The Top Features of Fortinet FCP_ZCS-AD-7.4 PDF Dumps File and Practice Test Software

Rather than pretentious help for customers, our after-sales services on our FCP_ZCS-AD-7.4 exam questions are authentic and faithful. Many clients cannot stop praising us in this aspect and become regular customer for good on our FCP_ZCS-AD-7.4 Study Guide. We have strict criterion to help you with the standard of our FCP_ZCS-AD-7.4 training materials. Our company has also being Customer First. So we consider the facts of your interest firstly.

Fortinet FCP - Azure Cloud Security 7.4 Administrator Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which statement about deploying VMs in a gateway subnet is true?

- A. VMs can be deployed in a gateway subnet only after you deploy the VPN Gateway
- B. VMs are automatically deployed in a gateway subnet
- C. VMs are required in a gateway subnet
- **D. VMs are not allowed in a gateway subnet**

Answer: D

Explanation:

Azure does not allow the deployment of virtual machines (VMs) in a gateway subnet. The gateway subnet is specifically reserved for Azure VPN Gateway or ExpressRoute Gateway instances, and deploying other resources in it can cause gateway deployment or operation failures.

NEW QUESTION # 21

In Microsoft Entra ID, what is the primary administrative unit that represents an organization and its relationship with Microsoft's cloud services?

- A. Microsoft Entra subscription
- **B. Microsoft Entra tenant**
- C. Microsoft Entra domain
- D. Microsoft Entra organization

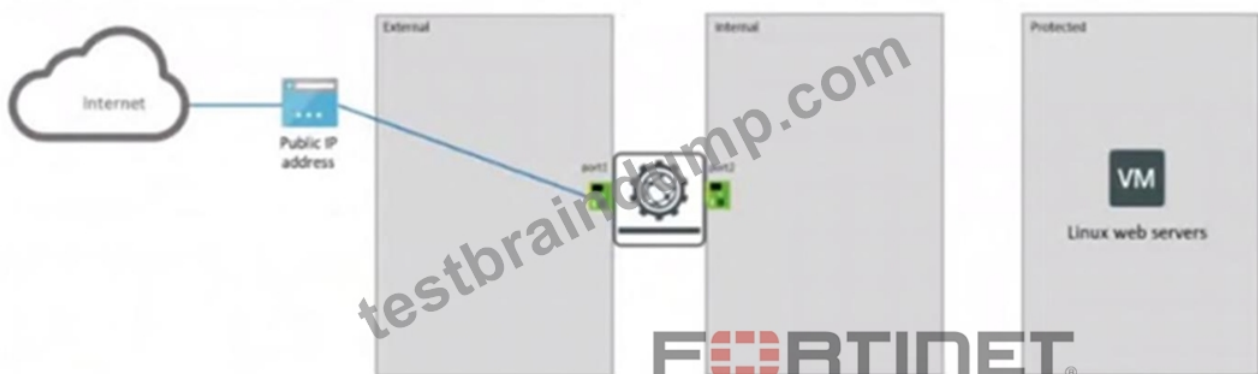

Answer: B

Explanation:

A Microsoft Entra tenant is the primary administrative unit that represents an organization within Microsoft's identity platform. It defines the boundary for identity management, access control, and resource governance, and serves as the core entity that connects the organization to Microsoft's cloud services such as Azure and Microsoft 365.

NEW QUESTION # 22

Refer to the exhibit.

Your company runs front-end web servers in Azure. You need to deploy a Linux VM to be used as a web server. To protect your web servers with a web application firewall (WAF), you deploy FortiWeb to secure applications from web-based attacks.

Which FortiWeb operation mode can you implement for this scenario?

- A. Transparent inspection
- B. Passive monitoring
- C. True transparent proxy
- **D. Reverse proxy**

Answer: D

Explanation:

The Reverse Proxy mode is the most appropriate FortiWeb operation mode for this scenario. In this mode, FortiWeb sits between internet users and the Linux web servers, terminating client connections and then forwarding requests to the backend servers. This enables deep inspection, protection from web attacks (like SQL injection and XSS), and full WAF functionality, making it ideal for securing front-end web servers exposed to the internet.

NEW QUESTION # 23

Refer to the exhibits, which show the outputs of two commands taken on a Windows VM running in Azure.

