CTFL-AcT Valid Exam Fee | CTFL-AcT Valuable Feedback

With CTFL-AcT study tool, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to CTFL-AcT Exam Torrent based on constantly changing syllabus and industry development breakthroughs. We also hire dedicated staff to continuously update our question bank daily, so no matter when you buy CTFL-AcT guide torrent, what you learn is the most advanced.

ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q15-Q20):

NEW QUESTION # 15
Which one of the following statements describes an exploratory test charter BEST?

- A. The test charter is elaborated during the testing session according to test execution results.
- B. Each exploratory test charter is based on a previously defined list of activities that would be interesting to test.
- C. Indicating that the tester should take the role of a novice user can be part of an exploratory test charter.
- D. Acceptance testers use the exploratory test charter during the testing session to define the test oracle.

Answer: C

NEW QUESTION # 16
Which one of the following statements about the relation between business goals, business needs and requirements is true?

- A. Once the business requirements are elicited, business analysts start to formalize business goals for the project.
- B. Business goals, business needs and requirements describe, at different levels of abstraction, what shall be archived
- C. Business requirements are generally developed by refining product requirements.vhbj
- D. Business goals can be extracted from product requirements

Answer: B

Explanation:
The relationship between business goals, business needs, and requirements is hierarchical and reflects increasing levels of specificity:
Business Goals: High-level strategic objectives.
Business Needs: Problems or opportunities that must be addressed to achieve those goals.
Requirements: Specific capabilities or conditions the system must satisfy to meet the needs.
Option B is correct because it accurately describes how these elements relate at different abstraction levels in the requirements hierarchy. This relationship is fundamental to business analysis and accepted by standards like BABOK and ISTQB.
Other options:
A is reversed - business goals usually precede and drive the elicitation of requirements.
C and D misrepresent the sequence - product requirements are derived from business goals and needs, not the other way around.
B). Business goals, business needs and requirements describe, at different levels of abstraction, what shall be achieved

NEW QUESTION # 17
Which of the following sentences explains BEST how business process and business rule modeling can be used for ATDD?

- A. In an ATDD approach, process models are created for initial test design but are not maintained afterwards.
- B. In an ATDD approach, testers use business process and business rule models to generate acceptance tests.
- C. In an ATDD approach, business process/rule models must be created before the project starts.
- D. In an ATDD approach, business process models replace acceptance criteria.

Answer: B

NEW QUESTION # 18
Which one of the following statements describes correctly how acceptance testing may be augmented with other test techniques or approaches?

- A. In a risk-based testing approach, acceptance criteria are derived from the tester's experience and intuition.
- B. In a black-box testing approach, acceptance test scenarios follow the implemented sequence of function calls in the code.
- C. In a priority-based testing approach, prioritization of acceptance tests depends on identified product risks.
- D. In a model-based testing approach, acceptance tests are generated from graphical or textual models.

Answer: D

NEW QUESTION # 19
Which one of the following answers lists characteristic of quality in use according to the quality in use model defined in ISO 25010?

- A. Security
- B. User experience
- C. Satisfaction
- D. Freedom of interference

Answer: C

Explanation:
According to ISO/IEC 25010:2011, the "Quality in Use" model includes characteristics that measure the system's impact on stakeholders during actual usage in a specific context.
The four main characteristics of Quality in Use are:
Effectiveness
Efficiency
Satisfaction
Freedom from Risk
Option C is correct because "Satisfaction" is one of the core quality-in-use characteristics and refers to the degree to which user needs are fulfilled in context.
Other options:
A (User experience) is a broader term not formally defined as a Quality in Use characteristic in ISO 25010.
B (Security) is part of the product quality model, not quality in use.
D (Freedom of interference) is not a defined term in ISO 25010; it may be a misstatement of "freedom from risk."

NEW QUESTION # 20
......

We have seen that candidates who study with outdated CTFL-AcT practice material don't get success and lose their resources. To save you from loss of money and time, BrainDumpsStore is offering a product that is specially designed to help you pass the ISTQB Foundation Level - Acceptance Testing (CTFL-AcT) exam on the first try.
