SAP Certified Associate - Project Manager - SAP Activate Sample Questions (Q31-Q36):

NEW QUESTION # 31

You are transitioning to SAP S/4HANA. In which phase do you adjust custom code?

- A. **Realize**
- B. Prepare
- C. Deploy
- D. Explore

Answer: A

Explanation:

Custom code adjustments are typically made in the Realize phase, where the system configuration and development activities take place. This phase involves adapting custom code to align with SAP S/4HANA's updated architecture and functionalities.

NEW QUESTION # 32

In which workshop do you validate SAP standard functionality and collect delta requirements?

- A. Fit-to-standard**
- B. Solution design
- C. Fit-to-gap
- D. Solution assessment

Answer: A

Explanation:

The Fit-to-Standard workshop is where SAP standard functionality is validated against business requirements, and any additional needs (delta requirements) are identified. This approach ensures alignment with SAP Best Practices while addressing specific business needs.

NEW QUESTION # 33

What findings do you document in the Explore Phase workshops? Note: There are 3 correct answers to this question.

- A. Key business decisions
- B. Confirmation of scope
- C. Detailed design of extensions
- D. Process models
- E. Business role mapping

Answer: A,B,D

Explanation:

* B is correct because key business decisions are one of the findings that you document in the Explore Phase workshops. Key business decisions are the choices that the customer makes regarding their business processes, such as organizational structure, master data, reporting, or integration. These decisions affect the configuration and customization of the solution, and need to be documented and approved by the customer.

* D is correct because confirmation of scope is one of the findings that you document in the Explore Phase workshops. Confirmation of scope is the validation that the customer agrees with the scope items that are selected for their solution, and that they understand the functionality and limitations of each scope item. This helps to ensure that there are no misunderstandings or misalignments between the customer and the project team.

* E is correct because process models are one of the findings that you document in the Explore Phase workshops. Process models are graphical representations of the business processes that show the sequence of activities, roles, and systems involved in executing the process. Process models help to visualize and communicate the business requirements and scenarios, and identify any gaps or extensions that need to be addressed. Verified References:

NEW QUESTION # 34

Which activity helps the project team identify and add user stories to the backlog?

- A. Planning the release and sprints
- B. Conducting the fit-to-standard workshop
- C. Assessing documentation requirements
- D. Benchmarking current business processes

Answer: B

Explanation:

The fit-to-standard workshop is a key activity in SAP Activate that involves aligning SAP standard processes with business requirements. During this workshop, the team identifies gaps and additional requirements, which are then translated into user stories and added to the backlog for implementation.

NEW QUESTION # 35

Which additional scope options does the strategic advisory service for cloud analytics offer? Note: There are 2 correct answers to this question.

- A. Baseline package
- B. Extended package
- C. SAP S/4HANA for Central Finance
- D. SAP Activate methodology for SAP Datasphere

Answer: A,B

Explanation:

The strategic advisory service for cloud analytics includes a Baseline package, which provides fundamental analytics capabilities, and an Extended package, offering additional options for more comprehensive analytics support. These packages provide scalable options for organizations based on their analytics needs.
