow-1 test cases to pass to Flow-2 test cases
- B. Use "Set Event to pass the input that is needed, and keep the test cases for Flow-1 and Flow-2 independent"
- C. Use "Before Test Case" To collect data from Flow-1 test cases before running Flow-2 test cases
- D. Chain together the test suites and test cases for Flow-1 and Flow-2

Answer: B

Explanation:

To ensure the test suites and test cases written for Flow-1 and Flow-2 will execute successfully, the developer should use a Set Event processor to pass the input that is needed by Flow-2, and keep the test cases for Flow-1 and Flow-2 independent. This way, the developer can isolate the testing of each flow and avoid coupling them together. Reference: <https://docs.mulesoft.com/munit/2.3/munit-test-flow>

NEW QUESTION # 47

.....

By using ActualCollection Mule-Dev-301 exam questions, you will be able to understand the real exam Mule-Dev-301 scenario. It will help you get verified Mule-Dev-301 answers and you will be able to judge your Mule-Dev-301 preparation level for the Mule-Dev-301 exam. More importantly, it will help you understand the real Mule-Dev-301 exam feel. You will be able to check the real exam scenario by using this specific Mule-Dev-301 Exam PDF questions. Our Salesforce experts are continuously working on including new Mule-Dev-301 questions material and we provide a guarantee that you will be able to pass the Mule-Dev-301 exam on the first attempt.

Mule-Dev-301 Training Questions: <https://www.actualcollection.com/Mule-Dev-301-exam-questions.html>

You may want to own a Mule-Dev-301 certificate to prove that you are competent and boost excellent practical abilities in some certain area, And with high pass rate as 98% to 100%, you will be bound to pass the exam as long as you choose our Mule-Dev-301 Dumps preparation questions, The former users reach a conclusion that our Mule-Dev-301 study materials are commendable and they take the second purchase when they need other real questions, Salesforce Mule-Dev-301 Dump Collection As an old saying goes, once bitten, twice shy, with so many awful experiences with those inferior exam files, aren't you afraid to try them again?

I achieved my goal to qualify for the professional Mule-Dev-301 Training Questions studies with the help of this website, Look out, Dreamweaver, You may want to own a Mule-Dev-301 certificate to prove that you are competent and boost excellent practical abilities in some certain area.

Salesforce Mule-Dev-301 Exam Questions in Convenient PDF Format

And with high pass rate as 98% to 100%, you will be bound to pass the exam as long as you choose our Mule-Dev-301 Dumps preparation questions, The former users reach a conclusion that our Mule-Dev-301 study materials are commendable and they take the second purchase when they need other real questions.

As an old saying goes, once bitten, twice shy, Mule-Dev-301 with so many awful experiences with those inferior exam files, aren't you afraid to try them again, Our Mule-Dev-301 quiz torrent materials are time-tested products with high quality and efficient contents for your using experience.
