As soon as you enter the learning interface of our system and start practicing our UiPath UiPath-TAEPv1 learning materials on our Windows software, you will find small buttons on the interface. These buttons show answers, and you can choose to hide answers during your learning of our UiPath UiPath-TAEPv1 Exam Quiz so as not to interfere with your learning process.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 2	<ul style="list-style-type: none">UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 3	<ul style="list-style-type: none">Testing Process: This section of the exam measures the skills of Test Automation Engineers and focuses on applying best practices in test case design and execution. It outlines the importance of structured application testing in UiPath and emphasizes quality assurance through automation.
Topic 4	<ul style="list-style-type: none">UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 5	<ul style="list-style-type: none">UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.

Topic 6	<ul style="list-style-type: none"> UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.
Topic 7	<ul style="list-style-type: none"> CI CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI) CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.

UiPath-TAEPv1 Valid Exam Forum | UiPath-TAEPv1 Valid Braindumps Sheet

No software installation is required to go through the web-based UiPath UiPath-TAEPv1 practice test. The PDF file of UiPath-TAEPv1 real exam questions is easy to use on laptops, tablets, and smartphones. We have added all the UiPath UiPath-TAEPv1 Questions, which have a chance to appear in the UiPath-TAEPv1 real test. Our UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) dumps PDF exam questions are beneficial to prepare for the test in less time.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q13-Q18):

NEW QUESTION # 13

What type of data sources can be used for a data-driven test that will be developed using UiPath Test Suite on Premises version?

- A. File (Excel and CSV)
Auto Generate
Data Service
Existing data already Stored in the Test Data folder of the project
- B. File (Excel and CSV)
Auto Generate
Data Service
Test Data Queue
- C. File (Excel and CSV)**
Auto Generate
Existing data already Stored in the Test Data folder of the project
Test Data Queue
- D. File (Excel and CSV)
Data Service
Existing data already Stored in the Test Data folder of the project
Test Data Queue

Answer: C

Explanation:

In UiPath Test Suite On-Premises, supported data sources for data-driven tests include:

File (Excel and CSV)

Auto Generate

Existing data stored in the Test Data folder of the project

Test Data Queue

These options allow flexible management and variation of test inputs for automated testing.

NEW QUESTION # 14

Which are the types of coded automations in UiPath?

- A. Coded workflows, Coded test cases, Coded functions.
- B. Workflows, Test cases, Source files.
- C. Coded workflows, Coded databases, Code source files.
- D. Coded workflows, Coded test cases, Code source files.

Answer: A

Explanation:

The types of coded automations in UiPath include Coded Workflows, Coded Test Cases, and Coded Functions. These enable developers to write automation logic using code (e.g., C#) within a UiPath project, enhancing flexibility and control beyond drag-and-drop activities.

NEW QUESTION # 15

What needs to be provided in order to create a Test Data Queue from static Test Data in UiPath Studio?

- A. No additional information is necessary.
- B. Only the JSON schema.
- C. Test Data Queue name and JSON schema.
- D. Only the Test Data Queue name.

Answer: C

Explanation:

To create a Test Data Queue from static test data in UiPath Studio, you need to provide both the Test Data Queue name and the corresponding JSON schema. The schema ensures the structure of the data is defined correctly for the queue items.

NEW QUESTION # 16

What conclusions can be drawn from the exhibit?

- A. It's a data-driven test case with 6 variations, 3 variations were run and 3 not yet run.
- B. It's a data-driven test case with 3 variations, 3 variations were run and 3 not yet run.
- C. It's an automated test case with 8 variations.
- D. It's a data-driven test case with 2 variations, 2 variations were run and 2 not yet run.

Answer: A

Explanation:

The Test Explorer shows a data-driven test case named "Create Loan" with 6 variations under TestCaseValues. Out of these, 3 have green flask icons (indicating they were run and passed), while 3 have blue play icons (indicating they have not yet been executed).

NEW QUESTION # 17

What type of data can be added to the Tester Comment field?

- A. Only text
- B. Text and Video recording
- C. Text and documents
- D. Text and Screenshot

Answer: A

Explanation:

The Tester Comment field in UiPath Test Manager supports only text input. It is used to provide notes, observations, or explanations related to a test case execution.

NEW QUESTION # 18

Just look at the text version of the introduction, you may still be unable to determine whether this product is suitable for you, or whether it is worth your purchase. We are very fond of preparing trial versions of our UiPath-TAEPv1 study materials for you so that you can have a clearly check on not only the content of the UiPath-TAEPv1 Exam Braindumps, but also the displays. The content of the tiral version is a small part of our UiPath-TAEPv1 practice questions, and it is easy and convenient to free download.
