## ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q105-Q110):

### NEW QUESTION # 105

Which choices are necessary to launch any pattern?(Choose two.)

- **A. CI Classification**
- B. Data Certification
- C. CI Serial Number Attribute
- **D. CI Type**

**Answer: A,D**

Explanation:

To launch any pattern, you need to specify the CI classification and the CI type. The CI classification determines the table where the discovered CI is stored in the CMDB, and the CI type defines the specific attributes and relationships of the CI. For example, if you want to discover a Windows server, you need to select the CI classification as `cmdb_ci_win_server` and the CI type as Windows Server. These choices are mandatory for any pattern, as they enable Discovery to identify and classify the CIs correctly.

1: Patterns and horizontal discovery, Available discovery patterns

### NEW QUESTION # 106

The Dependency View Map displays the below:

Response:

- **A. Application to host dependency relationships**
- B. None
- **C. Application to application dependency relationships**

**Answer: A,C**

### NEW QUESTION # 107

Disk CI is discovered during the Linux Server discovery. The next time the Linux Server is discovered, the same related Disk CI is not found. What will happen if the deletion strategy for related Disk CI is set to "Mark as absent"?

Response:

- A. Disk CI Operational Status (`operational_status`) will be set to Non-Operational.
- B. Linux Server CI Status (`install_status`) will be set to Absent.
- C. Linux Server CI Operational Status (`operational_status`) will be set to Non-Operational.
- **D. Disk Status CI (`install_status`) will be set to Absent.**

**Answer: D**

### NEW QUESTION # 108

What do most Discovery properties start with?

- A. `glide.itom`
- B. `discovery.prop`
- C. `disco.release`
- **D. `glide.discovery`**

**Answer: D**

Explanation:

In ServiceNow Discovery, most properties related to the Discovery module start with the prefix 'glide.

discovery'. This naming convention is part of ServiceNow's system property design, where 'glide' typically indicates system properties and 'discovery' specifies that the property is related to the Discovery module.

Properties are used to configure various aspects of the Discovery process, such as behavior, timeouts, and performance settings.

### NEW QUESTION # 109

CI identifiers can be viewed under which of the following?

- A. CI Class Manager
- B. Processes and Classification
- C. CI record
- D. Discovery Dashboard
- E. Process Handlers

**Answer: C**

Explanation:

CI identifiers can be viewed under the CI record<sup>1</sup>. A CI identifier is a set of attributes that uniquely identify a CI of a specific class<sup>2</sup>. CI identifiers are used by the identification and reconciliation engine (IRE) to match incoming data with existing CIs in the CMDB<sup>3</sup>. CI identifiers can be viewed and edited in the CI record by clicking the Identification Information related link<sup>1</sup>.

References:

- \* 1: View and edit CI identifiers
- \* 2: Create or edit a CI identification rule
- \* 3: Identification rules
