## Tableau Certified Data Analyst Sample Questions (Q106-Q111):

**NEW QUESTION # 106**
Open the link to Book1 found on the desktop. Open the CategoryPercentage worksheet.
Modify the bar chart show the percentage of sales for each Subcategory within every Category. The total percentage for every Category must be 100%.

**Answer:**

Explanation:
Send us your feedback on it

**NEW QUESTION # 107**
You want to connect a Tableau workbook to a dataset in a Microsoft Excel spreadsheet.
What should you do from Tableau Desktop?

- A. From the File menu select New
- B. From the File menu select Import Workbook
- C. From the Data menu select New Data Source
- D. From the Data menu select Replace Data Source

**Answer: C**

Explanation:
To connect a Tableau workbook to a dataset in a Microsoft Excel spreadsheet, you need to select New Data Source from the Data menu. This will open the Connect pane, where you can choose Microsoft Excel as your data source and browse for your spreadsheet file. You can then drag and drop your sheets or tables to join or union them in the data source page. References: https://help.tableau.com/current/pro/desktop/en-us /connect_basic.htm https://help.tableau.com/current/pro/desktop/en-us/connect_excel.htm When connecting to a dataset in Tableau Desktop, you would go to the 'Data' menu and select 'New Data Source'. This allows you to connect to various types of data sources, including Microsoft Excel spreadsheets, where you can then select the specific file you wish to connect to.

**NEW QUESTION # 108**
You want to connect a Tableau workbook to a dataset in a Microsoft Excel spreadsheet.
What should you do from Tableau Desktop?

- A. From the File menu select New
- B. From the File menu select Import Workbook
- C. From the Data menu select New Data Source
- D. From the Data menu select Replace Data Source

**Answer: C**

Explanation:
To connect a Tableau workbook to a dataset in a Microsoft Excel spreadsheet, you need to select New Data Source from the Data menu. This will open the Connect pane, where you can choose Microsoft Excel as your data source and browse for your spreadsheet file. You can then drag and drop your sheets or tables to join or union them in the data source page. References: https://help.tableau.com/current/pro/desktop/en-us/connect_basic.htm https://help.tableau.com/current/pro/desktop/en-us/connect_excel.htm
When connecting to a dataset in Tableau Desktop, you would go to the 'Data' menu and select 'New Data Source'. This allows you to connect to various types of data sources, including Microsoft Excel spreadsheets, where you can then select the specific file you wish to connect to.

**NEW QUESTION # 109**
You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.
You need to configure be shapes to be much larger than the line.
What should you do?

- A. Change Population to a discrete dimension
- B. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset
- C. Duplicate Population Drag the duplicate to the second Marks card and configure the see of the marks independently
- D. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository

**Answer: C**

**NEW QUESTION # 110**

You publish a dashboard tut uses an attract. The extract refreshes every Monday at 10:00.
You need to ensure that the extract also refreshes on the last day of the month at 18:00.
What should you do?

- **A. From Tableau Server select the workbook select Refresh Extracts and then add a new extract refresh**
- B. From Tableau Server. select Schedules and change the priority of the existing schedule
- C. From Tableau Desktop, open the Publish Workbook dialog box and configure the schedule.
- D. From Tableau Server. select Schedules find the schedule of the extract, and change the frequency to the Last day of the month

**Answer: A**

Explanation:
To refresh an extract on Tableau Server, you need to select the workbook, select Refresh Extracts, and then add a new extract refresh. You can specify the frequency and time of the refresh, as well as any custom options. You can have multiple extract refreshes for the same workbook with different schedules. References:
https://help.tableau.com/current/server/en-us/refresh_extracts.htm
https://help.tableau.com/current/server/en-us/refresh_extracts_add.htm
On Tableau Server, you can manage the scheduling of extract refreshes by selecting the specific workbook and configuring additional refresh schedules as needed. This allows for multiple refresh triggers, such as the regular Monday at 10:00 AM schedule, as well as an additional trigger for the last day of the month at 18:00.

**NEW QUESTION # 111**

......
