

Frequent International Code Council Fire-Inspector-II Update | New Fire-Inspector-II Test Prep

BONUS!!! Download part of Pass4Leader Fire-Inspector-II dumps for free: <https://drive.google.com/open?id=1QQxJtHhTpWcAasMoTH2KEph5NDBJ8CSe>

After paying our Fire-Inspector-II exam torrent successfully, buyers will receive the mails sent by our system in 5-10 minutes. Then candidates can open the links to log in and use our Fire-Inspector-II test torrent to learn immediately. Because the time is of paramount importance to the examinee, everyone hope they can learn efficiently. So candidates can use our Fire-Inspector-II guide questions immediately after their purchase is the great advantage of our product. The language is easy to be understood makes any learners have no obstacles. The Fire-Inspector-II Test Torrent is suitable for anybody no matter he or she is in-service staff or the student, the novice or the experience people who have worked for years. The software boosts varied self-learning and self-assessment functions to check the results of the learning.

Two Fire-Inspector-II practice tests of Pass4Leader (desktop and web-based) create an actual test scenario and give you a Fire-Inspector-II real exam feeling. These Fire-Inspector-II practice tests also help you gauge your International Code Council Certification Exams preparation and identify areas where improvements are necessary. You can alter the duration and quantity of International Code Council Fire-Inspector-II Questions in these Fire-Inspector-II practice exams as per your training needs.

High-quality Frequent Fire-Inspector-II Update offer you accurate New Test Prep | 67 - Fire Inspector II Exam

Regarding the process of globalization, every fighter who seeks a better life needs to keep pace with its tendency to meet challenges. Fire-Inspector-II certification is a stepping stone for you to stand out from the crowd. The Fire-Inspector-II exam guide function as a time-counter, and you can set fixed time to fulfill your task, so that promote your efficiency in real test. The key strong-point of our Fire-Inspector-II Test Guide is that we impart more important knowledge with fewer questions and answers, with those easily understandable Fire-Inspector-II study braindumps, you will find more interests in them and experience an easy learning process.

International Code Council 67 - Fire Inspector II Exam Sample Questions (Q61-Q66):

NEW QUESTION # 61

An acceptance test for a fire alarm system in a new apartment building should be scheduled after:

- **A. the contractor verifies full compliance.**
- B. each zone is completed.
- C. the system has been installed and operating for one year.
- D. the hydrostatic test of the underground main is completed.

Answer: A

Explanation:

IFC Section 901.5 (Acceptance Tests) requires fire protection systems, including fire alarms, to be tested upon completion to ensure compliance with NFPA 72 (National Fire Alarm and Signaling Code) and the IFC. The contractor's verification of full compliance (B) signals readiness for the official acceptance test by the fire code official, ensuring all components are installed and functional.

Option A (zone-by-zone testing) is impractical for final acceptance. Option C ties the test to water supply, irrelevant to alarms.

Option D (one year) is excessive and not required by IFC or NFPA 72 for initial acceptance. Thus, B is correct.

Reference: IFC 2021, Section 901.5 (Acceptance Tests), NFPA 72.

NEW QUESTION # 62

A permit is required for storage of high-pile combustible stock in a building when the area of stock exceeds

- A. 1,000
- B. 0
- C. 2,500
- **D. 1**

Answer: D

Explanation:

High-Pile Combustible Storage Permit Requirements

According to the International Fire Code (IFC) 2021, Section 105.6.23, a permit is required for the storage of high-pile combustible stock when the storage area exceeds 2,500 square feet.

2. Definition of High-Pile Storage

High-pile storage is defined as storage of combustible materials on racks or piles exceeding 12 feet in height (or 6 feet for highly combustible materials, such as rubber and plastics).

IFC Table 3206.2 establishes fire protection requirements based on storage height, area, and commodity class.

3. Verification of Other Options

Option A (225 sq. ft.) - Incorrect, as this is far below the 2,500 sq. ft. permit threshold.

Option B (500 sq. ft.) - Incorrect, as the fire code does not require a permit at this level.

Option C (1,000 sq. ft.) - Incorrect, as the IFC specifies 2,500 sq. ft. as the threshold for requiring a permit.

Reference Sources:

International Fire Code (IFC) 2021 - Section 105.6.23 (High-Pile Combustible Storage Permit Requirements) IFC Chapter 32 (High-Piled Storage Regulations) ICC Fire Inspector II Study Guide (2021) Thus, the correct and verified answer is: D. 2,500. #

NEW QUESTION # 63

Newly upholstered furniture may be required to resist ignition by cigarettes in common areas in which of the following nonsprinklered occupancies?

- A. Libraries in Group E
- B. Office spaces
- C. Group A-1
- **D. Group I-2**

Answer: D

Explanation:

In nonsprinklered occupancies, newly upholstered furniture in common areas must resist ignition by cigarettes primarily in Group I-2 occupancies (such as hospitals, nursing homes, and care facilities). This requirement reduces the risk of fire ignition in environments where occupants may have limited mobility and are unable to evacuate quickly.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 805.2 (Ignition Resistance of Upholstered Furniture and Mattresses) IFC 805.2 specifies that nonsprinklered Group I-2 occupancies must have upholstered furniture that resists ignition by cigarettes because these settings involve vulnerable populations who may need assistance in an emergency.

2. NFPA 101 - Life Safety Code (2021 Edition) - Section 10.3.2 (Fire-Retardant Upholstered Furniture) NFPA 101, Section 10.3.2 aligns with the IFC in requiring that furniture in health care facilities (Group I-2) must meet fire resistance standards to prevent ignition from cigarettes and other sources.

