

Fortinet FCP_FCT_AD-7.4 Top Exam Dumps | Exam Dumps FCP_FCT_AD-7.4 Pdf

What's more, part of that PremiumVCEDump FCP_FCT_AD-7.4 dumps now are free: https://drive.google.com/open?id=1qzgnDV892O3UbBO9hIFnW1GDPkzw_9fv

You can invest safely spend your money to get FCP_FCT_AD-7.4 exam preparation products with as we provide money back guarantee. If you won't pass the actual FCP_FCT_AD-7.4 exam, after using the PremiumVCEDump practice test or PDF questions and answers booklet useful for preparing the FCP_FCT_AD-7.4 exam version, you can get the money back. We offer a free trial also, so that you can check the quality and working of FCP_FCT_AD-7.4 Exam Practice test software. In case, you have prepared the FCP_FCT_AD-7.4 exam with our products and did not pass the exam we will reimburse your money.

Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test FCP_FCT_AD-7.4 certification can make you realize your dream and find a satisfied job. Our study materials are a good tool that can help you pass the exam easily. You needn't spend too much time to learn it. Our FCP_FCT_AD-7.4 Exam Guide is of high quality and if you use our product the possibility for you to pass the exam is very high.

Exam Dumps FCP_FCT_AD-7.4 Pdf, Pass FCP_FCT_AD-7.4 Exam

Software lets you customize your Fortinet FCP_FCT_AD-7.4 practice exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this Fortinet FCP_FCT_AD-7.4 practice exam software. It is similar to the FCP - FortiClient EMS 7.4 Administrator (FCP_FCT_AD-7.4) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the FCP - FortiClient EMS 7.4 Administrator (FCP_FCT_AD-7.4) web-based practice test.

Fortinet FCP_FCT_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> FortiClient provisioning and deployment: This section focuses on deploying FortiClient to endpoint devices, creating and assigning endpoint profiles, and implementing endpoint security features to enforce protection and compliance.
Topic 2	<ul style="list-style-type: none"> Troubleshooting: This section covers analyzing logs and diagnostic information to identify issues with EMS and endpoints, and resolving common deployment, connectivity, and configuration problems.

Topic 3	<ul style="list-style-type: none"> Zero trust and Security Fabric integration: This domain explains how to integrate EMS with the Fortinet Security Fabric, configure quarantine for compromised endpoints, and implement zero trust network access to control and secure endpoint connectivity.
Topic 4	<ul style="list-style-type: none"> FortiClient EMS design and deployment: This domain covers the architecture, core components, and deployment modes of FortiClient EMS. It also includes installing and configuring the server to ensure proper setup and initial system operation.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q88-Q93):

NEW QUESTION # 88

A company must integrate the FortiClient EMS with their existing identity management infrastructure for user authentication, and implement and enforce administrative access with multi-factor authentication (MFA).

Which two authentication methods can they use in this scenario? (Choose two answers)

- A. SAML
- B. LDAPS
- C. RADIUS
- D. TACACS

Answer: A,C

Explanation:

According to the FortiClient EMS 7.4 Administration Guide, for an organization to integrate with an identity management infrastructure while enforcing administrative access with Multi-Factor Authentication (MFA), the primary supported methods for remote administrator authentication are RADIUS and SAML.

1. RADIUS (Answer B)

* Identity Integration: FortiClient EMS allows administrators to add RADIUS servers as an authentication source under the Administration > Authentication Servers section.

* MFA Support: RADIUS is a standard protocol for enforcing MFA. In this scenario, FortiClient EMS acts as a RADIUS client to an external MFA provider (such as FortiAuthenticator, RSA Authentication Manager, or Duo).

* Workflow: When an administrator attempts to log in to the EMS console, EMS sends an Access-Request to the RADIUS server. If the provider requires MFA, it can challenge the user (via push notification or token code) before sending an Access-Accept back to EMS.

2. SAML (Answer D)

* Modern Identity Management: SAML (Security Assertion Markup Language) is the preferred method for integrating with modern cloud and on-premises Identity Providers (IdPs) like Microsoft Entra ID (formerly Azure AD), Okta, AD FS, or FortiAuthenticator.

