여러분은 먼저 우리 ExamPassdump사이트에서 제공되는 VMware인증2V0-16.25시험덤프의 일부분인 데모를 다운받으셔서 체험해보세요. ExamPassdump는 여러분이 한번에VMware인증2V0-16.25시험을 패스하도록 하겠습니다. 만약VMware인증2V0-16.25시험에서 떨어지셨다고 하면 우리는 덤프비용전액 환불입니다.

VMware 2V0-16.25 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
주제 2	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
주제 3	<ul style="list-style-type: none"> Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

주제 4	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
주제 5	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.

2V0-16.25 유효한 시험 - 2V0-16.25 최신버전 인기덤프

VMware 인증 2V0-16.25 시험을 패스하고 싶다면 ExamPassdump에서 출시한 VMware 인증 2V0-16.25 덤프가 필수이겠죠. VMware 인증 2V0-16.25 시험을 통과하여 원하는 자격증을 취득하시면 회사에서 자기만의 위치를 단단하게 하여 인정을 받을 수 있습니다. 이 점이 바로 많은 IT인사들이 VMware 인증 2V0-16.25 시험에 도전하는 원인이 아닐까 싶습니다. ExamPassdump에서 출시한 VMware 인증 2V0-16.25 덤프 실제 시험의 거의 모든 문제를 커버하고 있어 최고의 인기와 사랑을 받고 있습니다. 어느 사이트의 VMware 인증 2V0-16.25 공부자료도 ExamPassdump 제품을 대체할 수 없습니다. 학원 등록 필요 없이 다른 공부자료 필요 없이 덤프에 있는 문제만 완벽하게 공부하신다면 VMware 인증 2V0-16.25 시험 패스가 어렵지 않고 자격증 취득이 쉬워집니다.

최신 VCP-VVF Admin 2V0-16.25 무료 샘플문제 (Q11-Q16):

질문 # 11

An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

Which out-of-the-box role satisfies these access control requirements?

- A. Virtual Machine Power User
- B. Administrator
- C. Virtual Machine User
- D. Virtual Machine Console User

정답: A

설명:

The requirement is to follow least privilege while granting specific VM operations:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

The Virtual Machine Power User role is the correct out-of-the-box role, as it includes all these privileges without granting unnecessary administrative access.

Other roles:

- * Administrator (A): Grants full environment control # too broad.
- * Virtual Machine Console User (B): Limited to console access, cannot power on/off or snapshot.
- * Virtual Machine User (C): Can interact with VMs but lacks snapshot privileges.

질문 # 12

A virtual machine (VM) owner has requested to move a VM from one cluster to another. The following information has been

provided:

- * The VM cannot have downtime during the transfer.
- * The same network is present on both clusters.
- * The datastore that the VM is currently on is not present in the destination cluster.

What step should the administrator perform to move the VM?

- A. Inform the owner the VM cannot be moved to the new cluster.
- B. Perform a vMotion of the VM to the new cluster.
- C. Backup the VM and restore it to the new cluster.
- **D. Perform a vMotion with Storage vMotion to the new cluster.**

정답: D

설명:

To move a VM to another cluster:

- * Requirement: Zero downtime# RequiresvMotion.
- * Challenge: Datastore not shared# RequiresStorage vMotion.
- * The combined operation,Cross-Cluster vMotion with Storage vMotion, allows moving compute and storage at the same time, with no downtime.

Other options:

- * A. vMotion only# Requires shared datastore, not available here.
- * B. Backup/restore# Causes downtime, not acceptable.
- * D. Cannot be moved# Incorrect; vMotion + Storage vMotion supports this.

질문 # 13

An administrator is tasked with enabling a Supervisor in a VMware vSphere Foundation (VVF) environment using vSphere networking and the Foundation Load Balancer. The vSAN-backed cluster has been configured with a vSphere Distributed Switch. Which two actions must the administrator perform when enabling a Supervisor using vSphere networking? (Choose two.)

- **A. Provide a static IP address range for the Supervisor control plane VMs.**
- **B. Assign a vSphere Distributed Switch and a corresponding port group.**
- C. Configure a Tier-0 Gateway with BGP or static routing.
- D. Enable the VM Service before deploying the Supervisor.
- E. Select a vSphere namespace template to define initial namespace limits.

정답: A,B

설명:

When enabling a Supervisor Cluster in vSphere with Tanzu using vSphere networking and the Foundation Load Balancer:

- * You must provide a static IP range for the Supervisor control plane VMs so they can be deployed with dedicated addresses. (B)
- * You must assign a vSphere Distributed Switch (VDS) with an appropriate port group for Supervisor networking. (E) Other options:
- * A. Namespace template# Optional after Supervisor is enabled, not required at setup.
- * C. Tier-0 Gateway# Applies to NSX networking, not vSphere networking.
- * D. VM Service# Enabled after Supervisor, not a prerequisite.

VMware vSphere 9.0 -Enable a Supervisor Cluster with vSphere Networking VMware Docs: Supervisor Setup Networking Requirements

질문 # 14

An administrator has been tasked with creating a custom alert for an object in VMware Cloud Foundation (VCF) Operations. When creating the alert, the administrator completes the following:

- * A new symptom definition.
- * A new alert definition.
- * Select the Object type.

What additional step must the administrator take to complete the stated objective and ensure the alert is triggered?

- A. Create and enable a super metric for read latency in the Active Policy.
- B. Create a new Payload Template.
- C. Enable the alert in an Active Policy.
- D. Create an instance of the Rest Notification Plugin.

정답: C

설명:

When creating a custom alert in VCF Operations, the final required step is:

* Enable the alert in an Active Policy, so it applies to the target objects.

Without policy activation, the alert exists but will never trigger.

Other options:

* A. Super metric# Only required if monitoring a custom metric, not for standard alerts.

* B. REST Notification Plugin# Used for outbound integration, not triggering alerts.

* C. Payload Template# Used in notifications, not in core alert configuration.

References:

VMware Cloud Foundation 9.0 -Custom Alerts and Policies

VMware Docs: Alert Definitions in vRealize Operations

질문 # 15

Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- A. VCF Operations for Logs
- B. VCF Operations for Networks
- C. VCF Operations
- D. Fleet Manager

정답: A

설명:

After deploying vSphere Foundation, to centralize log collection and analysis, you must add:

* VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting.

Other options:

* B. VCF Operations# Focuses on performance/capacity, not log collection.

* C. VCF Operations for Networks# Focuses on networking insights.

* D. Fleet Manager# Used for multi-instance management, not logging.
