So, pass rate is 100% and high quality guarantee!

ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q129-Q134):

NEW QUESTION # 129

Manager responsibilities in formal review includes all except one of the following:

- A. Determines if the review objectives have been met
- B. Decide on the execution of reviews
- C. Planning the review
- D. Allocate time for review

Answer: A

Explanation:

A formal review is a type of review that follows a defined process with formal entry and exit criteria and roles and responsibilities for participants. A formal review can have various roles involved, such as manager, moderator, author, reviewer and scribe. The manager responsibilities in formal review include all except one of the following:

* Planning the review (correct responsibility)

- * Determines if the review objectives have been met (incorrect responsibility)
- * Decide on the execution of reviews (correct responsibility)
- * Allocate time for review (correct responsibility) The responsibility of determining if the review objectives have been met belongs to the moderator role, not to the manager role. Verified References: [A Study Guide to the ISTQB Foundation Level 2018 Syllabus - Springer], Chapter 3, page 28-29.

NEW QUESTION # 130

Which of the following statements is true in regards to how the context of a project affects the testing process?

- **A. The context of testing determines which testing techniques are appropriate for a given project.**
- B. The context of testing only affects the non-functional aspects of testing, such as performance and usability.
- C. The context of testing is not important as long as the test process follows a standard model.
- D. The context of testing is fixed and cannot change during a project lifecycle.

Answer: A

NEW QUESTION # 131

For each test case to be executed, the following table specifies its dependencies and the required configuration of the test environment for running such test case:

□ Assume that CONF1 is the initial configuration of the test environment Based on this assumption, which of the following is a test execution schedule that is compatible with the specified dependencies and allows minimising the number of switches between the different configurations of the test environment
