FS-Con-101資格試験、FS-Con-101練習問題、FS-Con-101過去問、Salesforce Certified Field Service Consultant問題と解答

Xhs1991が提供したSalesforceのFS-Con-101トレーニング資料はシミュレーションの度合いがとても高いから、実際の試験で資料での同じ問題に会うことができます。これは当社のITエリートはすごい能力を持っていることが説明されました。現在、野心家としてのIT職員がたくさんいて、自分の構成ファイルは市場の需要と互換性があることを確保するために、人気があるIT認証試験を通じて自分の夢を実現します。そのようなものとして、SalesforceのFS-Con-101試験はとても人気がある認定試験です。Xhs1991が提供したSalesforceのFS-Con-101トレーニング資料を手にとると、夢への扉はあなたのために開きます。

Salesforce Certified Field Service Consultant 認定 FS-Con-101 試験問題 (Q70-Q75):

質問 # 70

Time sheet entries can be associated to which two objects? Choose 2 answer

- A. Work order

- B. Work order line item
- C. assigned resources
- D. Service resource

正解: A、B

解説:

Time sheet entries are records that track the time spent by a service resource on a work order or a work order line item[28]. Time sheet entries can be associated to work order line items or work orders using lookup fields [29]. Assigned resources are records that assign a service resource to a service appointment[30]. Service resources are records that represent the people or equipment that perform field service tasks[31]. Time sheet entries cannot be associated to assigned resources or service resources directly. 質問 # 71

Universal Containers requires trained inspectors to make three site visits per year to inspect containers at customer sites. These visits must be created 14 days before the next suggested inspection date.

What are two ways 3 Consultant can configure Maintenance Plans to meet the requirement?

Choose 2 answers

- A. Associate a Required Skill called Site Visit to a Maintenance Plan.
- B. Associate 2 Work Type called Site Visit to a Maintenance Plan
- C. Auto-generate Work Orders with a 14 day Generation Horizon.
- D. Auto-generate Work Orders with a 14 day Generation Timeframe.

正解: C、D

解説:

Maintenance Plans are records that define recurring work orders for preventive maintenance such as inspections or tune-ups[188]. Auto-generate Work Orders is a setting that enables or disables the automatic generation of work orders from maintenance plans[189]. Generation Timeframe is a setting that defines how often work orders should be generated from maintenance plans such as daily, weekly, or monthly[190].

Generation Horizon is a setting that defines how far in advance work orders should be generated from maintenance plans such as 7 days or 30 days[191]. Auto-generating Work Orders with a 14 day Generation Timeframe and a 14 day Generation Horizon would allow Universal Containers to automatically generate Work Orders 14 days before the next suggested maintenance date by creating work orders from maintenance plans every 14 days within 14 days of their scheduled date. Associating a Required Skill called Site Visit to a Maintenance Plan would not affect how far in advance work orders are generated from maintenance plans. Required Skills are fields on the maintenance plan object that indicate which skills are needed for performing preventive maintenance[192]. Associating a Work Type called Site Visit to a Maintenance Plan would not affect how far in advance work orders are generated from maintenance plans. Work Types are records that define the standard tasks and duration for a specific type of work[193]. References: https://help.salesforce.com/s/articleView?id=sf.fs_maintenance_plans_overview.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.fs_maintenance_plans_auto_generate_work_orders.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.fs_maintenance_plans_generation_timeframe.htm

質問 # 72

Universal Containers wants to limit their Technicians' view of Work Orders and Service Appointments in the Salesforce Field Service mobile app.

What should a Consultant recommend to control their Technicians' view?

- A. Field Sets
- B. Page Layouts
- C. Mini-Page Layouts
- D. Visualforce Pages

正解: A

解説:

Field Sets allow controlling which fields are displayed on the Work Order and Service Appointment cards in the Salesforce Field Service mobile app. References: https://help.salesforce.com/s/articleView?id=sf.fs_mobile_fields.htm&type=5

質問 # 73

Universal Containers wants their Technicians to create an additional visit to complete unfinished work within the Salesforce Field Service mobile application.

Which approach should a Consultant recommend to meet the requirement?

- A. Define a Quick Action that creates a new Work Order record.
- B. Define a Visualforce page that creates a new Work Order record.
- C. Define a Visualforce page that creates a new Service Appointment record.
- D. Define a Quick Action that creates a new Service Appointment record.

正解: A

解説:

Soft Boundaries and Customer First are two default scheduling policies that meet the requirement of committing preferred resources to accounts and providing prompt service. Soft Boundaries prioritize resources that are assigned to the same account or service territory as the service appointment. Customer First prioritizes resources that have the highest customer satisfaction rating. References: https://help.salesforce.com/s/articleView?id=sf.fsl_scheduling_policies.htm&type=5

質問 # 74

Universal Containers wants to provide a view of emergency work that is only visible to dispatchers. What should the consultant do to meet the requirement?

- A. Custom report in a private report folder
- B. Custom list view
- C. Custom lightning component
- D. Custom gantt filter

正解: D

解説:

Custom gantt filters are filters that allow dispatchers to view service appointments based on specific criteria such as status, priority, or custom fields[67]. Creating a custom gantt filter would allow providing a view of emergency work that is only visible to dispatchers by setting up criteria such as status equals emergency and sharing the filter with dispatchers only[68]. Custom lightning component is a component that allows developers to create custom user interfaces using Lightning Web Components or Aura Components[69]. Creating a custom lightning component would require coding and would not leverage the existing gantt chart functionality. Custom report in a private report folder is a report that allows users to view data based on specific criteria such as objects, fields, filters, or charts[70]. Creating a custom report in a private report folder would not provide a view of emergency work on the gantt chart and would not allow dispatchers to schedule or reschedule service appointments. Custom list view is a list view that allows users to view records based on specific criteria such as filters, fields, or sorting[71]. Creating a custom list view would not provide a view of emergency work on the gantt chart and would not allow dispatchers to schedule or reschedule service appointments.
