

Most Trusted Platform to Buy Cisco 300-430 Actual Dumps

P.S. Free & New 300-430 dumps are available on Google Drive shared by PassReview: <https://drive.google.com/open?id=1ERNROpgVDYjMaYbehgr6dNOePGnBhAYs>

If you are worried that it is not easy to obtain the certification of 300-430. Our 300-430 study questions can meet your needs. Once you use our 300-430 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our 300-430 learning material, you will have a good result. After years of development practice, our 300-430 test torrent is absolutely the best. You will embrace a better future if you choose our 300-430 exam materials.

The Cisco 300-430 Exam is designed for those IT professionals who want to learn how to work with Cisco enterprise networks and discover how Flex ACL, AVC, wIPS, or WLC concept contribute to improving business processes. It mainly focuses on implementation of Cisco Enterprise wireless networks as is one of the concentration tests for the CCNP Enterprise certification.

300-430 Valid Braindumps Questions, 300-430 Clearer Explanation

Our 300-430 Exam Braindumps have a broad market in most countries we have due to the high quality of the 300-430 exam dumps. The feedback of the customers is quite good since the pass rate is high, it helps them a lot. Some customers even promote our product to their friends or even colleges after they pass it. We offer free update for one year, it will help you to change your practicing ways in accordance with the dynamics of the exam.

Cisco 300-430 certification exam is an important step for IT professionals who are looking to advance their careers in wireless networking. Implementing Cisco Enterprise Wireless Networks certification validates their expertise in implementing and managing enterprise wireless networks, which is a critical skillset in today's digital business landscape. Additionally, this certification provides a solid foundation for IT professionals who are looking to pursue more advanced wireless networking certifications, such as the Cisco Certified Network Professional (CCNP) Wireless certification.

Cisco 300-430 Exam is an essential certification for individuals looking to enhance their skills in the wireless network domain. 300-430 exam covers a wide range of topics related to wireless network design, deployment, security, and troubleshooting. Candidates can prepare for the exam by enrolling in training courses or using practice exams to assess their knowledge. Passing the exam and obtaining the certification can open up opportunities for career advancement in the wireless network domain.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q179-Q184):

NEW QUESTION # 179

A wireless engineer must implement a corporate wireless network for a large company in the most efficient way possible. The wireless network must support 32 VLANs for 300 employees in different departments.

Which solution must the engineer choose?

- A. Configure 16 WLANs to be broadcast on the 2.4-GHz band and 16 WLANs to be broadcast on the 5.0-GHz band.
- B. Configure different AP groups to support different VLANs, so that all of the WLANs can be broadcast on both radios.
- **C. Configure one single SSID and implement Cisco ISE for VLAN assignment according to different user roles.**
- D. Configure a second WLC to support half of the APs in the deployment.

Answer: C

Explanation:

Cisco WLAN solution addresses that limitation by support of identity networking. That allows the network to advertise a single SSID, but allows specific users to inherit different QoS, VLAN attributes and/or security policies based on the user credential. Dynamic VLAN assignment is one such feature that places a wireless user into a specific VLAN based on the credentials supplied by the user. This task of assigning users to a specific VLAN is handled by a RADIUS authentication server, such as Cisco ISE. This can be used, for example, to allow the wireless host to remain on the same VLAN as it moves within a campus network.

NEW QUESTION # 180

A wireless network has been implemented to enable multicast video to be streamed reliably over the wireless link to the wireless users. After a client reports that the video is unable to stream, the administrator determines that the client is connecting at a data rate of 12 Mbps and is trying to stream to a valid multicast address on the network. Which two actions must be applied? (Choose two.)

- **A. Allow multicast-direct to work correctly and multicast-direct to be enabled globally.**
- B. Change the WLAN QoS value to Bronze for the WLAN that multicast will be enabled.
- **C. Implement video-stream for the multicast video on the controller.**
- D. Turn off IGMP snooping for all the configured WLANs on the controller.
- E. Allow RTSP to stream the video due to wireless multicast not using acknowledgements.

Answer: A,C

Explanation:

To ensure reliable streaming of multicast video over a wireless link, it's essential to optimize the multicast settings on the controller. Option B, implementing video-stream for the multicast video on the controller, is a feature that optimizes the delivery of multicast streams by converting them into unicast streams for specific clients, thus improving reliability. Option C, allowing multicast-direct to work correctly, involves enabling multicast-direct globally, which allows multicast packets to be sent directly to clients without the need for them to subscribe to a specific multicast group, enhancing efficiency and reliability. NEW QUESTION # 181

A Cisco CMX 3375 appliance on the 10.6.1 version code counts duplicate client entries, which creates wrong location analytics. The issue is primarily from iOS clients with the private MAC address feature enabled. Enabling this feature requires an upgrade of the Cisco CMX 3375 appliance in a high availability pair to version 10.6.3. SCP transfers the Cisco CMX image, but the upgrade script run fails. Which configuration change resolves this issue?

