We have online and offline chat service and if you have any questions for AI-201 exam materials, you can have a chat with us.

Salesforce Certified Agentforce Specialist Sample Questions (Q59-Q64):

NEW QUESTION # 59

An Agentforce agent must retrieve data from Salesforce and an external system. What is the recommended approach?

- A. Use Apex or Flow with external integrations
- B. Copy external data into prompts manually
- C. Disable grounding
- D. Train the LLM on external data

Answer: A

Explanation:

External data access should be handled via Apex or Flow integrations, not direct LLM training.

NEW QUESTION # 60

What should Universal Containers consider when deploying an Agentforce Service Agent with multiple topics and Agent Actions to production?

- A. Ensure all dependencies are included, Apex classes meet 75% test coverage, and configuration settings are aligned with production. Plan for version management and post-deployment activation.
- B. Deploy agent components without a test run in staging, relying on production data for reliable results. Sandbox configuration alone ensures seamless production deployment.
- C. Deploy flows or Apex after agents, topics, and Agent Actions to avoid deployment failures and potential production agent issues requiring complete redeployment.

Answer: A

Explanation:

UC is deploying an Agentforce Service Agent with multiple topics and actions to production.

NEW QUESTION # 61

What considerations should an Agentforce Specialist be aware of when using Record Snapshots grounding in a prompt template?

- A. Email addresses associated with the object are excluded.
- B. Activities such as tasks and events are excluded.
- C. Empty data, such as fields without values or sections without limits, is filtered out.

Answer: B

Explanation:

Record Snapshots grounding in Agentforce prompt templates allows the AI to access and use data from a specific Salesforce record (e.g., fields and related records) to generate contextually relevant responses. However, there are specific limitations to consider. Let's analyze each option based on official documentation.

NEW QUESTION # 62

What is best practice when refining Agent custom action instructions?

- A. Specify the persona who will request the action.
- B. Provide examples of user messages that are expected to trigger the action.
- C. Use consistent introductory phrases and verbs across multiple action instructions.

Answer: B

Explanation:

When refining Agent custom action instructions, it is considered best practice to provide examples of user messages that are expected to trigger the action. This helps ensure that the custom action understands a variety of user inputs and can effectively respond to the intent behind the messages.

NEW QUESTION # 63

An Agentforce needs to create a Sales Email with a custom prompt template. They need to ground on the following data.

Opportunity Products Events near the customer Tone and voice examples

How should the Agentforce Specialist obtain related items?

- A. Call prompt initiated flow to fetch and ground the required data.
- B. Create a flex template that takes the records in question as inputs.
- C. Utilize a standard email template and manually insert the required data fields.

Answer: A

Explanation:

To ground a sales email on Opportunity Products, Events near the customer, and Tone and voice examples, the Agentforce Specialist should use a prompt-initiated flow. This flow can dynamically fetch the necessary data from related records in Salesforce and ground the generative AI output with contextually accurate information.

NEW QUESTION # 64

.....

Real4exams is a professional website. It focuses on the most advanced Salesforce AI-201 for the majority of candidates. With Real4exams, you no longer need to worry about the Salesforce AI-201 exam.
