Brain Dump Zscaler ZDTA Free | ZDTA Braindumps Pdf

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our ZDTA learning questions in this website. Second, we can assure you that you will get the latest version of our ZDTA training materials for free from our company in the whole year after payment on ZDTA practice materials. Last but not least, we will provide the most considerate after sale service for our customers in twenty four hours a day

seven days a week on our ZDTA exam questions.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	- Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS - SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 2	Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.
Topic 3	Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 4	Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.

Zscaler Digital Transformation Administrator Sample Questions (Q68-Q73):

NEW QUESTION # 68

What is the preferred method for authentication to access oneAPI?

- A. Transport Layer Security (TLS)
- B. OpenID Connect (OIDC)
- C. System for Cross-domain Identity Management (SCIM)
- D. Security Assertion Markup Language (SAML)

Answer: B

Explanation:

The preferred method for authentication to access Zscaler's oneAPI is OpenID Connect (OIDC). OIDC is an identity layer on top of the OAuth 2.0 protocol and provides a modern, secure, and scalable way to authenticate users and services interacting with the API.

The study guide notes that OIDC supports flexible and secure authentication, making it the recommended choice for API access management within Zscaler's platform.

NEW QUESTION # 69

Which of the following statements most accurately describes Zero Trust Connections?

- A. They require IPV6.
- B. They are independent of any network for control or trust.
- C. They are dependent on a fixed / static network environment.
- D. They require that SSH inspection be enabled.

Answer: B

Explanation:

Zero Trust Connections don't rely on the underlying network's security or topology - they enforce access and control at the application level, independent of any fixed or trusted network environment.

NEW QUESTION # 70

Which of the following are types of device posture?

- A. Domain Joined, Process Check, Deception Check
- **B. Unauthorized Modification, OS Version, License Key**
- C. Certificate Trust, File Path, Full Disk Encryption
- D. Detect CrowdStrike, CrowdStrike ZTA score, First name

Answer: B

Explanation:

Types of device posture typically include attributes that reflect the security and compliance status of a device.

This includes Unauthorized Modification, which checks if the device has unauthorized changes; OS Version, verifying if the operating system is up-to-date; and License Key, confirming the validity of software licenses on the device. These attributes help in assessing device trustworthiness for access control.

Other options include some irrelevant attributes such as "First name" or product-specific detections not generally categorized as device posture in Zscaler's framework.

NEW QUESTION # 71

Which of the following are correct request methods when configuring a URL filtering rule with a Caution action?

- **A. Connect, Get, Head**
- B. Get, Delete, Trace
- C. Connect, Post, Put
- D. Options, Delete, Put

Answer: A

Explanation:

When you configure a URL Filtering rule with the Caution action, the only HTTP methods you can select for that rule are CONNECT, GET, and HEAD.

NEW QUESTION # 72

What are common delivery mechanisms for malware?

- A. Malware downloads from web pages
- B. Personal emails, company documents, OneDrive
- C. Spam, exploit kits, USB drives, video streaming
- **D. Phishing, Exploit Kits, Watering Holes, Pre-existing Compromise**

Answer: D

Explanation:

Phishing campaigns, exploit kits, watering#hole sites, and leveraging an existing compromise are all widely observed vectors for delivering malware, as they effectively trick users or exploit vulnerabilities to gain initial footholds.

NEW QUESTION # 73

.....

But our company can provide the anecdote for you--our ZDTA study materials. Under the guidance of our ZDTA exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. We would like to extend our sincere appreciation for you to browse our website, and we will never let you down. The advantages of our ZDTA Guide materials are more than you can imagine. Just rush to buy our ZDTA practice braindumps!