- A. Run root patch to first upgrade to version 10.6.2 and then migrate to version 10.6.3.
- B. Save configuration and use the upgrade script to upgrade the high availability pair without breaking the high availability.
- **C. Break the high availability using the `cmxha config disable` command and upgrade the primary and secondary individually.**
- D. Upgrade the high availability pair to version 10.6.2 image first and then upgrade to version 10.6.3.

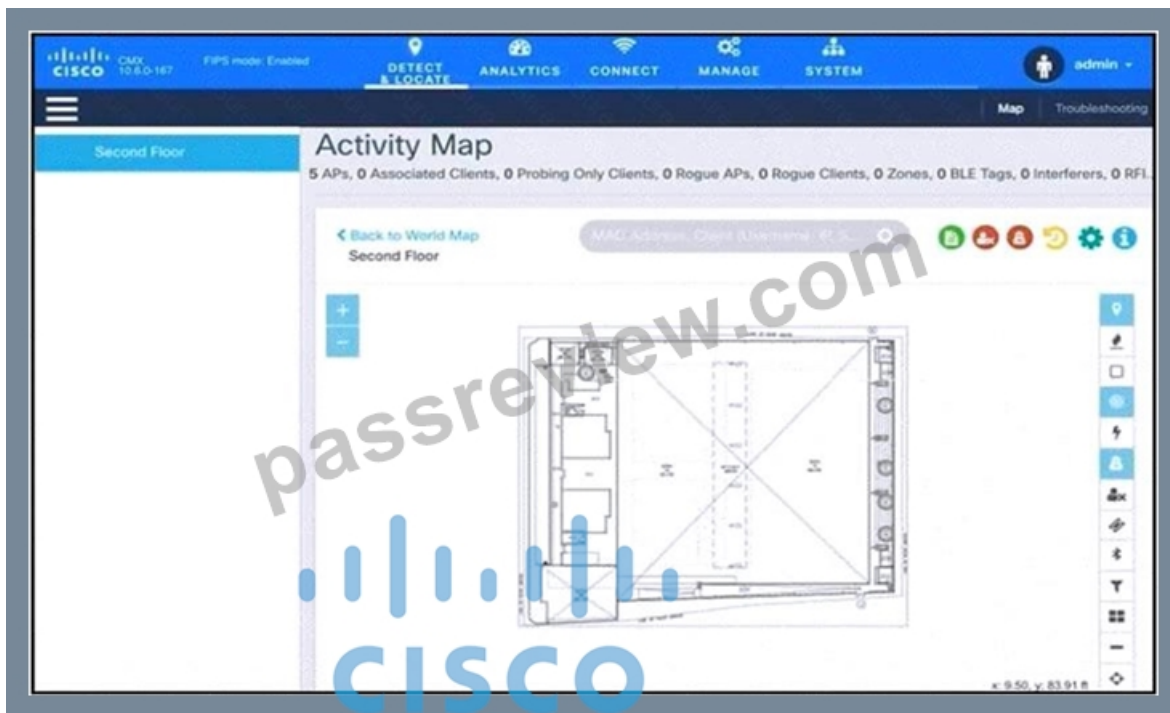

Answer: C

Explanation:

<https://www.cisco.com/c/en/us/support/docs/availability/high-availability/213664-configure-cmx-high-availability.html>

NEW QUESTION # 182

Refer to the exhibit.

An engineer has deployed the Cisco CMX solution to track and detect the number of users who visit the office each day. The CMX dashboard is not showing any data. Which action resolves this issue?

- A. Add the WLCs to CMX.
- B. Install an evaluation license to CMX server.
- C. Copy the exported Maps from CMX server to PI using SCP.
- D. Configure Single Sign-On authentication.

Answer: A

Explanation:

The issue with the Cisco CMX dashboard not showing any data can be resolved by integrating the Wireless LAN Controllers (WLCs) with the CMX system. The CMX solution relies on data from the WLCs to track and detect users' presence in the office area. Without the WLCs being added to CMX, the system cannot collect the necessary analytics and location data for its operations.

NEW QUESTION # 183

Which feature on the Cisco Wireless LAN Controller must be present to support dynamic VLAN mapping?

- A. VLAN name override
- B. AAA override
- C. CCKM/OKC
- D. FlexConnect ACL

Answer: B

Explanation:
