Getting more certifications are surely good things for every ambitious young man. It not only improves the possibility of your life but also keep you constant learning. Test ability is important for personal. But if you are blocked by this exam, our Amazon DVA-C02 Valid Exam Practice questions may help you. If you have only one exam unqualified so that you can't get the certification. Our DVA-C02 valid exam practice questions will help you out. We guarantee you 100% pass in a short time.

We understand you not only consider the quality of our AWS Certified Developer - Associate prepare torrents, but price and after-sales services and support, and other factors as well. So our AWS Certified Developer - Associate prepare torrents contain not only the high quality and high accuracy DVA-C02 Test Braindumps but comprehensive services as well. By the free trial services you can get close realization with our DVA-C02 quiz guides, and know how to choose the perfect versions before your purchase.

Test Amazon DVA-C02 Engine | Exam DVA-C02 Pass4sure

In the PDF version, the AWS Certified Developer - Associate (DVA-C02) exam questions are printable and portable. You can take these Amazon DVA-C02 pdf dumps anywhere and even take a printout of AWS Certified Developer - Associate (DVA-C02) exam questions. The PDF version is mainly composed of real Amazon DVA-C02 Exam Dumps. Real4exams updates regularly to improve its AWS Certified Developer - Associate (DVA-C02) pdf questions and also makes changes when required.

Amazon AWS Certified Developer - Associate Sample Questions (Q423-Q428):

NEW QUESTION # 423

A developer is updating the production version of an AWS Lambda function to fix a defect. The developer has tested the updated code in a test environment. The developer wants to slowly roll out the updates to a small subset of production users before rolling out the changes to all users.

Only 10% of the users should be initially exposed to the new code in production.

Which solution will meet these requirements?

- A. Update the Lambda code and create a new version of the Lambda function. Create a Lambda proxy integration. Configure the Lambda proxy to split traffic between the two Lambda function versions. Send 90% of the traffic to the production version, and send 10% of the traffic to the new version.
- B. Update the Lambda code and create a new version of the Lambda function. Create a Lambda function alias. Configure the traffic weights in the Lambda alias between the two Lambda function versions. Send 90% of the traffic to the production

version, and send 10% of the traffic to the new version.

- C. Update the Lambda code and create a new version of the Lambda function. Create a Lambda function trigger. Configure the traffic weights in the trigger between the two Lambda function versions. Send 90% of the traffic to the production version, and send 10% of the traffic to the new version.
- D. Create a new Lambda function that uses the updated code. Create a Lambda alias for the production Lambda function. Configure the Lambda alias to send 90% of the traffic to the production Lambda function, and send 10% of the traffic to the test Lambda function.

Answer: B

NEW QUESTION # 424

A company needs to package and deploy an application that uses AWS Lambda to compress and decompress video clips. The application uses a video codec library that is larger than 250 MB. The application uses the library to compress the videos before storage and to decompress the videos upon retrieval.

Which solution will meet these requirements?

- A. Create one Lambda function. Upload one zip file that contains code to handle video compression and decompression to the function. Include the codec library in the zip file.
- B. Create two Lambda functions. Upload one zip file that contains code to handle video compression to one function. Upload a second zip file that contains code for video decompression to the second function. Create one Lambda layer for the codec library. Add the layer to both functions.
- C. Create two Lambda functions. Build one container image that contains code to handle video compression and a second image that contains video decompression code. Add the codec library to both images. Upload the images to Amazon ECR. Use the containers to create the Lambda functions.
- D. Create two Lambda functions. Upload one zip file that contains code to handle video compression to one function. Upload a second zip file that contains code for video decompression to the second function. Include the codec library in both zip files.

Answer: C

Explanation:

AWS Lambda supports container images up to 10 GB in size, making it suitable for applications with large dependencies, such as a video codec library larger than 250 MB. By creating separate container images for video compression and decompression, the application can efficiently isolate functionality while ensuring that each function includes the required dependencies.

The container images are stored in Amazon ECR and used to create the Lambda functions.

NEW QUESTION # 425

A company uses imported certificates in AWS Certificate Manager (ACM) to access the company's public websites. The company needs a solution to ensure that a security team receives a notification a minimum of 30 days before any certificate expires. Which solution will meet this requirement with the LEAST development effort?

- A. Create an Amazon SNS topic, and subscribe the security team to the topic. Create an Amazon EventBridge rule with an event pattern. Set the source as aws.acm. Set a detail type of ACM Certificate Approaching Expiration. Set the SNS topic as the target for the rule.
- B. Create a shell script that runs AWS CLI commands to check each ACM certificate's expiration date. Send an email notification to the security team when a certificate will expire within 30 days. Use a cron job to schedule the script to run every night on an Amazon EC2 instance.
- C. Create an Amazon SNS topic, and subscribe the security team to the topic. Create an Amazon EventBridge rule with an event pattern. Set the source as aws.securityhub. Set a detail type of Security Hub Findings - Imported and a detail of ACM Certificate Approaching Expiration. Set the SNS topic as the target for the rule.
- D. Create a shell script that runs AWS CLI commands to check each ACM certificate's expiration date. Send an email notification to the security team when a certificate will expire within 30 days. Use a cron job in AWS CloudShell to schedule the script to run every night.

Answer: A

Explanation:

Amazon EventBridge automatically emits events for ACM certificate expiration notifications with the source aws.acm and detail type ACM Certificate Approaching Expiration. Creating a rule with this event pattern and setting an SNS topic as the target provides an automated, serverless solution with minimal development effort.

NEW QUESTION # 426

A developer needs to migrate an online retail application to AWS to handle an anticipated increase in traffic. The application currently runs on two servers: one server for the web application and another server for the database. The web server renders webpages and manages session state in memory. The database server hosts a MySQL database that contains order details. When traffic to the application is heavy, the memory usage for the web server approaches 100% and the application slows down considerably.

The developer has found that most of the memory increase and performance decrease is related to the load of managing additional user sessions. For the web server migration, the developer will use Amazon EC2 instances with an Auto Scaling group behind an Application Load Balancer.

Which additional set of changes should the developer make to the application to improve the application's performance?

- A. Use the EC2 instance store to manage the session data. Use an Amazon RDS for MySQL DB instance to store the application data.
- B. Use an EC2 instance to host the MySQL database. Store the session data and the application data in the MySQL database.
- C. Use Amazon ElastiCache for Memcached to store and manage the session data and the application data.
- **D. Use Amazon ElastiCache for Memcached to store and manage the session data. Use an Amazon RDS for MySQL DB instance to store the application data.**

Answer: D

Explanation:

Session stores are easy to create with Amazon ElastiCache for Memcached.

<https://aws.amazon.com/elasticache/memcached/>

With Amazon RDS, you can deploy scalable MySQL servers in minutes with cost-efficient and resizable hardware capacity.

<https://aws.amazon.com/rds/mysql/>

NEW QUESTION # 427

A developer manages an application that writes customer orders to an Amazon DynamoDB table.

The orders use `customer_id` as the partition key, `order_id` as the sort key, and `order_date` as an attribute. A new access pattern requires accessing data by `order_date` and `order_id`. The developer needs to implement a new AWS Lambda function to support the new access pattern.

How should the developer support the new access pattern in the MOST operationally efficient way?

- **A. Add a new global secondary index (GSI) to the DynamoDB table that specifies `order_date` as the partition key and `order_id` as the sort key. Write the new Lambda function to query the new GSI index.**
- B. Write the new Lambda function to scan the DynamoDB table. In the Lambda function, write a method to retrieve and combine results by `order_date` and `order_id`.
- C. Add a new local secondary index (LSI) to the DynamoDB table that specifies `order_date` as the partition key and `order_id` as the sort key. Write the new Lambda function to query the new LSI index.
- D. Enable DynamoDB Streams on the table. Choose the new and old images information to write to the DynamoDB stream. Write the new Lambda function to query the DynamoDB stream

Answer: A

NEW QUESTION # 428

.....

Our service tenet is to let the clients get the best user experiences and be satisfied. From the research, compiling, production to the sales, after-sale service, we try our best to provide the conveniences to the clients and make full use of our DVA-C02 study materials. We organize the expert team to compile the DVA-C02 Study Materials elaborately and constantly update them. To let the clients have a fundamental understanding of our DVA-C02 study materials, we provide the free trials before their purchasing.
