Free FCP_FMG_AD-7.4 Updates 100% Pass | High Pass-Rate Test FCP_FMG_AD-7.4 Collection: FCP - FortiManager 7.4 Administrator

Our FCP_FMG_AD-7.4 exam questions are perfect, unique and the simplest for all exam candidates for varying academic backgrounds. This is the reason that our FCP_FMG_AD-7.4 study guide assures you of a guaranteed success in the exam. The second you download our FCP_FMG_AD-7.4 learning braindumps, then you will find that they are easy to be understood and enjoyable to practice with them. And there are three versions of the FCP_FMG_AD-7.4 praparation engine for you to choose: the PDF, Software and APP online.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q23-

Q28):
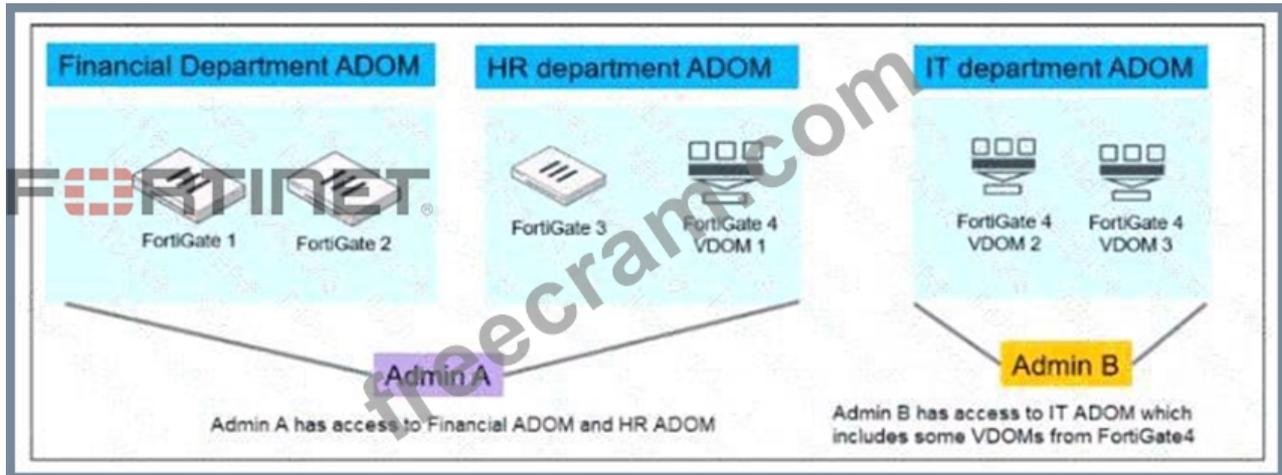

Exhibit.

An administrator would like to create three ADOMs on FortiManager with different access levels based on departments. What two conclusions can you draw from the design shown in the exhibit? (Choose two.)

- A. The administrator must configure FortiManager in workspace normal mode.
- B. Policies and objects databases can be shared between the Financial and HR ADOMs.
- C. The FortiManager administrator must set the ADOM device mode to Advanced
- D. An administrator with the super user profile can access all the VDOMs.

Answer: C,D

Explanation:
Based on the exhibit, the FortiManager administrator is setting up three ADOMs (Administrative Domains) that correspond to different departments (Financial, HR, and IT). Each ADOM has specific FortiGate devices or VDOMs (Virtual Domains) assigned to it, with different administrators managing the ADOMs.
Explanation of Options:
* A. The FortiManager administrator must set the ADOM device mode to Advanced.
* This istrue. In FortiManager, when there areVDOMs(Virtual Domains) involved, you must set the ADOM toAdvanced modeto manage VDOMs properly. The IT department ADOM includes different VDOMs fromFortiGate 4 (VDOM 2 and VDOM 3), which means the ADOM mode must be inAdvancedto support managing VDOMs separately fromother ADOMs.
* B. Policies and objects databases can be shared between the Financial and HR ADOMs.
* This isfalse. By default, ADOMs are separate, and policies and objects cannot be shared between themunless they are specifically designed to do so. The exhibit shows distinct ADOMs for each department, implying no direct sharing of policies and objects between Financial and HR ADOMs.
* C. An administrator with the super user profile can access all the VDOMs.
* This istrue. A FortiManager administrator with thesuper userprofile hasfull accessto all ADOMs and VDOMs, regardless of how access is restricted for individual administrators. In this case, an admin with the super user profile could access Financial, HR, and IT ADOMs, including all the VDOMs from FortiGate 4.
* D. The administrator must configure FortiManager in workspace normal mode.
* This isfalse. There is no requirement mentioned in the exhibit or scenario that mandates using workspace normal mode. Workspace mode is more related to how configuration changes are managed (locking, editing, etc.), but it doesn't affect the creation or access control of ADOMs.
Conclusion:
* Ais correct becauseAdvanced modeis necessary for managing VDOMs within ADOMs.
* Cis correct because asuper usercan access all VDOMs and ADOMs without restrictions.

