Salesforce Certified Education Cloud Consultant Sample Questions (Q190-Q195):

NEW QUESTION # 190
A university using the Education Data Architecture (EDA) finds that some addresses in the system have minor data entry errors that need to be corrected. The university wants to ensure that the system to existing rather than creating new address records.
What should the do to meet this?

- A. Check the Disable Error Handling setting in EDA System Settings.
- B. Enable the EDA Setting for Simple Address Change Treated as Update.
- C. Disable Multi-Addresses in EDA Account and Contact Settings.
- D. Check the Do Not Update before saving the

Answer: B

Explanation:

According to the Salesforce Education Cloud Consultant documents, the EDA Setting for Simple Address Change Treated as Update allows the system to update existing address records when a user makes a minor change to an address, such as correcting a typo or adding an apartment number. This prevents the creation of duplicate address records and ensures data quality. If this setting is disabled, the system will create a new address record whenever an address is changed, even if the change is minor. Reference: EDA Documentation: Address Management
Trailhead: Education Data Architecture Basics

NEW QUESTION # 191

A university is migrating its legacy system to Salesforce Education Data Architecture (EDA) environment. The existing system groups students by colleges within the university. The system admin has selected the Educational Institution record type in the EDA Default Account Model in EDA setting.

Which consideration should the consultant discuss with the university?

- A. Contact are private only to Administrative Account record type.
- B. The recommended default Account record is the Administrative Account record type.
- C. Multiple address management can only be enabled for the House Account record type.
- D. A new Program Enrollment record will automatically be created when a new Contact is created.

Answer: C

Explanation:
The consultant should discuss with the university that the recommended default Account record is the Administrative Account record type, not the Educational Institution record type. The Administrative Account record type is used to group Contacts that are related to an educational institution, such as students, faculty, staff, and alumni. The Educational Institution record type is used to represent another educational institution that is not the primary one, such as a high school or a partner school. The system admin should select the Administrative Account record type in the EDA Default Account Model in EDA Settings to group students by colleges within the university. The other options are not considerations that the consultant should discuss with the university. Reference:

https://powerofus.force.com/s/article/EDA-Settings

NEW QUESTION # 192

A college is interested in best practice and tips on Salesforce date foverance.
Which resource should the consultant recommend?

- A. IdeaExchange
- B. AppExchange
- C. Partner Community
- D. Trailblazer Community

Answer: D

Explanation:
The Trailblazer Community is a resource that the consultant can recommend for best practices and tips on Salesforce data governance. The Trailblazer Community is an online platform where customers can connect with other Salesforce users, experts, and partners, and share their knowledge and experience. The Trailblazer Community also provides access to groups, events, blogs, webinars, and resources related to various topics, including data governance. The IdeaExchange, the Partner Community, and the AppExchange are not resources that provide best practices and tips on Salesforce data governance. Reference:
https://trailblazer.salesforce.com/
https://trailhead.salesforce.com/en/content/learn/modules/trailblazer_community_basics

NEW QUESTION # 193

A college is using Salesforce to support its recruitment and admissions processes. The college will need to have an online application form, automated bot service, and online application management.
Which two solutions should the consultant recommend?
Choose 2 answers

- A. Admissions Connect

- B. Interaction Studio
- C. Third-party form builder app
- D. Digital Engagement

Answer: A,C

Explanation:
A third-party form builder app and Admissions Connect are two solutions that the consultant can recommend to meet the requirement of having an online application form, automated bot service, and online application management. A third-party form builder app is an application that provides additional features and solutions for Salesforce. There are many third-party form builder apps on the AppExchange that offer online form creation and submission capabilities, such as web forms, surveys, or quizzes, and capturing data from them in Salesforce. The consultant can help the college choose an app that meets their needs and budget. Admissions Connect is a solution that extends EDA to meet the needs of higher education admissions and enrollment. Admissions Connect provides features such as automated bot service, online application management, application review, and decision delivery. Digital Engagement and Interaction Studio are not solutions that can meet the requirement of having an online application form, automated bot service, and online application management. Reference:

https://www.salesforce.org/products/admissions-connect/overview/
https://trailhead.salesforce.com/en/content/learn/modules/admissions-connect-basics

NEW QUESTION # 194
A university plans to expand its Salesforce Education Data Architecture (EDA) environment to support student services for all of its schools. The university want Contact's family information.
Which action should the consultant take?

- A. Set the Default Account Model to Household.
- B. Set the Default Account Model to Administrative.
- C. Populate the Account field with the Household record.

Answer: A

Explanation:
Setting the Default Account Model to Household will allow the university to capture Contact's family information using Household Accounts, which are automatically created when new Contacts are added. Setting the Default Account Model to Administrative will create Administrative Accounts, which are used to group Contacts by their affiliation to an educational institution or organization, not by their family relationship. Populating the Account field with the Household record is not a valid action because the Account field is read-only and automatically populated based on the Default Account Model. Reference:
