What of the below is not a feature of API Notebooks?

- **A. Creates a mock service for an API**
- B. API documentation
- C. Creates a client for an API
- D. Perform authenticated live calls on a real server

Answer: A

Explanation:

Correct answer is Creates a mock service for an API

API Notebook is an open source, shareable web application for API documentation, interactive API tutorial and example generation, and a client for your API endpoints. Using API Notebook, you can make requests and quickly transform the responses into readable format. However it cannot be used to mock service for an API.