Refer to the exhibit. Given the configuration shown in the exhibit, what are two results from this configuration? (Choose two.)

- A. Ungraceful closed sessions will keep the ADOM in a locked state until the administrator session times out.
- B. Unlocking an ADOM will submit configuration changes automatically to the approval administrator.
- C. Unlocking an ADOM will install configuration changes automatically on managed devices.
- D. The same administrator can lock more than one ADOM at the same time.

Answer: A,D

NEW QUESTION # 25

Refer to the exhibit. A service provider administrator has assigned a global policy package to a managed customer ADOM named My_ADOM, which has four policy packages. The customer administrator has access only to My_ADOM.

How can the customer or service provider administrators remove the global header policy from the policy package named Shared_Package?
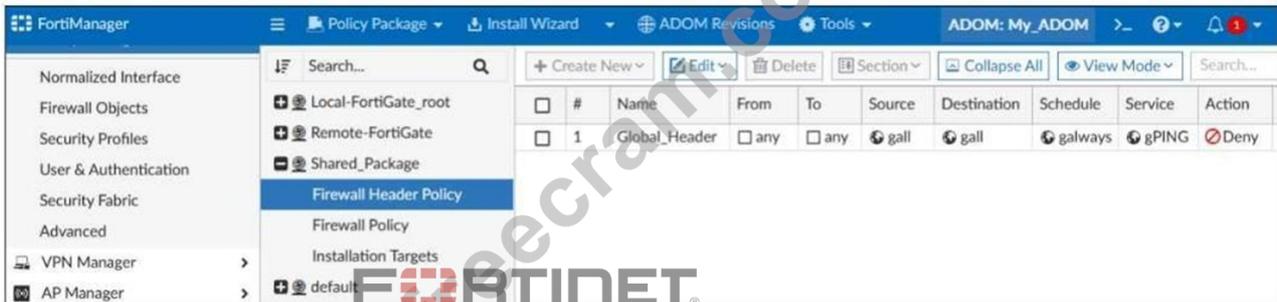

- A. The customer administrator can unassign the policy by locking My_ADOM.
- B. The service provider administrator can unassign the global policy from My_ADOM.
- C. The customer administrator can unassign the global policy from My_ADOM.
- D. The service provider administrator can unassign the policy from the global ADOM.

Answer: D

NEW QUESTION # 26

Which two items does an FGFM keepalive message include? (Choose two.)

- A. FortiGate uptime
- B. FortiGate configuration checksum
- C. FortiGate IPS version
- D. FortiGate license information

Answer: B,C

NEW QUESTION # 27

Refer to the exhibit. Given the configuration shown in the exhibit, what are two results from this configuration? (Choose two.)

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

- A. Two or more administrators can make configuration changes at the same time, in the same ADOM.
- B. Concurrent read-write access to an ADOM is disabled.
- C. You can validate administrator login attempts through external servers.
- D. The same administrator can lock more than one ADOM at the same time.

Answer: B,D

NEW QUESTION # 28

......

The APP online version of our FCP_FMG_AD-7.4 real exam boosts no limits for the equipment being used and it supports any electronic equipment and the off-line use. If only you open it in the environment with the network for the first time you can use our FCP_FMG_AD-7.4 Training Materials in the off-line condition later. It depends on the client to choose the version they favor to learn our FCP_FMG_AD-7.4 study materials.