* Native MFA Enforcement: By using SAML SSO, the authentication and MFA process are handled entirely by the IdP. The EMS server acts as the Service Provider (SP). When an admin logs in, they are redirected to the IdP, where the company's existing MFA policies (Conditional Access, etc.) are enforced before the user is granted access back to the EMS console.

* EMS Configuration: The curriculum details specific SAML SSO configurations for various IdPs under the SAML SSO section of the Administration Guide.

3. Why Other Options are Incorrect/Insufficient

* A. LDAPS: While FortiClient EMS supports importing users from Active Directory (ADDS) via LDAP /LDAPS for endpoint management and basic admin login, standard LDAPS does not natively support or enforce an MFA challenge-response workflow in the same integrated way that RADIUS or SAML does for administrative console access.

* C. TACACS: TACACS+ is primarily used for device administration on networking equipment (like FortiGate) and is not a listed or standard method for administrative authentication within the FortiClient EMS software documentation.

NEW QUESTION # 89

Which security fabric component sends a notification to quarantine an endpoint after IOC detection in the automation process?

- A. FortiClient
- B. FortiGate
- C. FortiAnalyzer
- D. FortiClient EMS

Answer: D

Explanation:

* Understanding the Automation Process:

* In the Security Fabric, automation processes can include actions such as quarantining an endpoint after an IOC (Indicator of Compromise) detection.

* Evaluating Responsibilities:

* FortiClient EMS plays a crucial role in endpoint management and can send notifications to quarantine endpoints.

* Conclusion:

* The correct security fabric component that sends a notification to quarantine an endpoint after IOC detection is FortiClient EMS.

References:

FortiClient EMS and automation process documentation from the study guides.

NEW QUESTION # 90

Which component or device shares device status information through ZTNA telemetry?

- A. FortiClient
- B. FortiGate
- C. FortiClient EMS
- D. FortiGate Access Proxy

Answer: A

Explanation:

FortiClient communicates directly with FortiClient EMS to continuously share device status information through ZTNA telemetry.

NEW QUESTION # 91

Which statement about the FortiClient EMS console logs is true?

- A. The FortiClient EMS administrator assigned the gateway list to All Groups.
- B. The FortiClient EMS administrator deployed a new FortiClient installation to All Groups.
- C. The FortiClient EMS administrator created an endpoint profile.
- D. The FortiClient EMS administrator assigned the endpoint profile to All Groups.

Answer: C

Explanation:

This is directly indicated in sample FortiClient EMS questions related to the console logs and endpoint profiles, where the correct choice from similar options is the creation of an endpoint profile by the administrator, not assigning profiles or gateway lists to all groups or deploying new FortiClient installations to all groups.

NEW QUESTION # 92

Which two VPN types can a FortiClient endpoint user initiate from the Windows command prompt? (Choose two)

- A. SSL VPN
- B. IPSec
- C. L2TP
- D. PPTP

Answer: A,B

Explanation:

FortiClient supports initiating the following VPN types from the Windows command prompt:

IPSec VPN: FortiClient can establish IPSec VPN connections using command line instructions.

SSL VPN: FortiClient also supports initiating SSL VPN connections from the Windows command prompt.

These two VPN types can be configured and initiated using specific command line parameters provided by FortiClient.

NEW QUESTION # 93

.....

PremiumVCEDump's Fortinet exam practice test content is tested and approved by the best industry experts and is constantly updated to meet the requirements of the actual FCP_FCT_AD-7.4 exam questions. PremiumVCEDump reputation is established particularly with an outstanding success rate of 99.1%. This boosts up our popularity graph among the ambitious professionals who want to enrich their profiles with the most prestigious FCP_FCT_AD-7.4 certifications. Above all, your success is ensured with 100% PremiumVCEDump money back guarantee. If our FCP_FCT_AD-7.4 test dumps do not help you pass exam paper, we shall refund your money in full.
