ISTQB CTAL-TM-001최신시험후기 - CTAL-TM-001인증시험대비자료

ISTQB인증 CTAL-TM-001덤프로ISTQB시험을 패스,하지 못하셨다구요? 최선을 다했는데도 실패하였다는 말은 영 원히 하지마세요. ISTQB인증 CTAL-TM-001시험을 패스하는 방법은 많고도 많습니다. ITDumpsKR의ISTQB인증 CTAL-TM-001덤프로 시험에 다시 도전해보세요. ITDumpsKR의ISTQB인증 CTAL-TM-001덤프는 착한 가격에 100%에 달하는 적응율과 패스율을 보장해드립니다. 시험에서 불합격성적표를 받으시면 덤프구매시 지불한 덤프비용을 환불처리해드립니다. ITDumpsKR의ISTQB인증 CTAL-TM-001덤프로 시험패스를 꼭봐주세요.

최신 ISTQB Test Manager Advanced CTAL-TM-001 무료샘플문제 (Q18-Q23):

질문 # 18

SCENARIO 1

DreamPartner dating agency are redesigning their dating application following a major security breach in which sensitive customer data was made publically available. The redesign includes stronger security encryption and performance tuning.

The product risk register for the redesign project, which was produced after all requirements had been agreed, includes the following:

The organisational Test Strategy contains the following objectives:

1. A Risk-based test approach must be adopted for all projects
2. Functional regression testing should start as soon as functional testing is complete
3. Automated tests may be run before or in parallel with manual tests

The project Test Plan has allocated 6 weeks to complete all test execution, with functional testing taking 3 weeks to execute, performance and security testing 2 weeks each and regression testing 1 week.

Which of the following options places the test suites (TS1 to TS5) in the correct order for test execution?

SELECT ONE OPTION

- A. TS1, TS2, TS5, TS3, TS4.
- B. TS3, TS4, TS1, TS2, TS5.
- **C. TS3, TS1, TS2, TS5, TS4.**
- D. TS5, TR1, TS3 TSA, TS2

정답: C

질문 # 19

When Is the metric for the percentage of requirements coverage defined?

- A. Test completion
- **B. Test planning**
- C. Test execution
- D. Test monitoring

정답: B

설명:

* Context Analysis:

* Requirements coverage must be defined during test planning to ensure tests align with all requirements from the start of the project.

* Evaluation of Options:

* A. Test planning:

* Correct. Coverage goals are established during planning to define test objectives and scope.

* B. Test monitoring:

* Incorrect. Monitoring tracks progress but doesn't define coverage.

* C. Test execution:

* Incorrect. Execution measures coverage but doesn't define it.

* D. Test completion:

* Incorrect. Completion reviews coverage metrics but doesn't define them.

* Syllabus Alignment:

* Test planning (TM-1.1.1) includes defining coverage goals and ensuring alignment with requirements.

ISTQB Advanced Level Test Management Syllabus (TM-1.1.1)

질문 # 20

Which of the following aspects should test progress metrics be mapped to? [1]

- **A. Exit criteria**
- B. Defect resolution rate
- C. Lines of code
- D. Post-implementation defect discovery rate

정답: A

설명:

Test progress metrics should be mapped to exit criteria to ensure that the testing process aligns with the predefined standards for completion. Exit criteria typically include conditions such as coverage of test cases, pass rates, and the resolution of major defects, which are essential for determining the end of the test phase.

References: The ISTQB Advanced Level Test Manager syllabus includes the evaluation of exit criteria as part of the test monitoring and control process¹. It is crucial for test managers to define and evaluate these criteria to ensure that the testing objectives have been met and that the product is ready for release.

질문 # 21

Which testing metric identifies defect density? [1]

- A. People
- B. Project
- **C. Product**

- D. Process

정답: C

설명:

Defect density is a testing metric that measures the number of defects identified in a component or system divided by the size of the component or system (expressed in standard measurement terms, e.g., lines-of-code, number of classes or function points)1. Defect density is a product metric, as it evaluates the quality or reliability of a software product2. Therefore, option B is the correct answer. Option A is incorrect because project metrics are metrics that measure the characteristics of the software project, such as cost, schedule, effort, scope, or resources3. Option C is incorrect because process metrics are metrics that measure the characteristics of the software process, such as effectiveness, efficiency, productivity, or maturity. Option D is incorrect because people metrics are metrics that measure the characteristics of the software personnel, such as skills, experience, motivation, or satisfaction. 질문 # 22

Which of the following is a valid drawback of independent testing? 1 credit

- A. Independent testers need extra education and always cost more.
- B. Developers loose the sense of responsibility and independent testers may become a bottleneck.
- C. Independent testers will become a bottleneck and introduce problems in incident management.
- D. Developer and independent testing will overlap and waste resources.

정답: B

설명:
