They also make new supplementary Terraform-Associate-003 learning materials and add prediction of market trend happened in this exam.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q225-Q230):

NEW QUESTION # 225

Which of the following module source paths does not specify a remote module?

- A. Source = "hasicrop/consul/aws"
- **B. Source = "module/consul"**
- C. Source = "github.com/crop/example"
- D. Source = "git@github.com:hasicrop/example.git"

Answer: B

Explanation:

The module source path that does not specify a remote module is source = "module/consul". This specifies a local module, which is a module that is stored in a subdirectory of the current working directory. The other options are all examples of remote modules, which are modules that are stored outside of the current working directory and can be accessed by various protocols, such as Git, HTTP, or the Terraform Registry. Remote modules are useful for sharing and reusing code across different configurations and environments. References = [Module Sources], [Local Paths], [Terraform Registry], [Generic Git Repository], [GitHub]

NEW QUESTION # 226

In a HCP Terraform/Terraform Cloud workspace linked to a version control repository, speculative plan runs start automatically when you merge or commit changes to version control.

- A. False
- **B. True**

Answer: B

Explanation:

Speculative Plans: Terraform Cloud's speculative plan feature runs automatically when changes are detected in a linked VCS repository, enabling users to review potential infrastructure changes without committing them.

Automatic Integration: This feature automates the planning process by triggering when changes are committed, aiding teams in previewing infrastructure changes seamlessly.

For further understanding, see the Terraform Cloud VCS Integration documentation.

NEW QUESTION # 227

When should you write Terraform configuration files for existing infrastructure that you want to start managing with Terraform?

- **A. Before you run terraform Import**
- B. You can import infrastructure without corresponding Terraform code
- C. Terraform will generate the corresponding configuration files for you
- D. After you run terraform import

Answer: A

Explanation:

Explanation

You need to write Terraform configuration files for the existing infrastructure that you want to import into Terraform, otherwise Terraform will not know how to manage it. The configuration files should match the type and name of the resources that you want to import.

NEW QUESTION # 228

Which of these are features of Terraform Cloud? Choose two correct answers.

- A. A web-based user interface (UI)
- B. Automatic backups
- C. Automated infrastructure deployment visualization
- D. Remote state storage

Answer: A,D

Explanation:

Explanation

These are features of Terraform Cloud, which is a hosted service that provides a web-based UI, remote state storage, remote operations, collaboration features, and more for managing your Terraform infrastructure.

NEW QUESTION # 229

What does this code do?

- A. Requires any version of the AWS provider ≥ 3.0
- B. Requires any version of the AWS provider ≥ 3.0 and < 4.0
- C. Requires any version of the AWS provider > 3.0
- D. Requires any version of the AWS provider ≥ 3.0 major release. like 4.1

Answer: B

Explanation:

This is what this code does, by using the pessimistic constraint operator ($\sim>$), which specifies an acceptable range of versions for a provider or module.

NEW QUESTION # 230
