New Juniper JN0-650 Exam Cram - New JN0-650 Test Forum

In the process of using the Enterprise Routing and Switching, Professional (JNCIP-ENT) study training dumps, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our JN0-650 latest questions already have many different kinds of learning materials, users may be confused about the choice, what is the most suitable JN0-650 Test Guide? Believe that users will get the most satisfactory answer after consultation. Our online service staff is professionally trained, and users' needs about JN0-650 test guide can be clearly understood by them. The most complete online service of our company will be answered by you, whether it is before the product purchase or the product installation process, or after using the JN0-650 latest questions, no matter what problem the user has encountered.

Our JN0-650 learning guide boosts many advantages and it is worthy for you to buy it. You can have a free download and tryout of our JN0-650 exam torrents before purchasing. After you purchase our product you can download our JN0-650 study materials immediately. We will send our product by mails in 5-10 minutes. We provide free update and the discounts for the old client. Our JN0-650 Exam Materials boost high passing rate. The JN0-650 learning prep costs you little time and energy and you can commit yourself mainly to your jobs or other important things.

New JN0-650 Test Forum - JN0-650 Valid Test Preparation

With all this reputation, our company still take customers first, the reason we become successful lies on the professional expert team we possess , who engage themselves in the research and development of our JN0-650 learning guide for many years. So we can guarantee that our JN0-650 exam materials are the best reviewing material. As for candidates who possessed with a JN0-650

professional certification are more competitive. The current word is a stage of science and technology, social media and social networking has already become a popular means of JN0-650 exam materials. As a result, more and more people study or prepare for exam through social networking. By this way, our JN0-650 learning guide can be your best learn partner.

Juniper Enterprise Routing and Switching, Professional (JNCIP-ENT) Sample Questions (Q42-Q47):

NEW QUESTION # 42
Exhibit
You want to provide better performance for the video traffic that traverses your network The video traffic enters your network without any class-of-service markings According to Juniper Networks, which two classification methods are performed by the routers shown in the exhibit? (Choose two.)

- A. R1 performs multifield classification.
- B. R2 and R3 perform behavior aggregate classification
- C. R2 and R3 perform multifield classification
- D. R1 performs behavior aggregate classification.

Answer: A,B

Explanation:
The exhibit illustrates a standard end-to-end Class of Service (CoS) path consisting of an edge router (R1) and core/intermediate routers (R2 and R3).
* Edge Classification (Option B):The scenario specifies that video traffic enters the network without any class-of-service markings. Because there are no DSCP or 802.1p bits to inspect, the ingress router (R1) cannot use simple Behavior Aggregate (BA) classification. Instead, it must use Multifield (MF) classification. MF classification allows the router to look deeper into the packet (Source/Destination IP, Protocol, Port numbers) to identify the video stream and assign it to a specific forwarding class. *Core Classification (Option D):Once R1 has identified the traffic, it will typically apply a rewrite rule on its egress interface to mark the packets with a specific CoS value (like a DSCP code). Consequently, the downstream routers (R2 and R3) do not need to perform expensive deep-packet inspection again. They can use Behavior Aggregate (BA) classification, which simply looks at the markings in the packet header to determine the appropriate forwarding priority.
* Option A and C:These are incorrect because BA classification is impossible on unmarked ingress traffic, and performing MF classification in the core is inefficient and not a recommended Juniper design practice for high-speed transit.

NEW QUESTION # 43
What is the primary function of the OSPF Area Border Router (ABR)?

- A. To maintain separate link-state databases for each area it serves
- B. To redistribute routes from other routing protocols into OSPF
- C. To advertise external routes into the OSPF domain
- D. To connect OSPF areas to non-OSPF networks

Answer: A

NEW QUESTION # 44
When configuring connectivity to a VoIP enabled phone, which two statements are correct? (Choose two.)

- A. The telephone device can signal to the switch which VLAN tag it will place on voice traffic.
- B. The switch places voice traffic in the expedited forwarding class by default.
- C. The switch can signal to the phone device which VLAN tag it should use for voice traffic.
- D. The switch places voice traffic in the best-effort forwarding class by default.

Answer: B,C

NEW QUESTION # 45
Exhibit
As shown in the exhibit, you have implemented CoS classifiers using Differentiated Services Code Point (DSCP) In this scenario,

which two statements are correct? (Choose two.)

- A. The default classification assignment overwrites all specified classifications
- B. The configuration imports all default classification assignments that are not specified.
- C. This custom DSCP classifier must be associated with physical interfaces.
- D. This custom DSCP classifier must be associated with logical interfaces.

Answer: B,D

NEW QUESTION # 46

Routers R1 and R2 receive the same 172.16.1.0/24 prefix from external AS 200 and AS 300. R1 and R2 change the Local-Preference of the prefix to 250 in an export policy towards both of their IBGP peers.

Referring to the exhibit, which statement is true?

- A. The device that advertises the prefix to its peers first will be the preferred exit point.
- B. The preferred exit point will be chosen based on the AS-PATH length of the received prefix.
- C. R3 will load balance traffic to 172.16.1.0/24 across both R1 and R2.
- D. A routing loop will be formed for 172.16.1.0/24.

Answer: A

NEW QUESTION # 47

......

Learning and understanding Juniper JN0-650 Exam Questions is not enough to pass the JN0-650 exam. Regular tests and self-evaluation are essential. The online JN0-650 practice test engine makes it easy for candidates to self-evaluate anytime. The results will boost your confidence and highlight any areas that need more attention. Educationists and experts highly acknowledge this tool created by TestKingIT.
