The Microsoft PL-200 desktop practice exam software is customizable and suits the learning needs of candidates. A free demo of the Microsoft Power Platform Functional Consultant (PL-200) desktop software is available for sampling purposes. You can change PL-200 Practice Exam's conditions such as duration and the number of questions. This simulator creates a Microsoft PL-200 real exam environment that helps you to get familiar with the original test.

The PL-200 exam is an essential certification for professionals who want to develop their skills in using the Microsoft Power Platform effectively. It is a comprehensive exam that covers a wide range of topics, including the creation of model-driven apps, the implementation of business processes, and the development of custom connectors. PL-200 exam also covers the implementation of security and data management policies, as well as the creation of dashboards and reports using Power BI.

The Microsoft PL-200 exam tests candidates on their understanding of Power Platform components, including Power Apps, Power Automate, Power BI, and Power Virtual Agents. Candidates must also demonstrate their knowledge of data modeling, user experience design, security, and integration with other Microsoft solutions. Successful candidates will have a thorough understanding of the Power Platform's capabilities and be able to apply them to real-world scenarios. The Microsoft PL-200 Certification is an excellent way for functional consultants to differentiate themselves in the job market and demonstrate their expertise in Microsoft Power Platform solutions.

Microsoft Power Platform Functional Consultant Sample Questions (Q142-Q147):

NEW QUESTION # 142

A guest asks about the start time of a specific scheduled event and wants to know what the snow conditions will be like during their stay.

You need to determine how to design the chat solution to answer those questions.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Graphical user interface Description automatically generated

Box 1: Load the extracted topic into a variable

Power Virtual Agents uses entities to understand and identify a specific type of information from a user's responses. When saving the identified information to a variable, a variable type will be associated with it. The variable type is analogous with the entity.

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

A topic has trigger phrases - these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue - and conversation nodes - these are what you use to define how a bot should respond and what it should do.

Box 2: Create a custom entity

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

NEW QUESTION # 144

You create a model-driven app for an automobile parts help desk.

A help desk agent uses a form to gather information about customers' automobiles in two custom tables. The names of the tables are Client and Automobile. The form must prepopulate the following information about the customer from the client table:

* First name

* Last name

The agent must be able to type the following information about the automobile:

* Automobile make

* Automobile model

You need to implement the form.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 145

A company uses Common Data Service to manage prospects. The company has a business process flow named BPFA that is associated with the Prospect entity to streamline the prospect management process.

You add a field named Category to the Prospect entity. You create additional business process flows. You apply the business process flows to Prospect records based on the selected category. Users can switch to any other newly configured business process flows but must not use BPFA.

You need to configure the solution.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE Each correct selection is worth one point.

- A. Deactivate BPFA.
- B. Remove all of the privileges for BPFA.
- C. Change the display order of the business process flows to move BPFA to the bottom of the list.
- D. Use a business rule to prevent users from switching to BPFA.

Answer: C,D

NEW QUESTION # 146

You need to design and create the solution for gathering contact information from guests for marketing purposes.

What should you use? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is worth one point.

Answer:
