SAP Certified - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q55-Q60):

NEW QUESTION # 55

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Contact an SAP Deployment lead for customization help.
- B. Create a package to migrate translations by ICM.

- C. Translations are included in migrations and are listed as AMLStringResource in the migration
- D. User with Partner Administrator can configure translation.

Answer: C

NEW QUESTION # 56

A standard field is not available in reporting A Greenfield customer needs to be able to report on the data that will be captured in that standard field. How can this be achieved?

- A. Under Field Configurations,, search for the field in the appropriate class, mark the field Reportable, Save and Publish.
- B. The system makes all fields reportable after a system refresh.
- C. All standard fields are reportable by default.
- D. Create a custom field that can be marked Reportable, default the custom field to the standard field value, publish, and then pull the field into reporting

Answer: D

NEW QUESTION # 57

When you have created a new custom field and marked it as reportable, saved and published your changes, the field does not show up in your reports. How can you resolve the issue?

- A. You need to wait 2 hours for the schema to refresh. Any change to the object model will be automatically synchronized to SAP Ariba Analytics on regular intervals
- B. You did not assign the custom field to the appropriate report category. Ensure that the field is linked to the correct category for it to appear in reports.
- C. You forgot to run the task Retrieve flexible fields metadata for reporting under Manage > Administration > Reporting Manager > Flex Field Reporting
- D. You created the custom field in a different module. Custom fields must be created in the same module where the reports are generated to show up correctly.

Answer: C

NEW QUESTION # 58

During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Push
- B. Move
- C. Deploy
- D. Migrate

Answer: C

NEW QUESTION # 59

When preparing to load legacy contracts during a Bluefield deployment in SAP Ariba Contracts, which of the following actions are required to ensure a successful migration?

- A. Use the exact same process and tools as used in the Greenfield migration scenario to upload legacy contracts.
- B. Create a new customized contract upload process specifically for Bluefield deployments to accommodate differences in site structure.
- C. Manually enter legacy contract data into SAP Ariba Contracts using the application's UI instead of using import tools.
- D. Skip the legacy contract upload step if the Production site already contains migrated Flex Master Data Templates.

Answer: A

NEW QUESTION # 60