Detailed Explanation of Answer Choices:

Option A (Correct): Group I-2 (hospitals, nursing homes, and assisted living facilities) is required to have cigarette-ignition-resistant upholstered furniture in nonsprinklered common areas.

Option B (Incorrect): Group A-1 (theaters and performing arts venues) does not have this requirement, as seating arrangements are different and typically involve fire-resistant materials.

Option C (Incorrect): Office spaces (Business Occupancies, Group B) do not require ignition-resistant furniture under fire code regulations.

Option D (Incorrect): Libraries in Group E (Educational Occupancies) are not required to have this furniture unless otherwise specified by local codes.

Thus, the correct and verified answer is: A. Group I-2

NEW QUESTION # 64

Conditions that may exist and warrant a modification include all of the following except where the:

- A. modification does not lessen health, life, and fire safety.
- B. special individual reason makes the strict letter of the code impractical.
- C. modification is in compliance with the intent and purpose of the code.
- **D. modification requires the use of an alternative building material.**

Answer: D

Explanation:

Reference to Code Modifications and Equivalency Requirements:

According to International Fire Code (IFC 2021), Section 104.10, modifications may be granted if they meet the intent of the code and do not reduce fire and life safety.

The NFPA 1 (Fire Code) and NFPA 101 (Life Safety Code) also allow modifications under specific conditions, provided safety is maintained.

Understanding the Exception in the Question:

The question asks for conditions that DO NOT warrant a modification.

Using an alternative building material alone does not justify a modification unless it meets equivalent safety standards.

Code modifications are granted based on maintaining or improving safety, not simply changing materials.

Clarification of Incorrect Answer Choices:

A: Modification does not lessen health, life, and fire safety # Correct condition for modification, so incorrect answer IFC 104.10 allows modifications as long as safety is not compromised.

C: Modification is in compliance with the intent and purpose of the code # Correct condition for modification, so incorrect answer Codes provide flexibility if the intent of fire and life safety is still met.

D: Special individual reason makes the strict letter of the code impractical # Correct condition for modification, so incorrect answer Some codes allow modifications if strict compliance is impractical, provided alternative safety measures are implemented.

Conclusion:

The correct and verified answer is B (modification requires the use of an alternative building material) because material substitution alone does not justify a modification unless safety is maintained, as per IFC 104.10 and NFPA standards.

NEW QUESTION # 65

Foamed plastics or materials containing foamed plastics used for stage scenery must be approved when tested in accordance with

- A. NFPA 11A
- B. CPSC 16CFR
- **C. UL 1975**
- D. ASTM D 1784

Answer: C

Explanation:

Foamed plastics or materials containing foamed plastics used for stage scenery must meet strict fire performance requirements to prevent rapid flame spread and fire hazards in assembly occupancies.

The correct fire test standard for these materials is UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 807.4.2 (Foamed Plastics for Stage Scenery) IFC 807.4.2 states that foamed

plastics used in scenery must be tested and approved per UL 1975 to ensure fire safety.

2. UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes This standard evaluates the flammability and smoke production of foamed plastics used in decorative applications, including stage scenery.

Detailed Explanation of Answer Choices:

Option A (Correct): UL 1975 is the required test standard for foamed plastics used in stage scenery, ensuring compliance with IFC 807.4.2.

Option B (Incorrect): NFPA 11A deals with foam-water fire suppression systems, not foamed plastics for decorative use.

Option C (Incorrect): CPSC 16CFR relates to consumer product safety regulations but does not address fire safety for foamed plastics on stage scenery.

Option D (Incorrect): ASTM D 1784 is a test for rigid PVC plastics and does not apply to foamed plastics used for stage scenery. Thus, the correct and verified answer is: A. UL 1975.

NEW QUESTION # 66

.....

As for candidates who possessed with a Fire-Inspector-II professional certification are more competitive. The current word is a stage of science and technology, social media and social networking has already become a popular means of Fire-Inspector-II exam materials. As a result, more and more people study or prepare for exam through social networking. By this way, our Fire-Inspector-II learning guide can be your best learn partner. The pass rate of our Fire-Inspector-II exam questions is high as 99% to 100%, and it is a wise choice to have our Fire-Inspector-II training guide.

New Fire-Inspector-II Test Prep: <https://www.pass4leader.com/International-Code-Council/Fire-Inspector-II-exam.html>

To increase people's knowledge and understanding of this Fire-Inspector-II exam, so as to improve and direct your practice, our experts made the Fire-Inspector-II study questions diligently and assiduously all these years, The authority and reliability of the Fire Inspector Fire-Inspector-II sure questions & answers are the guarantee of 100% success, Every Fire-Inspector-II exam questions are going through rigid quality check before appearing on our online stores.

Left to these designs, we will all be surrounded by systems out Fire-Inspector-II of our control, with our only recourse being to continue paying service to the corporations that have brought us to this point.

High-quality Frenquent Fire-Inspector-II Update | Fire-Inspector-II 100% Free New Test Prep

Fusing content, structure, and beauty to deliver experiences users love, To increase people's knowledge and understanding of this Fire-Inspector-II Exam, so as to improve and direct your practice, our experts made the Fire-Inspector-II study questions diligently and assiduously all these years.

The authority and reliability of the Fire Inspector Fire-Inspector-II sure questions & answers are the guarantee of 100% success, Every Fire-Inspector-II exam questions are going through rigid quality check before appearing on our online stores.
