However, when asked whether the EC-COUNCIL latest dumps are reliable, costumers may be confused. For us, we strongly recommend the 312-39 exam questions compiled by our company, here goes the reason. On one hand, our 312-39 test material owns the best quality. When it comes to the study materials selling in the market, qualities are patchy. But our 312-39 test material has been recognized by multitude of customers, which possess of the top-class quality, can help you pass exam successfully. On the other hand, our 312-39 Latest Dumps are designed by the most experienced experts, thus it can not only teach you knowledge, but also show you the method of learning in the most brief and efficient ways.

This type of EC-COUNCIL 312-39 actual exam simulation helps to calm your exam anxiety. Since the software keeps a record of your attempts, you can overcome mistakes before the EC-COUNCIL 312-39 final exam attempt. Knowing the style of the EC-COUNCIL 312-39 examination is a great help to pass the test and this feature is one of the perks you will get in the desktop practice exam software.

100% Pass Trustable EC-COUNCIL - 312-39 Reliable Exam Pdf

With 312-39 practice materials, you don't need to spend a lot of time and effort on reviewing and preparing. For everyone, time is precious. Office workers and mothers are very busy at work and home; students may have studies or other things. Using 312-39

Guide questions, you only need to spend a small amount of time to master the core key knowledge, pass the 312-39 exam, and get a certificate.

EC-COUNCIL Certified SOC Analyst (CSA) Sample Questions (Q159-Q164):

NEW QUESTION # 159
Robin, a SOC engineer in a multinational company, is planning to implement a SIEM. He realized that his organization is capable of performing only Correlation, Analytics, Reporting, Retention, Alerting, and Visualization required for the SIEM implementation and has to take collection and aggregation services from a Managed Security Services Provider (MSSP).
What kind of SIEM is Robin planning to implement?

- A. Self-hosted, MSSP Managed
- B. Self-hosted, Self-Managed
- C. Hybrid Model, Jointly Managed
- D. Cloud, Self-Managed

Answer: A

NEW QUESTION # 160
Properly applied cyber threat intelligence to the SOC team help them in discovering TTPs.
What does these TTPs refer to?

- A. Tactics, Techniques, and Procedures
- B. Targets, Threats, and Process
- C. Tactics, Targets, and Process
- D. Tactics, Threats, and Procedures

Answer: A

Explanation:
TTPs in the context of cybersecurity and SOC (Security Operations Center) refer to the patterns of activities or methods associated with a specific threat actor or group of threat actors. Understanding TTPs is crucial for the SOC team as it allows them to identify, prepare, and respond to potential threats more effectively. Here's a breakdown of the term:
* Tactics: The adversary's overall strategy or the 'what' they are trying to accomplish.
* Techniques: The general methods the adversary uses to achieve their tactical goals.
* Procedures: The specific, detailed methods the adversary employs, which can include tools, scripts, commands, and sequences of actions.
By analyzing TTPs, SOC teams can develop a more proactive defense posture, anticipate likely attack methods, and implement appropriate countermeasures.
References: The EC-Council's Certified SOC Analyst (CSA) program covers the fundamentals of SOC operations, including the identification and validation of intrusion attempts, which would involve understanding TTPs12. This program is designed for current and aspiring Tier I and Tier II SOC analysts to achieve proficiency in performing entry-level and intermediate-level operations, where the knowledge of TTPs is essential12.

NEW QUESTION # 161
Which of the following technique involves scanning the headers of IP packets leaving a network to make sure that the unauthorized or malicious traffic never leaves the internal network?

- A. Egress Filtering
- B. Throttling
- C. Rate Limiting
- D. Ingress Filtering

Answer: A

Explanation:
Egress filtering is a network security measure that involves scanning the headers of IP packets as they leave a network. The purpose of this technique is to ensure that unauthorized or malicious traffic does not exit the internal network. This is achieved by implementing rules that define which types of traffic are allowed to leave the network. By filtering outgoing traffic, egress filtering

helps prevent data exfiltration and blocks the communication of malware with external command-and-control servers.
References: The EC-Council's Certified SOC Analyst (CSA) program covers the fundamentals of SOC operations, including the importance of egress filtering in protecting a network's perimeter. The CSA training and credentialing program provides in-depth knowledge on various SOC processes, such as log management, SIEM deployment, incident detection, and response, which includes the implementation of egress filtering as a security control12.

NEW QUESTION # 162
Which of the following attack inundates DHCP servers with fake DHCP requests toexhaust all available IP addresses?

- A. DHCP Cache Poisoning
- B. DHCP Starvation Attacks
- C. DHCP Spoofing Attack
- D. DHCP Port Stealing

Answer: B

Explanation:
A DHCP Starvation Attack is a type of network attack that aims to deplete the pool of available IP addresses on the DHCP server. The attacker floods the DHCP server with fake DHCP DISCOVER messages using spoofed MAC addresses. If successful, the server will exhaust its address space, denying IP configuration to legitimate clients. This can lead to a denial of service (DoS) for new devices attempting to join the network. Additionally, the attacker may set up a rogue DHCP server to issue malicious IP configurations to clients, potentially redirecting traffic or causing further disruption1.
References: The EC-Council SOC Analyst course and study materials cover various network attacks, including DHCP Starvation Attacks. These resources provide insights into the nature of these attacks, their potential impact, and strategies for prevention and mitigation213.

NEW QUESTION # 163
A SOC team notices malware-related incidents increased over the past six months, primarily targeting endpoints through phishing campaigns. They need to present a report to security leadership to justify investing in advanced email filtering and end-user security training. Which SOC report best supports their case?

- A. Incident report
- B. Real-time monitoring report
- C. Monitoring summary report
- D. Trend analysis report

Answer: D

Explanation:
A trend analysis report is designed to show how incident frequency, types, severity, and impact change over time, which is exactly what leadership needs for investment decisions. The scenario is about demonstrating an increase in malware incidents over six months and linking them to phishing as an entry vector. A trend report can quantify growth rates, highlight recurring patterns, identify peak periods, compare pre- and post-control effectiveness, and estimate business risk (downtime, remediation hours, affected users). This supports a clear business case for budget: if phishing-driven malware is increasing, investments in email filtering and user training directly address the root cause and should reduce future incident volume. A monitoring summary report may provide a snapshot but often lacks time-series depth. A real-time monitoring report focuses on current status and active alerts, not long-term justification. An incident report is typically focused on a single event and is useful for lessons learned but not for demonstrating systemic trends. From a SOC management perspective, trend analysis aligns technical evidence with strategic decisions, making it the most effective report type to support funding for preventive controls and awareness programs.
