## Fortinet FCSS - Network Security 7.4 Support Engineer Sample Questions (Q65-Q70):

### NEW QUESTION # 65

Refer to the exhibit, which shows a partial output of the fssod daemon real-time debug command.

```
# diagnose debug application fssod -l
# diagnose debug enable
[fsso_svr.c:save_result:579] event_id=4768, logon=bobby, domain=FSSO
workstation=, ip=10.124.2.90 port=49215, time=1372061722
```

What two conclusions can you draw from the output? (Choose two.)

- A. FortiGate is frequently polling the workstation, in case the user has logged off.
- B. FortiGate polled this event through TCP port 8000.
- C. FSSO is using agentless polling mode to detect logon events.
- D. Fortinet Single Sign-On (FSSO) is using DC Agent mode to detect logon events.
- E. The collector agent cannot verify if the user is still logged in.

Answer: C,E

Explanation:

The collector agent cannot verify if the user is still logged in.

In agentless polling mode FSSO only reads Kerberos TGT events (e.g. 4768) from the DC's security log, and there's no corresponding "logoff" event - so it cannot confirm when a user logs off.

FSSO is using agentless polling mode to detect logon events.

The blank workstation= field and the use of event ID 4768 indicate that fssod is polling the domain controller's event log rather than receiving pushed events from a DC or collector agent.

### NEW QUESTION # 66

```

reportd 197 S 0.0 2.7 2
cmdbsvr 113 S 0.0 2.4 7
```

Which three pieces of information does the diagnose sys top command provide? (Choose three.)

- A. The miglogd daemon would be on top of the list, if the administrator pressed m on the keyboard.
- B. The miglogd daemon is running on CPU core ID 0.
- C. The cmdbsvr process is occupying 2.4% of the total user memory space.

#### NEW QUESTION # 68

Refer to the exhibit, which shows a partial web filter profile configuration.

**Web filter profile**

Block malicious URLs discovered by FortiSandbox

**Content Filter**

[+ Create New](#) [Edit](#) [Delete](#)

Pattern Type	Pattern	Language	Action	Status
Wildcard	*dropbox*	Western	Exempt	Enable

The URL www.dropbox.com is categorized as File Sharing and Storage. Which action does FortiGate take if a user attempts to access www.dropbox.com?

- A. Based on the URL Filter configuration, FortiGate allows the connection.
- B. Based on the Web Content filter configuration, access to www.dropbox.com would be exempted.
- C. FortiGate blocks the connection, based on the FortiGuard category-based filter configuration.
- D. FortiGate blocks the connection as an invalid URL.