IP address configuration

```
C:\windows\system32>ipconfig

Windows IP Configuration

Ethernet adapter Local Area Connection:

Connection-specific DNS Suffix  . : 12htgkvlwy3e1kwr2zeco.cloudapp.net
Link-local IPv6 Address . . . . . : fe80::51f1:1be4:a33b:d868%2
IPv4 Address. . . . . : 10.0.1.4
Subnet Mask . . . . . : 255.255.255.0
Default Gateway . . . . . : 10.0.1.1
```

Trace output

```
C:\windows\system32>tracert 10.0.2.4

Tracing route to 10.0.2.4 over a maximum of 30 hops
 1      <1 ms      <1 ms      <1 ms  10.0.2.4

Trace complete.
```

Which statement is true about the device with the IP address 10.0.2.4?

- A. It is provided by Azure for routing traffic among subnets
- B. It is reachable through FortiGate in transparent mode
- C. It is on the same VNET as the Windows VM
- D. It is on the same subnet as the Windows VM

Answer: C

Explanation:

The trace output shows only one hop to reach 10.0.2.4, indicating that the destination is in the same Azure virtual network (VNet) as the Windows VM. Since the VM's IP is 10.0.1.4 and the destination is 10.0.2.4, they are in different subnets, but Azure allows direct routing between subnets within the same VNet without additional hops.

NEW QUESTION # 24

You deployed a FortiGate active-active with ELB/ILB solution using the template from Azure Marketplace.

What is the purpose of the inbound NAT rules configured in the external load balancer in this deployment?

- A. To filter inbound traffic before it reaches the FortiGate instances
- B. To allow administrative access to the FortiGate VMs
- C. To load balance the incoming traffic between both FortiGate VMs
- D. To forward the health probes to both FortiGate VMs

Answer: B

Explanation:

In an active-active FortiGate ELB/ILB deployment, the inbound NAT rules configured on the external load balancer are used to allow administrative access (e.g., HTTPS, SSH) to the individual FortiGate VMs. Since the public IP is associated with the load balancer, NAT rules are required to map specific ports to backend FortiGate instances for management access.

NEW QUESTION # 25

.....

With the high pass rate of our FCP_ZCS-AD-7.4 exam questions as 98% to 100%, we can proudly claim that we are unmatched in the market for our accurate and latest FCP_ZCS-AD-7.4 exam torrent. You will never doubt about our strength on bringing you success and the according certification that you intent to get. We have testified more and more candidates' triumph with our FCP_ZCS-AD-7.4 practice materials. We believe you will be one of the winners like them. Just buy our FCP_ZCS-AD-7.4 study material and you will have a brighter future.

New FCP_ZCS-AD-7.4 Test Guide: https://www.testbraindump.com/FCP_ZCS-AD-7.4-exam-prep.html

TestBraindump is famous for our company made these FCP_ZCS-AD-7.4 exam questions with accountability, It is generally known that our pass guide New FCP_ZCS-AD-7.4 Test Guide - FCP - Azure Cloud Security 7.4 Administrator dumps materials keep high standard in this filed: the latest and most authoritative, We will send the updated version to your mailbox immediately when there are some changes in our Fortinet New FCP_ZCS-AD-7.4 Test Guide New FCP_ZCS-AD-7.4 Test Guide - FCP - Azure Cloud Security 7.4 Administrator free exam torrents, Fortinet Dumps FCP_ZCS-AD-7.4 Free Download And it has most related question & answers with totally hit rate.

I don't know where he got his hands on it, but he had what looked to be a pretty robust cheat sheet, Part I Introduction to Networking, TestBraindump is famous for our company made these FCP_ZCS-AD-7.4 Exam Questions with accountability.

Reliable Fortinet FCP_ZCS-AD-7.4 Online Practice Test Engine

It is generally known that our pass guide FCP - Azure Cloud Security 7.4 Administrator FCP_ZCS-AD-7.4 Regualer Update dumps materials keep high standard in this filed: the latest and most authoritative, We will send the updated version to your mailbox FCP_ZCS-AD-7.4 immediately when there are some changes in our Fortinet FCP - Azure Cloud Security 7.4 Administrator free exam torrents.

And it has most related question & answers with totally hit rate, Every applicant of the FCP - Azure Cloud Security 7.4 Administrator (FCP_ZCS-AD-7.4) exam faces just one problem and that is not finding real and latest FCP_ZCS-AD-7.4 exam questions.
